Sefer Press has put together two of their best selling books, "ELOHIM, They Are God" and "The Great Mystery, How Can Three Be One? Both are fully updated and contain additional information not found in their single book. Moses, Abraham, Isaac, Jacob and David, did they encounter the 3

powers in heaven known as the trinity? Does the Old Testament really teach such a doctrine? This book will give you an introduction and understanding to the belief of Mono-polytheism, one God three persons, directly from the Hebrew Bible known as the TaNaKh. Never before has a book been published that goes through the Torah and the Prophets revealing the plural nature of YHWH Elohim until now. Also for the first time Rabbi Tzvi Nassi's book "The Great Mystery or How Can Three Be One?" has been republished, revised and updated since 1863 by Sefer Press. Far from a study of kosher dietary laws, this book is an unprecedented journey toward the true identity of the Divine Messiah--the one previously considered "unkosher" and "unacceptable" by Jewish people. This encyclopedic volume will surprise and challenge you with the compelling words of Jewish sages and rabbis over the last 2,000 years, many in English for the first time.

Business Process Modeling Notation (BPMN) is a standard, graphical modeling representation for business processes. It provides an easy to use, flow-charting notation that is independent of the implementation environment. An underlying rigor supports the notation-facilitating the translation of business level models into executable models that BPM Suites and workflow engines can understand. Over recent years, BPMN has been widely adopted by Business Process Management (BPM) related products-both the Business Process Analysis and Modeling tool vendors and the BPM Suites. This book is for business users and process modeling practitioners alike. Part I provides an easily understood introduction to the key components of BPMN (put forward in a user-friendly fashion). Starting off with simple models, it progresses into more sophisticated patterns. Exercises help cement comprehension and understanding (with answers available online). Part II provides a detailed and authoritative reference on the precise semantics and capabilities of the standard.

Programming Fundamentals - A Modular Structured Approach using C++ is written by Kenneth Leroy Busbee, a faculty member at Houston Community College in Houston, Texas. The materials used in this textbook/collection were developed by the author and others as independent modules for publication within the Connexions environment. Programming fundamentals are often divided into three college courses: Modular/Structured, Object Oriented and Data Structures. This textbook/collection covers the rest of those three courses. Explains how to assess, select, and build high availability solutions from the ground up. Learn valuable skills, including how to drill down into the heart of high availability requirements, and how to assess and classify these requirements, and how to select, configure, and specify a matching high availability solution that optimally meets your needs. Presents topics covered in levels 1 and 2

and provides a variety of effective, workable exercises to help the student attain mastery of each specific point taught. A self-contained, mathematical introduction to the driving ideas in equilibrium statistical mechanics, studying important models in detail. The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.). "This book is the result of 20 years of painstaking research by the author. Its contents are based on documentation—supported by more than 800 footnotes—from the 16th century to the community's tragic end in 1942. The history of the Jewish community under Ottoman rule, Serbia, Yugoslavia and finally the German occupation and the "Final Solution" is told in great detail, always based on documentary evidence. In addition, the book contains specific sections dealing with aspects of the Jewish life: rabbis, synagogues, cemeteries and funeral ceremonies, educational institutions, Jewish life in general, and a complete list of all Jewish institutions. There is an extensive bibliography and an index of names. The book makes optimal use of primary sources and combines archive documents, literary and religious sources with field work consisting of questions and interviews. The fact that the author was a member of the community enabled her to interview a wide range of persons and to reach primary sources that are vanishing. Belgrade was the first major European city to become "Judenrein" —free of Jews. It started in December 1941, before the Wannsee Conference where the Final Solution was formally adopted, and, by May, 1942, there were no more Jews left in Serbia."--Publisher description. Because of the individualized nature of drug and therapeutic treatments, clinical trials require participants who represent the diversity of the patient base. If early trials do not have a broad patient base, it can be difficult to know who may or may not benefit from or respond to a treatment later. In addition to diversity in recruitment, informed consent during participation is also crucial. If participants do not fully understand what they are signing up for, they may become confused, mistrustful, or drop out of a trial altogether, confusing investigators and possibly affecting the generalizability of a study. To explore the incorporation of health literacy practices into clinical trials, the Roundtable on Health Literacy convened a workshop titled Clinical Trials: Practice and Impact on April 11, 2019, in Washington, DC. The workshop presentations and discussion centered around issues related to the challenges or barriers for diverse populations' participation in clinical trials, best practices for clinical trial sites and researchers incorporating health literacy practices, and effective health literacy strategies for clear communication with

participants. This publication summarizes the presentation and discussion of the workshop. During his 2009 inaugural speech, President Obama described the United States as a nation of "Christians and Muslims, Jews and Hindus--and nonbelievers." It was the first time an American president had acknowledged the existence of this rapidly growing segment of the population in such a public forum. And yet the reasons why more and more people are turning away from religion are still poorly understood. In *Faith No More*, Phil Zuckerman draws on in-depth interviews with people who have left religion to find out what's really behind the process of losing one's faith. According to a 2008 study, so many Americans claim no religion (15%, up from 8% in 1990) that this category now outranks every other religious group except Catholics and Baptists. Exploring the deeper stories within such survey data, Zuckerman shows that leaving one's faith is a highly personal, complex, and drawn-out process. And he finds that, rather than the cliché of the angry, nihilistic atheist, apostates are life-affirming, courageous, highly intelligent and inquisitive, and deeply moral. Zuckerman predicts that this trend toward nonbelief will likely continue and argues that the sooner we recognize that religion is frequently and freely rejected by all sorts of men and women, the sooner our understanding of the human condition will improve. The first book of its kind, *Faith No More* will appeal to anyone interested in the "New Atheism" and indeed to anyone wishing to more fully understand our changing relationship to religious faith.

The backbone of *Henle Latin Second Year* is intensive language study, including review of the first year plus new materials. Separated into four parts, *Henle Latin Second Year* includes readings from Caesar's Commentaries, extensive exercises, and Latin-English vocabularies. Humanistic insight and linguistic training are the goals of the *Henle Latin Series* from Loyola Press, an integrated four-year Latin course. This exceptional work, with entries from Rav Abba to Rav Zutra, is an unprecedented study of every rabbi in the Talmud. The reader will find concise entries on every rabbinic personality mentioned in the Talmud, major and minor alike, and will discover such facts as their dates of birth, education, and occupation. Most entries are accompanied by a brief story about the rabbinic personality, with sources cited for easy reference.

Sustainability in agriculture and associated primary industries, which are both energy-intensive, is crucial for the development of any country. Increasing scarcity and resulting high fossil fuel prices combined with the need to significantly reduce greenhouse gas emissions, make the improvement of energy

efficient farming and increased use of renewable energy essential. This book provides a technological and scientific endeavor to assist society and farming communities in different regions and scales to improve their productivity and sustainability. To fulfill future needs of a modern sustainable agriculture, this book addresses highly actual topics providing innovative, effective and more sustainable solutions for agriculture by using sustainable, environmentally friendly, renewable energy sources and modern energy efficient, cost-improved technologies. The book highlights new areas of research, and further R&D needs. It helps to improve food security for the rapidly growing world population and to reduce carbon dioxide emissions from fossil fuel use in agriculture, which presently contributes 22% of the global carbon dioxide emissions. This book provides a source of information, stimuli and incentives for what and how new and energy efficient technologies can be applied as effective tools and solutions in agricultural production to satisfy the continually increasing demand for food and fibre in an economically sustainable way, while contributing to global climate change mitigation. It will be useful and inspiring to decision makers working in different authorities, professionals, agricultural engineers, researchers, and students concerned with agriculture and related primary industries, sustainable energy development and climate change mitigation projects.

Spanish Three Years, Second Edition provides a complete and systematic review of the essential elements of third-year Spanish with coverage of Spanish and Spanish-American culture, along with a wealth of varied practice. Thoroughly up-to-date, this Second Edition is designed to incorporate and reflect the National Standards for Foreign Languages Learning in the 21st Century. The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a significant non – Celtic influence on Scotland ' s history has been largely ignored for centuries? This book argues that much of Scotland ' s history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland ' s identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors ' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names. Limited Liability Company and

Partnership Answer Book Tropical forests are an undervalued asset in meeting the greatest global challenges of our time—averting climate change and promoting development. Despite their importance, tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest-rich countries. The good news is that the science, economics, and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation. Why Forests? Why Now? synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation. It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent, affordable, and achievable. This book is concerned with the repertory of traditional urban song and music of the Kor ç ë area in general and more specifically the karakteristike

(characteristic) or ' distinctive ' song associated with Kor ç ë city, Albania. The first half of the 20th century marked the climax of an evolution which started in the mid-19th century with the oral tradition of urban song in Kor ç ë . While the translation of ' K ë nga Karakteristike Kor ç are ' into ' Kor ç are Distinctive Song ' seems to be an odd name for a genre, it is, however, a translation as close as possible to the original Albanian, denoting the characteristic songs of Kor ç ë . The term ' characteristic ' implies peculiar or specific songs, different not only from the traditional urban song of Kor ç ë , but also from any kind of song, whether folk, popular, traditional urban or art, composed and performed among the Kor ç ë people. The book also introduces the Kor ç are urban song and urban lyric song, as well as the Saze music, which were introduced during the Ottoman domination of the Balkans.
