In this fast-paced adventure story set in the Canadian arctic, fifteen-year-old Inuit hunter Nick Thrasher comes face-to-face with a fearsome creature on a routine caribou hunt gone wrong. They're left stranded without supplies—and then the grolar bear appears. "We've incorporated an enormous amount of feedback from over 700 reviewers, focus group, and symposium participants. The list of changes and improvements on the next few pages is testament to the many hours that reviewers spent thinking about and analyzing our earlier editions, helping us to make Financial Accounting the best book of its kind. Text was reduced in many places to simplify and clarify discussion. Feature stories, real-world examples, and ratio analyses in each chapter were updated to the most recent year. Financial statement effects were highlighted in the margin of all journal entries. Chapter Framework illustrations at the end of each chapter were modified to include Analysis in most chapters. Five self-study multiple-choice questions were added to the Chapter Framework illustration in each chapter. Five additional questions are available online"-- "Yanomamö culture, in its major focus, reverses the meanings of "good" and "desirable" as phrased in the ideal postulates of the Judaic-Christian tradition. A high capacity of rage, a quick flash point, and a willingness to use violence to obtain one's ends are considered desirable traits. Much of the behavior of the Yanomamö can be described as brutal, cruel, treacherous, in the value-laden terms of our own vocabulary. The Yanomamö themselves, however, as Napoleon Chagnon came to intimately know them in the year and a half he lived with them, do not all appear to be mean and treacherous. As individuals, they seem to be people playing their own cultural game, with internal feelings that at times may be quite divergent from the demands placed upon them by their culture. This case study furnishes valuable data for phrasing questions about the relationship between the individual and his culture."-- Foreword. From the #1 bestselling author of Heat, Travel Team and Million-Dollar Throw comes a feel-good basketball tale reminiscent of The Blind Side. Forced to live on his own after his mom dies and her boyfriend abandons him, 12-year-old Jayson does whatever it takes to get by. He will do anything to avoid the foster care system. He manages to get away with his deception until the day he gets caught stealing a new pair of basketball sneakers. Game over. Within a day a social worker places him with a family from the other side of town, the Lawtons. New home, new school, new teammates. Jayson, at first, is combative, testing the Lawtons' patience at every turn. He wants out, yet the Lawtons refuse to take the bait. But not everyone in Jayson's new life is so ready to trust him. It's on Jayson to believe that he deserves a better life than the one he once had. The ultimate prize if he can? A trip to play in the state finals at Cameron Indoor Stadium—home to the Duke Blue Devils and launching pad to his dream of playing bigtime college ball. Getting there will be a journey that reaches far beyond the basketball court. "Eager fans will find this a slam-dunk. A must-purchase."--Booklist "Lupica's announcer-like delivery will have you breathless, on the edge of your seat, cheering."--Florida Times-Union "Principles of Economics is designed for a two-semester principles of economics sequence."--Page 6. Social media is supposed to bring us together - but it is tearing us apart. 'A blisteringly good, urgent, essential read' Zadie Smith The evidence suggests that social media is making us sadder, angrier, less empathetic, more fearful, more isolated and more tribal. Jaron Lanier is the world-famous Silicon Valley scientist-pioneer who first alerted us to the dangers of social media. In this witty and urgent manifesto he explains why its toxic effects are at the heart of its design, and, in ten simple arguments, why liberating yourself from its hold will transform your life and the world for the better. WITH A NEW AFTERWORD BY THE AUTHOR 'Informed, heartfelt and often entertaining ... a timely reminder that even if we can't bring ourselves to leave social media altogether, we should always think critically about how it works' Sunday Times 'Indispensable. Everyone who wants to understand the digital world, its pitfalls and possibilities should read this book - now' Matthew d'Ancona, author of Post-Truth "Fundamental Managerial Accounting Concepts" 4e by Edmonds/Edmonds/Tsay/Olds focuses on concepts that are isolated and introduced in a logical sequence. The authors intentionally limit the scope of the material to help students build a solid foundation of the most important concepts in managerial accounting. "Fundamental Managerial Accounting Concepts" 4e is organized in a distinctive way, particularly in the first six chapters. The objective is to establish a coherent, integrative framework that enables students to build knowledge in stepwise fashion. The authors' goal is for students to understand the underlying principles of accounting, not just memorize content. Islamic Gunpowder Empires provides readers with a

history of Islamic civilization in the early modern world through a comparative examination of Islam's three greatest empires: the Ottomans (centered in what is now Turkey), the Safavids (in modern Iran), and the Mughals (ruling the Indian subcontinent). Author Douglas Streusand explains the origins of the three empires; compares the ideological, institutional, military, and economic contributors to their success; and analyzes the causes of their rise, expansion, and ultimate transformation and decline. Streusand depicts the three empires as a part of an integrated international system extending from the Atlantic to the Straits of Malacca, emphasizing both the connections and the conflicts within that system. He presents the empires as complex polities in which Islam is one political and cultural component among many. The treatment of the Ottoman, Safavid, and Mughal empires incorporates contemporary scholarship, dispels common misconceptions, and provides an excellent platform for further study. The earliest traces of proto-human technology emerged over 2.5 million years ago on the African continent. Called the Oldowan after the famous site of Olduvai Gorge in Tanzania, these technologies herald a major evolutionary shift in the human lineage. The Oldowan: Case Studies into the Earliest Stone Age provides a critical look at early archaeological sites and their evidence. This volume also shows how a range of probing, multidisciplinary, experimental investigations - including experimental tool-making, comparative studies of ape technologies, biomechanical analysis, and PET studies of brain activity - help us evaluate this tantalizing prehistoric evidence and appreciate its relevance to human evolution.
