Indigenous Efflorescence Dec 20 2019 Indigenous efflorescence refers to the surprising economic prosperity, demographic increase and cultural renaissance currently found amongst many Indigenous communities around the world. This book moves beyond a more familiar focus on 'revitalisation' to situate these developments within their broader political and economic contexts. The materials in this volume also examine the everyday practices and subjectivities of Indigenous efflorescence and how these exist in tension with ongoing colonisation of Indigenous lands, and the destabilising impacts of global neoliberal capitalism. Contributions to this volume include both research articles and shorter case studies, and are drawn from amongst the Ainu and Sami (Saami/Sámi) peoples (in Ainu Mosir in northern Japan, and Sapmi in northern Europe, respectively). This volume will be of use to scholars working on contemporary Indigenous issues, as well as to Indigenous peoples engaged in linguistic and cultural revitalisation, and other aspects of Indigenous efflorescence.

Becoming One Jun 25 2020 International development programs strive not only to alleviate poverty but to transform people, aid workers and recipients alike. *Becoming One* grapples with this process by exploring the work of OISCA*, a prominent Japanese NGO in central Myanmar. OISCA's postwar origins at the intersection of Shinto, secularism, and rightwing politics, and its vision of inter-Asian solidarity and a sustainable future helped shape the organization's ideology and activities. By delving into the world of its aid workers—their everyday practices, discourses, and aspirations—author Chika Watanabe seeks to understand

the NGO's political, social, and ethical effects. At OISCA training centers, Japanese and local staff teach sustainable agricultural skills and organic farming methods to rural youth. Much of the teaching involves laboring in the fields, harvesting produce, and caring for livestock: what they can't use themselves is sold at nearby markets. Watanabe's detailed and multi-sited ethnography shows how Japanese and Burmese actors mobilize around the idea of "becoming one" with Mother Earth and their human counterparts within a shared communal lifestyle. By exploring the tension between intentions and political effects—spanning environmentalism, cultural-nationalist ideologies of "Japaneseness," and aspirations to make the world a better place—Watanabe highlights fascinating questions and both positive and negative outcomes. *Becoming One* weaves together vivid descriptions of the intensive, intimate, and "muddy labor" of "making persons" (*hitozukuri*) with the wider historical resonances of these efforts, decentering common understandings of development, NGOs, and their moral and political promises. This engaging and thought-provoking book combines insights from anthropology, development studies, and religious studies to add to our understanding of modern Japan. *Organization for Industrial, Spiritual and Cultural Advancement

Communicating Climate Change Mar 15 2022 Environmental educators face a formidable challenge when they approach climate change due to the complexity of the science and of the political and cultural contexts in which people live. There is a clear consensus among climate scientists that climate change is already occurring as a result of human activities, but high levels of climate change awareness and growing levels of concern have not translated into meaningful action. *Communicating Climate Change* provides environmental educators with an understanding of how their audiences engage with climate change information as well as with concrete, empirically tested communication tools they can use to enhance their climate change program. Starting with the basics of climate science and climate change public opinion, Armstrong, Krasny, and Schuldts synthesize research from environmental psychology and climate change communication, weaving in examples of environmental education applications throughout this practical book. Each chapter covers a separate topic, from how environmental psychology explains the complex ways in which people interact with climate change information to communication strategies with a focus on framing, metaphors, and messengers. This broad set of topics will aid educators in formulating program language for their classrooms at all levels. *Communicating Climate Change* uses fictional vignettes of climate change education programs and true stories from climate change educators working in the field to illustrate the possibilities of applying research to practice. Armstrong et al, ably demonstrate that environmental education is an important player in fostering positive climate change dialogue and subsequent climate change action. Thanks to generous funding from Cornell University, the ebook editions of this book are available as Open Access from Cornell Open (cornellopen.org) and other Open Access repositories.

DC: 0-5 Feb 26 2023 DC:05 captures new findings relevant to diagnosis in young children and addresses unresolved issues in the field since DC:03R was published in 2005. DC:05 is designed to help mental health and other professionals: *cc* recognize mental health and developmental challenges in infants and young children, through 5 years old; *cc* understand that relationships and psychosocial stressors contribute to mental health and developmental disorders and incorporate contextual factors into the diagnostic process; *cc* use diagnostic criteria effectively for classification, case formulation, and intervention; and *cc* facilitate research on mental health disorders in infants and young children.

The Power of Systems Jan 01 2021 The International Institute of Applied Systems Analysis (IIASA), an international think tank established jointly by the United States and Soviet Union in Austria in 1972, was intended to advance scientific collaboration. Until the late 1980s, the IIASA was one of the very few permanent sites where policy scientists from both sides of the Iron Curtain could work together to articulate and solve world problems, most notably global climate change. One of the best-kept secrets of the Cold War, this think tank was a rare zone of freedom, communication, and negotiation, where leading Soviet scientists could try out their innovative ideas, benefit from access to Western literature, and develop social networks, thus paving the way for some of the key science and policy breakthroughs of the twentieth century.

IBM PowerVM Virtualization Managing and Monitoring Apr 23 2020 IBM® PowerVM® virtualization

technology is a combination of hardware and software that supports and manages the virtual environments on POWER5-, POWER5+, IBM POWER6®, and IBM POWER7®-based systems. PowerVM is available on IBM Power Systems™, and IBM BladeCenter® servers as optional Editions, and is supported by the IBM AIX®, IBM i, and Linux operating systems. You can use this set of comprehensive systems technologies and services to aggregate and manage resources by using a consolidated, logical view. Deploying PowerVM virtualization and IBM Power Systems offers you the following benefits: Lower energy costs through server consolidation Reduced cost of your existing infrastructure Better management of the growth, complexity, and risk of your infrastructure This IBM Redbooks® publication is an extension of IBM PowerVM Virtualization Introduction and Configuration, SG24-7940. It provides an organized view of best practices for managing and monitoring your PowerVM environment concerning virtualized resources managed by the Virtual I/O Server.

WHO Guidelines on Hand Hygiene in Health Care Oct 30 2020 The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in which health care is delivered either to a patient or to a specific group in a population. Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts.

DC:0-3R Feb 20 2020 Published in 1994, Zero to Three's Diagnostic Classification of Mental Health and Developmental Disorders of Infancy and Early Childhood (DC:0-3) was the first developmentally based system for diagnosing mental health and developmental disorders in infants and toddlers. Its diagnostic categories reflected the consensus of a multidisciplinary group of experts in early childhood development and mental health. DC:0-3R enhances your ability to prevent, diagnose, and treat mental health problems in the earliest years of identifying and describing disorders not addressed in other classification systems and by pointing the way to effective intervention approaches. Mental health clinicians, counselors, physicians, nurses, early interventionists, early childhood educators, and researchers will find DC:0-3R to be an indispensable guide to evaluation and treatment planning with infants, toddlers, and their families in a wide range of settings.

Experiments and Simulations in Advanced Manufacturing Nov 18 2019 This book presents the latest advances in manufacturing from both the experimental and simulation point of view. It covers most aspects of manufacturing engineering, i.e. theoretical, analytical, computational and experimental studies. Experimental studies on manufacturing processes require funds, time and expensive facilities, while numerical simulations and mathematical models can improve the efficiency of using the research results. It also provides high level of prediction accuracy and the basis for novel research directions.
