IBM System Storage DS5000 Series Implementation and Best Practices Guide May 21 2022 This IBM® Redbooks® publication represents a compilation of best practices for deploying and configuring the IBM System Storage® DS5000 Series family of products. This book is intended

for IBM technical professionals, Business Partners, and customers responsible for the planning, deployment, and maintenance of the IBM System Storage DS5000 Series family of products. Then, we offer our guidelines, hints, and tips for the physical installation, cabling, and zoning, using the Storage Manager setup tasks. Next, we provide a quick guide to help you install and configure the DS5000 using best practices. After that, we turn our attention to the performance and tuning of various components and features, including numerous guidelines. We look at performance implications for various application products such as IBM DB2®, Oracle, IBM Tivoli® Storage Manager, Microsoft SQL server, and in particular, Microsoft Exchange server. Then we review the various tools available to simulate workloads and to measure, collect, and analyze performance data. We also consider the IBM AIX® environment, including IBM High Availability Cluster Multiprocessing (HACMP™) and IBM General Parallel File System (GPFS™). This edition of the book also includes guidelines for managing and using the DS5000 with the IBM System Storage SAN Volume Controller (SVC) and IBM

increasingly valuable data. But
storing this data can be costly,
and extracting value from the
data is becoming more difficult.
IT organizations have limited
resources but must stay
responsive to dynamic
environments and act quickly
to consolidate, simplify, and
optimize their IT
infrastructures. The IBM®
Storwize® V5000 Gen2 system
provides a smarter solution
that is affordable, easy to use,
and self-optimizing, which
enables organizations to
overcome these storage
challenges. The Storwize
V5000 Gen2 delivers efficient,
entry-level configurations that
are designed to meet the needs
of small and midsize
businesses. Designed to
provide organizations with the
ability to consolidate and share
data at an affordable price, the
Storwize V5000 Gen2 offers
advanced software capabilities
that are found in more
expensive systems. This IBM
Redbooks® publication is
intended for pre-sales and post-
sales technical support
professionals and storage
administrators. It applies to the
Storwize V5030, V5020, and
