[Twenty-fifth Report](#) Aug 21 2022 This Royal Commission report on protection of the marine environment focuses on the impact of marine fishing in the seas around the UK, both on fish populations and the wider ecosystem. It consider a range of issues including the role of the fishing industry and its growth over the last 50 years; the legal framework for the marine environment and fisheries, at the national, European and international levels; the impact of fishing and the legacy of overfishing; aquaculture fisheries; marine protected areas; improved fisheries management; and a system of marine spatial planning. The report concludes that, as a society, we give much lower priority to protecting our seas compared with the land, and over-fishing is a global problem which has led to the collapse of fisheries in many areas. This situation requires significant urgent change which recognises the need for sustainable fisheries management and avoids the degradation of our seas, placing it within the context of wider management of human activities in the marine environment. Recommendations made include: the introduction of a Marine Act to establish a statutory framework with strategic objectives for marine environmental protection; a move away from a presumption in favour of fishing rights to a precautionary approach which requires demonstration that fishing activity is environmentally sustainable; establishing a network of marine protected areas within the UK over the next five years, which would lead to 30 per cent of the UK's exclusive economic zone being closed to commercial fishing; and a change in the emphasis of research away from management of fish populations towards a wider focus on the marine environment.

[Green Politics and Civic Republicanism](#) Aug 09 2021 The political and environmental crises of the twenty-first century require new approaches to the way we think and act politically. This book explores the potential for engagement between green and civic republican thought as part of these new approaches. The green and civic republican traditions have important historical and conceptual connections. They share an emphasis on the idea of interdependence, the common good as distinct from individual and sectional interests, and a corresponding critique of freedom as non-interference and of arguments for minimising the state. Both see the human project as marked by vulnerability, and the achievement of stability and sustainability as a critical though fragile goal, in whose realisation the state must play a significant role. Both focus accordingly on constitutional law, active citizenship and participatory democracy, and adopt a critical stance towards economic inequality and capitalist economic growth. The chapters address these in a variety of ways - from examining fundamental concepts: freedom, rights and political judgement, through analysing the potential grounds for connections between green and republican political theory – vulnerability, limits, sustainability and civic virtue – to outlining the kind of agonistic republican politics and green political economy that these imply. The chapters in this book were originally published as a special issue of Critical Review of Social and Political Philosophy.

Tourist Health, Safety and Wellbeing in the New Normal Jan 22 2020 The COVID-19 pandemic has changed the face of international and domestic tourism and sharply focused attention on the importance of tourist health, safety and wellbeing like never before. This book offers a unique perspective on the challenges facing the world's largest service industry to protect and care for customers in a rapidly evolving environment where borders have closed, social distancing rules apply and personal hygiene has become a key focus in everyday life. Yet tourism is a very resilient industry and history shows there is always an immediate surge toward recovery after a crisis has passed. Humans want to travel and see the world. While we appreciate that the pandemic is far from over, already there are reports of pent-up demand for travel as restrictions ease at some destinations and borders begin to open. As we move hopefully toward the recovery phase and people begin to move around for business and pleasure, this book presents the reader with key information and insights in both traditional and emerging areas of tourist health, safety and wellbeing, recognising that the world is now shaped by this pandemic, bringing change, potentially enduring benefits and lasting legacies.

[Management Accounting in Supply Chains](#) Sep 10 2021 Companies more and more compete as integrated supply chains rather than as individual firms. Success of the entire supply chain (SC) determines the economic well-being of the individual company. With management attention shifting to supply chains, the role of management accounting (MAC) naturally must extend to the cross-company layer as well. MAC can make a significant contribution to SC success, but is faced with a multitude of problems and challenges when trying to do so. Students both in supply chain management (SCM) or management accounting (MAC) respectively, are typically not familiarized with these issues. There is still a clear gap in higher education teaching when it comes to management accounting in a cross-company setting. This textbook wants to fill the gap. It targets students who are already familiar with the fundamentals of accounting and now want to extend their expertise in the field of cross-company (or network) management accounting – with supply chains being the typical case in point. Practitioners might draw valuable insights from the text as well. This textbook has been developed for university courses conducted in English language, especially in Germany, Austria and Switzerland. Toward a Better Understanding of Rule-Breaking Market Behavior Oct 11 2021 This book analyzes how companies and employees can endogenously, i.e., without hiring external experts or consultants, achieve competitive advantages by deviating from behavioral standards in a productive way. The study explores eight transformative behavioral innovations that shaped the development of sports and, by analogy, uses the findings to advance solutions for prevalent problems in business. By developing triggers to creativity and applying mechanisms on how to overcome innovation resistance, the book gives concrete advice on how to manage the difficult quest of human transformation beyond the imperative of technological innovation.

The Ethics of Cryonics Jan 14 2022 Cryonics—also known as cryopreservation or cryosuspension—is the preservation of legally dead individuals at ultra-low temperatures. Those who undergo this procedure hope that future technology will not only succeed in reviving them, but also cure them of the condition that led to their demise. In this sense, some hope that cryopreservation will allow people to continue living indefinitely. This book discusses the moral concerns of cryonics, both as a medical procedure and as an intermediate step toward life extension. In particular, Minerva analyses the moral issues surrounding cryonics-related techniques (including the hypothetical cryosuspension of fetuses as an alternative to abortion) by focusing on how they might impact the individuals who undergo cryosuspension, as well as society at large.

The New Age of Development Apr 05 2021 This book focuses on current trends in development, arguing that the digital revolution will shape today's race for global supremacy. The volume explores how the technological race, driven by AI advances, will decisively contribute to shaping a new world order. Every leap in technological advancement changes the rules of the game and initiate new cycles of economic growth. The main argument of the authors is that these changes are particularly intense in Eurasia, the main geopolitical hotspot at the moment. Starting from recent statistical data, the authors underline this new ascent of the Asian continent - a shift that can be best described as a historical change of relay not between two countries, but between two continents. Lastly, the volume discusses the consequences of these shifts in power and influence, by reflecting on the possible new world order to follow. Effectively providing an overview of the challenges that will decisively shape future geopolitical relations, this volume will be of use to researchers and students interested in globalization studies, international relations, geopolitics, and development. .

Routledge Handbook of the Chinese Communist Party Jul 28 2020 Whilst the Chinese Communist Party is one of the most powerful political institutions in the world, it is also one of the least understood, due to the party's secrecy and tight control over the archives, the press and the Internet. Having governed the People's Republic of China for nearly 70 years though, much interest remains into how this quintessentially Leninist party governs one-fifth of the world and runs the world's second-largest economy. The Routledge Handbook of the Chinese Communist Party gives a comprehensive and multi-faceted picture of the party's traditions and values – as well as its efforts to stay relevant in the twenty-first century. It uses a wealth of contemporary data and qualitative analysis to explore the intriguing relationship between the party on the one hand, and the government, the legal and judicial establishment and the armed forces, on the other. Tracing the influence of Marx, Engels, Lenin and Stalin, as well as Mao Zedong, on contemporary leaders ranging from Deng Xiaoping and Jiang Zemin to Hu Jintao and Xi Jinping, the sections cover: the party's history and traditions; how the party works and seeks to remain relevant; major policy arenas; the CCP in the twenty-first century. The Routledge Handbook of the Chinese Communist Party will be of interest to students and scholars of Chinese Politics, Asian Politics, Political Parties and International Relations. The Routledge History of American Science Nov 19 2019 The Routledge History of American Science provides an essential companion to the most significant themes within the subject area. The field of the history of science continues to grow and expand into new areas and to adopt new theories to explain the role of science and its connections to politics, economics, religion, social structures, intellectual history, and art. This book takes North America as its focus and explores the history of science in the region both nationally and internationally with 27 chapters from a range of disciplines. Part I takes a chronological look at the history of science in America, from its origins in the Atlantic World, through to the American Revolution, the Civil War, the World Wars, and ending in the postmodern era. Part II discusses American science in practice, from scientists as practitioners, laboratories and field experiences, to science and religion. Part III examines the relationship between science and power. The chapters touch on the intersection of science and imperialism, environmental science in U.S. politics, as well as capitalism and science. Finally, Part IV explores how science is embedded in the culture of the United States with topics such as the growing importance of climate science, the role of scientific racism, the construction of gender, and how science and disability studies converge. The final chapter reviews the way in which society has embraced or rejected science, with reflections on the recent pandemic and what it may mean for the future of American science. This book fills a much-needed gap in the history and historiography of American science studies and will be an invaluable guide for any student or researcher in the history of science in America.

Leadership after COVID-19 May 18 2022 The COVID-19 pandemic has permanently changed lives around the world and no dimension of life and leadership seems to have been spared from its wrath. It has also stirred us into thinking about novel approaches to lead organizations and societies toward a shared, sustainable future. This book offers novel perspectives on leadership and change management after the COVID-19 pandemic that take us beyond striving for thriving—perspectives that are grounded in emergent theory, research and practice. It highlights sustainable leadership and change management strategies to effectively deal with unpredictable and rapidly changing situations—particularly in a world that is increasingly volatile, uncertain, complex, and ambiguous (VUCA). This book also highlights engaging perspectives by specialists from different disciplines such as business, psychology, education, and health care. It serves as a practical guide in identifying and responding to leadership challenges and opportunities in each of the four VUCA categories of volatility, uncertainty, complexity, and ambiguity—and how they affect businesses, organizations, and societies as a whole.

Text in a Whirlwind Feb 21 2020 Holmes examines four exegetical devices employed by all sides in the debate on 1 Tim. 2:9-15, proposing that together they create a 'whirlwind' effect which obscures the text's meaning. She concludes that (1) the immediate context is general, not ecclesial; (2) background often reconstructed from passages elsewhere in the Pastorals is misleading; (3) comparison with 1 Cor. 14:34-35 can similarly mislead; and (4) the conjunction gar ('for') has been allowed unduly to dominate interpretation. The writer of the letter, it is argued, has been misunderstood since very early in the Christian era, his intention having been simply to moderate women's everyday behaviour in ways that parallel the behaviour he requires of men.
