This book presents a framework for mobile information systems, focusing on quality of service and adaptability at all architectural levels. These levels range from adaptive applications to e-services, middleware, and infrastructural elements, as developed in the "Multichannel Adaptive Information Systems" (MAIS) project. The design models, methods, and tools developed in the project allow the realization of adaptive mobile information systems in a variety of different architectures. Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs This book brings together a cutting edge international team of contributors to critically review the current knowledge regarding the effectiveness of training interventions designed to improve cognitive functions in different target populations. There is substantial evidence that cognitive and physical training can improve cognitive performance, but these benefits seem to vary as a function of the type and the intensity of interventions and the way training-induced gains are measured and analyzed. This book further fulfills the need for clarification of the mechanisms underlying cognitive and neural changes occurring after training. This book offers a comprehensive overview of empirical findings and methodological approaches of cognitive training research in different cognitive domains (memory, executive functions, etc.), types of training (working memory training, video game training, physical training, etc.), age groups (from children to young and older adults), target populations (children with developmental disorders, aging workers, MCI patients etc.), settings (laboratory-based studies, applied studies in clinical and educational settings), and methodological approaches (behavioral studies, neuroscientific studies). Chapters feature theoretical models that describe the mechanisms underlying training-induced cognitive and neural changes. Cognitive Training: An Overview of Features and Applications will be of interest to researchers, practitioners, students, and professors in the fields of psychology and neuroscience. Student Solutions Manual to accompany Fundamentals of Physics 9th Edition by Halliday Rose is a princess, a Cinder, and half-human. She is the last one born of her kind, and on her twenty-first birthday, she must enter the woods and travel to find her Prince, as her sisters did before her. ". . . And we will all dance at the Grand Ball," her sisters would always say. But the Human servants are keeping a secret that could prevent the Cinders from reaching their Happily Ever After....Hidden in Rose's dreams and vision are the answers of the past between Cinders and Humans, and she is quickly running out of time trying to solve their hidden messages. She knows the answer lies in her first clue--identifying an animal she has never seen before--that persistent vision of a furry white animal, holding a gold metal object and exclaiming, "Oh dear! Oh dear! I shall be too late!" Sustaining a healthy and productive work environment for employees with health issues and work disabilities or those returning to work after sick leave may present a challenge to employers. This publication offers unique insights into occupational health and rehabilitation, covering international perspectives as well as a variety of health-related disciplines. Policymakers, employers, employees, researchers and students will find new approaches to questions of how to maintain work ability and health in the workplace: Which motives influence strategic planning in the healthcare and employment sector? How can the return of employees after sick leave be facilitated? How best to implement innovations while keeping the workplace safe and healthy? And how does occupational rehabilitation benefit from evidence-based knowledge transfer? Contents• Work Ability and Work Disability• Return to Work• Work and Health• Work and Innovation Superstar singer, bestselling cookbook author, and cooking show host Patti LaBelle shares her favorite dessert recipes and kitchen memories. Her New York Times bestseller LaBelle Cuisine: Recipes to Sing About, which sold more than 300,000 copies, established her as a cooking star. Today, Patti's baking skills have the country buzzing. In Fall 2015, a fan's YouTube review of her sweet potato pie became a viral sensation, with over 20 million views. In just one weekend, her pies were completely sold out at Wal-Mart stores across the country. Now, for the first time, fans of Patti's pie can make their own, as well as other amazing sweets! Filled with her favorite recipes for pies, cakes, cookies, and puddings, as well as a chapter on diabetic-friendly recipes, moving personal stories from her career and life, this is the most personal cookbook LaBelle has written. Every fan of soul and sweets will want to own it. This textbook offers a comprehensive introduction to the control of marine vehicles, from fundamental to advanced concepts, including robust control techniques for handling model uncertainty, environmental disturbances, and actuator limitations. Starting with an introductory chapter that extensively reviews automatic control and dynamic modeling techniques for ocean vehicles, the first part of the book presents in-depth information on the analysis and control of linear time invariant systems. The concepts discussed are developed progressively,

providing a basis for understanding more complex techniques and stimulating readers' intuition. In addition, selected examples illustrating the main concepts, the corresponding MATLAB® code, and problems are included in each chapter. In turn, the second part of the book offers comprehensive coverage on the stability and control of nonlinear systems. Following the same intuitive approach, it guides readers from the fundamentals to more advanced techniques, which culminate in integrator backstepping, adaptive and sliding mode control. Leveraging the author's considerable teaching and research experience, the book offers a good balance of theory and stimulating questions. Not only does it provide a valuable resource for undergraduate and graduate students; it will also benefit practitioners who want to review the foundational concepts underpinning some of the latest advanced marine vehicle control techniques, for use in their own applications.

Family entertainment in a box: Full of easy offline activities that will encourage connection and fun for all ages, this attention-grabbing and affordable box of prompts makes an excellent gift. It's the gift of inspiration, with prompts and talking points that will get loved ones laughing, connecting, and playing together. Includes 50 faux matchsticks with printed prompts. Fans of Spark Creativity or Spark Happiness will love this gift. This gift is ideal for: • Parents • Family gatherings • Childcare workers • Gift for Mother's Day or Father's Day This beautiful Notebook For Women and Men To Write In and inspirational gift idea for Oral Cancer Awareness patients and survivors to write down their Oral Cancer Journey or to keep track of doctor's appointments, treatment. Writing is a great stress reliever, as well as a way to cope with your thoughts, feelings, and fears about Oral Cancer. It will also give survivors a chance to look back on their journey and recall their fight. This journal will give patients motivation to keep going, never give up and never lose hope or faith. This blank lined notebook is a perfect gift for that special person battling Oral Cancer. Offers a photographic retrospective of the Major League Baseball star and five-time World Series champion who retired after the 2014 season.

Bioarchaeology is the analysis of human remains within an interpretative framework that includes contextual information. This comprehensive and much-needed manual provides both a starting point and a reference for archaeologists, bioarchaeologists and others working in this integrative field. The authors cover a range of bioarchaeological methods and theory including: Ethical issues involved in dealing with human remains Theoretical approaches in bioarchaeology Techniques in taphonomy and bone analysis Lab and forensic techniques for skeletal analysis Best practices for excavation techniques Special applications in bioarchaeology With case studies from bioarchaeological research, the authors integrate theoretical and methodological discussion with a wide range of field studies from different geographic areas, time periods, and data types, to demonstrate the full scope of this important field of study. "The tragedies of violence have seldom been told with such a compelling use of the biocultural perspective. Building on a solid methodological foundation, we are served theoretical perspectives that are unusually rich and nuanced in their application to the case studies. This collection of case studies is a valuable contribution to the bioarchaeological literature."-- George Armelagos, Emory University Human violence is an inescapable aspect of our society and culture. As the archaeological record clearly shows, this has always been true. What is its origin? What role does it play in shaping our behavior? How do ritual acts and cultural sanctions make violence acceptable? These and other questions are addressed by the contributors to *The Bioarchaeology of Violence*. Organized thematically, the volume opens by laying the groundwork for new theoretical approaches that move beyond interpretation; it then examines case studies from small-scale conflict to warfare to ritualized violence. Experts on a wide range of ancient societies highlight the meaning and motivation of past uses of violence, revealing how violence often plays an important role in maintaining and suppressing the challenges to the status quo, and how it is frequently a performance meant to be witnessed by others. The interesting and nuanced insights offered in this volume explore both the costs and the benefits of violence throughout human prehistory. With the inclusion of applications of singular value decomposition (SVD) and principal component analysis (PCA) to image compression and data analysis, this edition provides a strong foundation of linear algebra needed for a higher study in signal processing. The use of MATLAB in the study of linear algebra for a variety of computational purposes and the programmes provided in this text are the most attractive features of this book which strikingly distinguishes it from the existing linear algebra books needed as pre-requisites for the study of engineering subjects. This book is highly suitable for undergraduate as well as postgraduate students of mathematics, statistics, and all engineering disciplines. The book will also be useful to Ph.D. students for relevant mathematical resources.

NEW TO THIS EDITION The Third Edition of this book includes: • Simultaneous diagonalization of two diagonalizable matrices • Comprehensive exposition of SVD with applications in shear analysis in engineering • Polar Decomposition of a matrix • Numerical experimentation with a colour and a black-and-white image compression using MATLAB • PCA methods of data analysis and image compression with a list of MATLAB codes

Volume II of *The Official History of the UK Strategic Nuclear Deterrent* provides an authoritative and in-depth examination of the British government's strategic nuclear policy from 1964 to 1970. Written with full access to the UK documentary record, Volume II examines the controversies that developed over nuclear policy following the arrival in office of a Labour government led by Harold Wilson in October 1964 that openly questioned the independence of the deterrent. Having decided to preserve the Polaris programme, Labour ministers were nevertheless committed not to develop another generation of nuclear weapons beyond those in the pipeline, placing major doubts over the long-term future of the nuclear programme and collaboration with the United States. Defence planners also became increasingly concerned that the deployment of Soviet anti-ballistic missile (ABM) defences around Moscow threatened to undermine the ability of Polaris to fulfil its role as a national strategic nuclear deterrent. During 1967, under heavy pressures to control defence spending, a protracted debate was conducted within Whitehall over the future of Polaris and how to respond to the evolving ABM challenge. The volume concludes with Labour's defeat at the general election of June 1970, by which time the Royal Navy had assumed the nuclear deterrent role from the RAF, and plans had already been formulated for a UK project to improve Polaris which could both ensure its continuing credibility and rejuvenate the Anglo-American nuclear relationship. This book will be of much interest to students of British politics, Cold War history, nuclear proliferation and international relations.

Taryn Clark thought she'd outgrown the need to find her birth mother. She thought that a successful career and a comfortable life in the city were enough to be happy. Did she really need to know about the woman who had given her away? Adopted at birth, her first few years were happy. It hadn't mattered that she didn't know her heritage; she had parents who loved her and wanted her. But divorce, and then death, ripped their tiny family apart, and at the tender age of six, she entered the foster care system. Over the next dozen years, she shuffled from home to home. Finding her roots seemed an impossible dream. But dreams are resilient. An unexpected discovery awakens old yearnings of belonging to a family, of being part of something bigger than herself. Finding the brief, ambiguous note from her birth mother is enough to unfurl the ribbons of hope still binding her heart. Her quest takes her to Lancaster County, Pennsylvania and the heart of the Plain community. Aided by her unique eye color, a healthy dose

of luck, and the private investigator she hires, Taryn finds her birth family easily enough, but finding the truth is another matter. In all her musings, she never imagined a scenario where her mother might be Amish. She never imagined that the fabric of her life might be a patchwork of faith and fear, stitched together with a dark family secret. Taryn is determined to trace her roots, even if it means digging in the mud to do so. Now she's caught in the quicksand of a shocking discovery and the consequences of choices made, almost forty years ago. She'll risk everything to uncover the truth and to claim the family--and the roots--she so desperately craves. The latest edition of this bestselling game development reference offers proven tips and techniques for the real-time rendering of special effects and visualization data that are useful for beginners and seasoned game and graphics programmers alike. Exploring recent developments in the rapidly evolving field of real-time rendering, GPU Pro 7: Advanced Dark. Powerful. Dangerous James Maxwell is one of the billionaire elites who rules Las Vegas City with an iron fist. This is his story. My name is Mia Donovan, a twenty-two-year-old, small-town girl who has signed a contract with the billionaire in exchange for my brother's freedom and protection. My world has changed—both for better and worse. James Maxwell is the man behind this. I'm fascinated, mesmerized by this charm that binds me to him, entrapping me in his embrace. I've fallen in love with him, which hurts because it is unrequited. What's worse, my life is at risk because I'm too close to the powerful man who has too many enemies. And so our story continues... Entwined with You contains Chained to You: Volumes 3 & 4 of the Chained to You serial. Vegas Billionaires Series: 1 - Chained to You [James and Mia Book 1] 2 - Entwined with You [James and Mia Book 2] 3 - Loved by You [James and Mia Book 3] 4 - Chained by Love [William and Savannah] Keywords: romance ebook, sexy romance, steamy contemporary romance, steamy romance, steamy billionaire romance, sexy billionaire romance 4LTR Press solutions give students the option to choose the format that best suits their learning preferences. This option is perfect for those students who focus on the textbook as their main course resource. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. A 'how to' for engaging in effective spiritual warfare With the award-winning book Agile Software Development: Principles, Patterns, and Practices, Robert C. Martin helped bring Agile principles to tens of thousands of Java and C++ programmers. Now .NET programmers have a definitive guide to agile methods with this completely updated volume from Robert C. Martin and Micah Martin, Agile Principles, Patterns, and Practices in C#. This book presents a series of case studies illustrating the fundamentals of Agile development and Agile design, and moves quickly from UML models to real C# code. The introductory chapters lay out the basics of the agile movement, while the later chapters show proven techniques in action. The book includes many source code examples that are also available for download from the authors' Web site. Readers will come away from this book understanding Agile principles, and the fourteen practices of Extreme Programming Spiking, splitting, velocity, and planning iterations and releases Test-driven development, test-first design, and acceptance testing Refactoring with unit testing Pair programming Agile design and design smells The five types of UML diagrams and how to use them effectively Object-oriented package design and design patterns How to put all of it together for a real-world project Whether you are a C# programmer or a Visual Basic or Java programmer learning C#, a software development manager, or a business analyst, Agile Principles, Patterns, and Practices in C# is the first book you should read to understand agile software and how it applies to programming in the .NET Framework. A new and truly awesome collection of comic fantasy masterpieces! It isn't often you find a posse of Greek goddesses putting down insurrection among unruly classical mortals, stranded aliens escaping earth in a church converted into a rocket, or a light-fingered time-traveller attempting to steal the universe - but here they all are, in another selection of bizarre comic fantasies. This book offers exchanges between the fields of paleontology and zoology as patterns of biodiversity have long attracted the attention of both biologists and paleontologists. It covers the development of isolated island faunas, paleogeography and zoomorphology. The book shows that patterns are not always what they seem if looked at without a spatial or temporal reference. Chiura Obata was one of more than 100,000 Japanese Americans forcefully relocated from their homes, work, and communities to the stark barracks of desert internment camps during World War II. As an artist faithfully recording the world around him, Obata's work from this period gives us a view into the camps that is at once honest and strikingly lyrical. Topaz Moon brings together more than 100 paintings and sketches from Obata's internment period, from the stables at Tanforan, California, to the barracks in Topaz, Utah. Edited by his granddaughter Kimi Kodani Hill, these images are accompanied by a text that draws heavily upon the letters of Obata and his wife, Haruko, family documents, and interviews with family and friends. Sand dunes are common aeolian landforms and are found on over 40% of the Earth's land surface. Distribution and characteristics of sand dunes in the northern hemisphere are the major focus. "Would you believe if I told you that you have been robbed by a man who died two-and-a-half years ago?" "Could sending an SMS have been the biggest mistake of your life?" "He just answered a phone call and lost Rs 82 lakhs from his account." "When a 14-year-old boy turned out to be the biggest headache for the Indian Railways." "How did a 25-year-old earn Rs 3700 crores just through Facebook likes?" "Can your electricity bill help me make Rs 100 crores?" "Can playing a mobile game lead to a kidnapping?" "You may leave your home unlocked but don't leave your mobile without a password!" "When the Fitbit band of a dead girl became crucial evidence to put the criminals behind bars." "Would you like to know the secrets your home WiFi can reveal?" "When a WhatsApp message was the reason for his living or dying." "The cost of his life was only 3 Bitcoins." "Had she not lost her phone that day, she would have died." A renowned cyber cop Prof. Triveni Singh and a cyber expert and a very creative storyteller, Amit Dubey have used their experiences from the world of cyber crime to put together this remarkable compilation of short stories. Weaving fiction into facts brilliantly, each story illustrates the inherent presence of cyber crime in our existence nowadays. Narrated mostly in the first person, with a few exceptions, the incidents related are based on actual cyber crimes that they have tackled over the course of their career. The layman will be amazed to learn, through this collection of stories, just how prevalent cyber crime is in our time. ABOUT THE AUTHORS PROF. TRIVENI SINGH IPS is an officer of Indian Police Service and currently posted in UP. He has been awarded Police Medal for Gallantry (PMG) by the Hon'ble President of India. He is more popular as a Cyber Crime Investigation Specialist and is the first CyberCop of India. He has dealt with almost every type of cyber criminals and investigated more than 200 types of cybercrimes followed by arrests of thousands of criminals using an intensive technical investigation process. He is known for his expertise in handling financial and Banking frauds. He is also the resource person for various central investigation agencies and judicial bodies. Due to his deep interest in this area, He did his PhD in Cyber Crime Investigation. He has been awarded on various national and international platforms for his contributions towards controlling cybercrimes. He has also been given honorary professorship by the Amity University. He lives in Noida with his wife Kiran and his teenager sons, Harsh and Kartik, studying in Delhi University. AMIT DUBEY is a renowned Crime Investigator, who helps various

police departments and investigation agencies in India to solve criminal cases. An IIT alumnus and Software Engineer by profession, he has worked with Samsung, ST-Ericsson, Qualcomm and Tech Mahindra. A regular speaker at international conferences, on cyber crimes and ethical hacking, CNN-IBN had featured him as a National Security Expert and covered some of his cases in the documentary, Cyber Warfare in India. His first book, 'Return of The Trojan Horse, Tales of Criminal Investigation' is a first of its kind book on true Cyber Crime stories, It's been picked by a popular production house to make a web series on it. An avid blogger, Amit also writes poetry in Hindi and has acted in TV serials like Yahan Ke ham Sikandar and Khamosh sa Afsana. He also runs a radio show, 'Hidden Files' on RedFM where he talks about real-life and interesting criminal investigation stories. The show reaches more than 2 Crore listeners. He is also an avid YouTuber and runs a satirical show with the name of 'Dau Bakaul' in bundelkhandi language. He lives in Noida, with his wife Kumud, a classmate from IIT Kharagpur, and his five-year-old daughter, Advika. You can contact him on his twitter handle (@CyberDubey) and facebook page (<https://www.facebook.com/authoramitdubey>) .
