Endgame in Afghanistan Jun 20 2020 Endgame in Afghanistan: For Whom the Dice Rolls covers a wide territory related to the war in Afghanistan, the stakes the whole world-and not just the United States-has in it, and its possible outcome. It shows that it is not merely a war for the future of Afghanistan, but a conflict between the regressive worldview of the Taliban and al Qaeda and modernity. The book examines the consequences of an American exit from Afghanistan under circumstances indicating a defeat; the ability of the Karzai government or its successor to hold its own thereafter; and the regional and global geo-strategic consequences, including those on Pakistan, of a Taliban-al Qaeda takeover of Afghanistan. It also explores the possibility of the United States arriving at a peace settlement with the Taliban as well as that of the Americans winning the Afghan war. Taking an analytical multi-disciplinary approach, coupled with meticulous research, this book focuses on areas hitherto neglected. Linking known but scattered information in entirely new and cohesive analyses, the author presents the kind of comprehensive picture of the Afghan war and its consequences that no other book has done.

Reading Power, Revised & Expanded Edition Oct 17 2022 Ten years ago, Reading Power was launched in an elementary school in Vancouver. It has since evolved into a recognized approach to comprehension instruction being implemented across Canada, in the United States, United Kingdom, Sweden, and China. This ground-breaking approach showed teachers how to help students think while they read — connect, question, visualize, infer, and transform. Since the publication of the first edition of Reading Power, Adrienne Gear has continued to reflect on and refine her ideas about metacognition, comprehension instruction, and the Reading Power strategies. This revised and expanded edition shares these new understandings, and offers teachers new ideas, new lessons, and, of course, new anchor books to support the Reading Power principles. An ideal resource for teachers familiar to this strategic approach to teaching reading, or for those looking for new ways to connect thinking with reading.

Handbook of Innovation Indicators and Measurement Oct 05 2021 'A great book to understand and foster innovation at all levels: a truly innovative piece of work.' Enrico Giovannini, Minister of Labour and Social Policies, Italy 'This book brings together original contributions from world leading experts on innovation indicators and is unique in several respects. First, the focus is upon innovation in terms of commercialized products and processes and not on secondary indicators of research or patenting. Second, it combines academic perspectives with user perspectives from industry and international organizations. Third, it strikes a good balance between old and new indicators, opening up new dimensions of innovation for measuring. It is a book worth reading for scholars studying innovation, for policy makers and, not least, for innovation managers in the private sector.' Bengt-Åke Lundvall, Aalborg University, Denmark and Sciences-Po, Paris, France This Handbook comprehensively examines indicators and statistical measurement related to innovation (as defined in the OECD/Eurostat Oslo Manual). It deals with the development and the use of innovation indicators to support decision-making and is written by authors who are practitioners, who know what works and what does not, in order to improve the development of indicators to satisfy future policy needs. This unique volume presents: the historical and geographical context for innovation indicators and measurement practical examples of how measurement is actually undertaken new areas of innovation indicators and measurement, including consumer innovation, public sector innovation and social innovation. This informative Handbook will appeal to policy makers in government departments, statistical offices and research institutes and international organizations such as the EU, OECD and the UN, as well as university departments of economics, sociology, law, science and technology, and public policy.

These selected paragraphs distill the contents and give you a quick look inside Notes and Queries, Vol. V, Number 130, April 24, 1852 - A Medium of Inter-communication for Literary Men, Artists, - Antiquaries, Genealogists, etc.: Look inside the book: Whatever may have been the legal or equitable right of Ashmole, upon

which the decree in Chancery was founded, it is impossible for a generous mind to come to any other conclusion than that the course he pursued was unworthy of him as a man of education, and of his wealth and station; for it must be obvious from the will of Tredescant, that even supposing he had willingly and wittingly made a deed of gift of his treasures to Ashmole, and given him formal possession by handing over the Queen Elizabeth's shilling, it is next to impossible to believe that Ashmole did not know that he repented that act, and wished to connect his own name with the bequest to the University. ...'The sublime character his Grace did lately bestow on a brace of his own Chaplains, that he feared not, not he, to turn them loose against any two preachers in England, has rais'd so high an opinion of your person in all men of sense and understanding, that you cannot wonder to see yourself courted by us as the reigning favourite at Lambeth; be pleas'd, therefore, when business of State or the care of the Church afford his Grace some minutes of leisure, to represent our deplorable case to Him: we are now as a flock without a Shepherd, and are inform'd by a threat'ning Emissary, who came lately down only to scatter terror through our fields, that my Lord designs to thrust a young looker amongst us, who, tho' fit to be an Amanuensis, should the dreadful times of Pulton return, yet knows not yet what doctrine He should give, nor what tithes He should receive. About Various Various, the Author: This location had quite a pedigree: The previous occupant of these houses was the publishing company of Henry George Bohn; before that they had belonged to the bookseller J.H. Bohte, who specialized in classics; and before that (though not immediately before) they had been the home of Thomas de Quincey.

Networking for People Who Hate Networking, Second Edition Mar 10 2022 Would you rather get a root canal than face a group of strangers? Does the phrase "working a room" make you want to retreat to yours? Devora Zack, an avowed introvert and successful consultant who gives presentations to thousands of people at dozens of events annually, feels your pain. She found that other networking books assume that to succeed, you have to act like an extrovert. Not at all. There is another way. Zack politely examines and then smashes to tiny fragments the "dusty old rules" of standard networking advice. She shows how the very traits that make many people hate networking can be harnessed to forge an approach more effective and user-friendly than traditional techniques. This edition adds new material on applying networking principles in personal situations, handling interview questions, following up—what do you do with all those business cards?—and more. Networking enables you to accomplish the goals that are most important to you. But you can't adopt a style that goes against who you are—and you don't have to. As Zack writes, "You do not succeed by denying your natural temperament; you succeed by working with your strengths."

Hydrological Modeling Feb 21 2023 This book carefully considers hydrological models which are essential for predicting floods, droughts, soil moisture estimation, land use change detection, geomorphology and water structures. The book highlights recent advances in the area of hydrological modelling in the Ganga Basin and other internationally important river basins. The impact of climate change on water resources is a global concern. Water resources in many countries are already stressed, and climate change along with burgeoning population, rising standard of living and increasing demand are adding to the stress. Furthermore, river basins are becoming less resilient to climatic vagaries. Fundamental to addressing these issues is hydrological modelling which is covered in this book. Integrated water resources management is vital to ensure

water and food security. Integral to the management is groundwater and solute transport, and this book encompasses tools that will be useful to mitigate the adverse consequences of natural disasters.
