Original. BOOK 3 IN THE BLACK TIDE RISING SERIES FROM THE NEW YORK TIMES BEST-SELLING AUTHOR. Sequel to To Sail a Darkling Sea and Under a Graveyard Sky. With the world consumed by a devastating plague that drives humans violently insane, what was once a band of desperate survivors bobbing on a dark Atlantic ocean has now become Wolf Squadron, the only hope for the salvation of the human race. Banding together with what remains of the U.S. Navy, Wolf Squadron, and its leader Steve Smith, not only plans to survive<sup>3</sup>/<sub>4</sub>he plans to retake the mainland from the infected, starting with

North America. The next step: produce a vaccine. But for do that, Wolf Squadron forces led by Smith's terrifyingly precocious daughters Sophia and Faith must venture into a sea of the infected to obtain and secure the needed materials. And if some of the rescued survivors turn out to be more than they seem, Smith just might be able to pull off his plan. Once more, exhausted and redlining Wolf Squadron forces must throw themselves into battle, scouring the islands of the Atlantic for civilization's last hope. The essays in this collection are concerned with the philosophical problems that arise in connection with the understanding and evaluation of literature - such problems as the relationship between the work and the author (authorial intention), between the work and the world (reference and truth), the definition of a literary work, and the nature of literary theory itself. Professor Olsen attacks many of the orthodoxies of modern literary theory, in particular the enterprise to build a comprehensive systematic literary theory. His own work is informed by a consistent perspective: the assumption that literature is a social institution governed by conventions, and that answers to problems of interpretation and appreciation can be found only through an analysis of these conventions. This is an important book for scholars and students of literary theory and philosophy, especially for those who see an ever-increasing cross-fertilization between the two disciplines. BLACK+DECKER Complete Guide to Bathrooms brings you design advice, how-to instructions, and all the facts you need to achieve the bathroom of your dreams. This sixth edition of the perennial bestseller from the BLACK+DECKER Complete Guide series covers all the bases when

it comes to bathroom remodeling. From freshening up decor to a down-to-the-studs remodel, all of the information you need to design the job and do the work yourself is right here. This new edition also features smart home projects, from advanced toilets and add-on bidets to freestanding tubs, dimmable lights, and touchless faucets. Through step-by-step photography and instructions, you'll see how to update lighting, ventilation, flooring, surfaces, cabinetry, toilets, bathtubs, and accessories. This comprehensive buyer's guide takes you through one of the most important steps in any remodeling project, and a complete and up-to-the minute section on bathroom design provides education and inspiration. It also includes information explaining how to remodel or re-imagine your bathroom to better meet the needs of aging in place, with projects that conform to Universal Design Standards: You'll see a start-to-finish demonstration on how to replace a shower or tub with a curbless shower stall. To maximize access, a wall-mounted sink is hung and hooked up—and you see every step. Replace a traditional bathroom sink faucet with a hands-free model so you can turn on the water even if you can't reach all the way to the faucet handle. Add a frameless glass shower surround and learn how to install and plumb a vanity cabinet and sink basin. The list of projects is long and the information, vetted by the experts at BLACK+DECKER, is complete and current.

Products Liability Law, Second Edition, by prolific tort scholar Mark Geistfeld, represents the “next generation” of casebooks on products liability. Earlier texts focused on the relative merits of strict liability and negligence, embodied in the apparently competing liability frameworks of the consumer expectations test in the Restatement (Second) of Torts and the risk-utility test in the Restatement (Third) of Torts. The majority of courts, however, have incorporated the risk-utility test into the framework of consumer expectations. By providing balanced coverage of both consumer expectations and the risk-utility test, the casebook keeps pace with ongoing developments in the

case law and moves beyond the battles that largely defined products liability in the twentieth century. In addition to teaching students how liability rules protect consumer expectations via comprehensive application of the risk-utility test, this innovative casebook underscores the importance of doctrinal history, the psychology of evaluating product risks, and the role of products liability in the modern regulatory state. Students will learn how courts have applied established doctrines to novel problems ranging from the relevance of scientific evidence in toxic-tort cases to the distribution of defective products on the Amazon online marketplace. To further illustrate this dynamic, the casebook has twenty-nine problems with associated analysis involving the liability issues likely to be raised by the emerging technology of autonomous vehicles. Finally, the casebook reinforces students' knowledge of fundamental tort principles while developing specialized expertise and a deeper understanding of the torts process. New to the Second Edition: A dozen new main cases updating older case law, providing coverage of new issues not addressed in the First Edition, and/or improving upon the analysis provided by the associated case in the First Edition Retention of the majority of main cases from the first edition, with revisions to the ensuing notes incorporating relevant case law developments A reorganized and updated chapter covering the controversy over the relative merits of the consumer expectations and risk-utility tests Comprehensive discussion of the tort version of the implied warranty—the genesis of the consumer expectations test—and its relation to product malfunctions and the risk-utility test A new chapter addressing the existence of the tort duty and identifying the difference between patent dangers and patent defects Reorganization of the chapter on factual causation, emphasizing the continuity of evidentiary problems running across different types of cases, ranging from the heeding presumption in warning cases, to market-share liability, to proof of both general and specific causation in toxic-tort cases

Professors and students will benefit from: Classroom-tested materials taught for over 20 years by an award-winning professor Interesting cases that illustrate both the traditional and contemporary character of products liability litigation; cases are followed by extensive notes Each chapter addressing doctrinal issues concludes with problems on autonomous vehicles. The full set of 29 problems provides students with the necessary background for understanding liability issues posed by this emerging technology. Each problem is followed by the author's analysis of the associated issues, cross-referenced to the relevant casebook material. This is a manual for building basic and customized decks.
