Kindred Apr 22 2020 From the New York Times bestselling author of Parable of the Sower and MacArthur “Genius” Grant, Nebula, and Hugo award winner The visionary time-travel classic whose Black female hero is pulled through time to face the horrors of American slavery and explores the impacts of racism, sexism, and white supremacy then and now. “I lost an arm on my last trip home. My left arm.” Dana’s torment begins when she suddenly vanishes on her 26th birthday from California, 1976, and is dragged through time to antebellum Maryland to rescue a boy named Rufus, heir to a slaveowner’s plantation. She soon realizes the purpose of her summons to the past: protect Rufus to ensure his assault of her Black ancestor so that she may one day be born. As she endures the traumas of slavery and the soul-crushing normalization of savagery, Dana fights to keep her autonomy and return to the present. Blazing the trail for neo-slavery narratives like Colson Whitehead’s The Underground Railroad and Ta-Nehisi Coates’s The Water Dancer, Butler takes one of speculative fiction’s oldest tropes and infuses it with lasting depth and power. Dana not only experiences the cruelties of slavery on her skin but also grimly learns to accept it as a condition of her own

existence in the present. “Where stories about American slavery are often gratuitous, reducing its horror to explicit violence and brutality, Kindred is controlled and precise” (New York Times). “Reading Octavia Butler taught me to dream big, and I think it’s absolutely necessary that everybody have that freedom and that willingness to dream.” —N. K. Jemisin

The series adaption from FX premieres December 13 on Hulu. Developed for television by writer/executive producer Branden Jacobs-Jenkins (Watchmen), executive producers also include Joe Weisberg and Joel Fields (The Americans, The Patient), and Darren Aronofsky (The Whale). Janicza Bravo (Zola) is director and an executive producer of the pilot. Kindred stars Mallori Johnson, Micah Stock, Ryan Kwanten, and Gayle Rankin.

Encyclopedia of General Science for General Competitions Aug 19 2022

- 1. Only book based on NCERT Textbooks of Science**
- 2. In-Line with analysis of Competitive Exams papers**
- 3. Explanation to everyday Science Phenomena**
- 4. Coverage of Previous papers in a Chapterwise manner**
- 5. More than 2000 MCQs are given for the quick revision**

The book "Encyclopedia of General Science" has been prepared after analysis the recent pattern of competitive exams like SSC, UPSC & State Level PCS, etc. serving as an ideal book for competitive examinations. It is the only book which is based on NCERT of Science covering all their major sections like

physics, chemistry, biology, space science, etc., in a student friendly manner which can be studied by all students including non-science. Besides all the theories, this book focuses on the practice part too, with more than 2000 MCQs are provided for the quick revision. Previous Years' Question Papers are provided in a Chapterwise manner for thorough practice. At the end of every section appendix given that covers glossary, branches and other important information of each section. TABLE OF CONTENT Physics, Chemistry, Biology, Computer & IT Our Mathematical Universe Nov 29 2020 Max Tegmark leads us on an astonishing journey through past, present, and future, and through the physics, astronomy, and mathematics that are the foundation of his work, most particularly his hypothesis that our physical reality is a mathematical structure and his theory of the ultimate multiverse. In a dazzling combination of both popular and groundbreaking science, he not only helps us grasp his often mind-boggling theories, but he also shares with us some of the often surprising triumphs and disappointments that have shaped his life as a scientist. Fascinating from first to last - here is a book for the full science-reading spectrum. Max Tegmark is author or co-author of more than 200 technical papers, twelve of which have been cited more than 500 times. He has featured in dozens of science documentaries, and his work with the SDSS collaboration on galaxy clustering shared the first prize in Science

magazine's "Breakthrough of the Year: 2003". He holds a Ph.D from the University of California, Berkeley, and is a physics professor at MIT.

Long-term investment and the Sustainable Company: a stakeholder perspective. Vol. III Apr 15 2022 The onset of the Great Financial Crisis in 2007/8 has triggered a widespread debate about the causes and the social and environmental consequences of the lack of long-term investment around the world. This volume, the third in the Sustainable Company book series produced by the GOODCORP network of academic and trade union experts on corporate governance, presents a 'stakeholder' approach to the problem. The analysis and policy prescriptions presented here go beyond mainstream economic analysis by highlighting the need for major changes in the way resources are saved, distributed and invested in the interests of a sustainable and just economy and society. Individual chapters explore different dimensions of the problem of short-termism and possible policy responses. Key themes in this volume include the state of the debate on long-term investment in Europe, increasing worker voice in pension fund investment and implementing financial transaction taxes to discourage financial market speculation. Policy proposals beyond the mainstream include strengthening worker participation rights (including the right to non-financial information

from companies) and using international investment treaties to support social and environmental standards.

Angels in the Wilderness Nov 10 2021 A first person account of a fateful solo hiking trip into California's Sierra Nevada mountains.

Oswaal CBSE Accountancy, English Core, Business Studies & Economics Class 11 Sample Question Papers + Question Bank (Set of 8 Books) (For 2023 Exam) Aug 07 2021 **CBSE Sample Paper Class 11 Accountancy, English Core, Business Studies & Economics for Exams 2022-2023** is one of the best CBSE Reference Books for Class 11 exams 2022-23. Digital Games and Mathematics Learning Jul 26 2020
Digital games offer enormous potential for learning and engagement in mathematics ideas and processes. This volume offers multidisciplinary perspectives—of educators, cognitive scientists, psychologists and sociologists—on how digital games influence the social activities and mathematical ideas of learners/gamers. Contributing authors identify opportunities for broadening current understandings of how mathematical ideas are fostered (and embedded) within digital game environments. In particular, the volume advocates for new and different

ways of thinking about mathematics in our digital age—proposing that these mathematical ideas and numeracy practices are distinct from new literacies or multiliteracies. The authors acknowledge that the promise of digital games has not always been realised/fulfilled. There is emerging, and considerable, evidence to suggest that traditional discipline boundaries restrict opportunities for mathematical learning. Throughout the book, what constitutes mathematics learnings and pedagogy is contested. Multidisciplinary viewpoints are used to describe and understand the potential of digital games for learning mathematics and identify current tensions within the field. Mathematics learning is defined as being about problem solving; engagement in mathematical ideas and processes; and social engagement. The artefact, which is the game, shapes the ways in which the gamers engage with the social activity of gaming. In parallel, the book (as a textual artefact) will be supported by Springer’s online platform—allowing for video and digital communication (including links to relevant websites) to be used as supplementary material and establish a dynamic communication space.

11+ Comprehension Dec 19 2019 So you know what 11+ comprehension papers look like. But how do you write the perfect answers? This second comprehension guide from Accolade Press offers 11+ students a unique chance to pull back the curtain and see exactly what they need to do to

GDP Feb 01 2021 How GDP came to rule our lives—and why it needs to change Why did the size of the U.S. economy increase by 3 percent on one day in mid-2013—or Ghana's balloon by 60 percent overnight in 2010? Why did the U.K. financial industry show its fastest expansion ever at the end of 2008—just as the world's financial system went into meltdown? And why was Greece's chief

statistician charged with treason in 2013 for apparently doing nothing more than trying to accurately report the size of his country's economy? The answers to all these questions lie in the way we define and measure national economies around the world: Gross Domestic Product. This entertaining and informative book tells the story of GDP, making sense of a statistic that appears constantly in the news, business, and politics, and that seems to rule our lives—but that hardly anyone actually understands. Diane Coyle traces the history of this artificial, abstract, complex, but exceedingly important statistic from its eighteenth- and nineteenth-century precursors through its invention in the 1940s and its postwar golden age, and then through the Great Crash up to today. The reader learns why this standard measure of the size of a country's economy was invented, how it has changed over the decades, and what its strengths and weaknesses are. The book explains why even small changes in GDP can decide elections, influence major political decisions, and determine whether countries can keep borrowing or be thrown into recession. The book ends by making the case that GDP was a good measure for the twentieth century but is increasingly inappropriate for a twenty-first-century economy driven by innovation, services, and intangible goods.

The News Dec 11 2021 Alain de Botton explores our relationship with 'the news' in this book full of his trademark wit and wisdom. Following on from his

bestselling Religion for Atheists, Alain de Botton turns now to look at the manic and peculiar positions that 'the news' occupies in our lives. We invest it with an authority and importance which used to be the preserve of religion - but what does it do for us? Mixing current affairs with philosophical reflections, de Botton offers a brilliant illustrated guide to the precautions we should take before venturing anywhere near the news and the 'noise' it generates. Witty and global in reach, The News will ensure you'll never look at reports of a celebrity story or political scandal in quite the same way again. Praise for Religion for Atheists: 'Smart and stimulating . . . a sensitive analysis of the deeply human needs that faith meets' Financial Times 'A serious and optimistic set of practical ideas that could improve and alter the way we live . . . energetic and on the side of the angels' Jeanette Winterson, The Times 'Packed with tantalising goads to thought and playful prompts to action' Independent

Alain de Botton's bestselling books include Religion for Atheists, How Proust Can Change Your Life, The Art of Travel, and The Architecture of Happiness. He lives in London and founded The School of Life (www.theschooloflife.com) and Living Architecture (www.living-architecture.co.uk). For more information, consult www.alaindebotton.com.

MCQs for the Primary FRCA Aug 27 2020 Designed for candidates sitting the primary FRCA examination, this book brings together exam questions from recent years and structures them into six practice papers. The format of 90 questions per paper echoes the exam itself. Following each paper a scoring chart and detailed explanations of

answers are provided. The questions cover physiology, pharmacology, physics, clinical measurement and statistics as they appear in the primary FRCA. There are questions on all recently added exam topics, and those that now carry stronger emphasis and more weight such as resuscitation, sepsis and trauma. The latest drugs, equipment, monitoring techniques and safety procedures are referenced. Trainees will find this an invaluable tool for exam preparation, whether sitting the FRCA in the UK, through the London College external examiners in many Asian and African countries, or similar exams for anaesthetists in Australasia and North America.

Find Out Anything From Anyone, Anytime Jan 20 2020
The secret to finding out anything you want to know is amazingly simple: Ask good questions. Most people trip through life asking bad questions—of teachers, friends, coworkers, clients, prospects, experts, and suspects. Even people trained in questioning, such as journalists and lawyers, commonly ask questions that get partial or misleading answers. People in any profession will immediately benefit by developing the skill and art of good questioning. Find Out Anything From Anyone, Anytime will give you the power to: Identify and practice good questioning techniques Recognize types of questions to avoid Know the questions required when hearing unconfirmed reports or gossip Practice good listening techniques and exploit all leads Determine when and how

to control the conversation Gain real expertise fast Within professional interrogation circles, author James Pyle is known as a strategic debriefer—meaning there is no one around him more skilled at asking questions and getting answers. He has been training other interrogators in questioning techniques since 1989.

MultiMedia Modeling Dec 31 2020 The two-volume set LNCS 8325 and 8326 constitutes the thoroughly refereed proceedings of the 20th Anniversary International Conference on Multimedia Modeling, MMM 2014, held in Dublin, Ireland, in January 2014. The 46 revised regular papers, 11 short papers, and 9 demonstration papers were carefully reviewed and selected from 176 submissions. 28 special session papers and 6 papers from Video Browser Showdown workshop are also included in the proceedings. The papers included in these two volumes cover a diverse range of topics including: applications of multimedia modelling, interactive retrieval, image and video collections, 3D and augmented reality, temporal analysis of multimedia content, compression and streaming. Special session papers cover the following topics: Mediadrom: artful post-TV scenarios, MM analysis for surveillance video and security applications, 3D multimedia computing and modeling, social geo-media analytics and retrieval, multimedia hyperlinking and retrieval.

War Surgery 1914-18 Mar 02 2021 "A fascinating study of war surgery in World War I, where huge medical

developments were made and the foundations of modern war surgery were laid World War I resulted in an enormous number of casualties who had sustained filthy contaminated wounds from high explosive shellfire, bomb and mortar blast, and from rifle and machine gun bullets. Such wounds were frequently multiple and severe, and almost invariably became infected. Surgical experience from previous conflicts was of little value, and it became quickly apparent that early surgical intervention with radical removal of all dead and revitalised tissue was absolutely vital to help reduce the chances of infections, especially the lethal gas gangrene, from developing. War Surgery 1914-18 explains how medical services responded to deal with the casualties. It discusses the evacuation pathway, and explains how facilities, particularly casualty clearing stations, evolved to cope with major, multiple wounds to help reduce mortality. There are chapters dealing with the advances made in anaesthesia, resuscitation and blood transfusion, the pathology and microbiology of wounding and diagnostic radiology. There are also chapters dealing with the development of orthopaedic surgery, both on the Western Front and in the United Kingdom, the treatment of abdominal wounds, chest wounds, wounds of the skull and brain, and the development of plastic and reconstructive surgery for those with terribly mutilating facial wounds. War Surgery 1914-18 contributes greatly to our understanding of the

surgery of warfare. Surgeons working in Casualty Clearing Stations during the years 1914-1918 laid the foundations for modern war surgery as practised today in Afghanistan and elsewhere."--Publisher.

The Complete Reference Manual For CMAT 2021 May 16 2022 Common Management Admission Test (CMAT) is a nation level entrance examination for the entry into management programmes. The test is conducted by National Test Agency (NTA). It is a three hour computer based online test which is conducted in a single session to evaluate the candidate's ability across its segments. Its scores are accepted by all Approved Institutions, University Departments, Constituent Colleges, and Affiliated Colleges.
