"The Tale of a Field Hospital" by Frederick Treves. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format. This is a collection of M.R. James's ghost stories. James redefined the ghost story by abandoning many of the formal Gothic clichés of his predecessors and using more realistic contemporary settings. Mastermind, the BBC television contest, has subjected more than 1,400 would-be Brains of Britain to its rapid-fire interrogation. But after 25 years, the program was broadcast on

television for the last time in September 1997. Its winners—taxi drivers, diplomats and teachers—became national celebrities and the program spawned an obsession with general knowledge, from Trivial Pursuit to pub quizzes. Its success has been due to a simple formula, the consistency of its standards and in large measure to the gravitas, courtesy, and humor of its Icelandic-born question-master, Magnus Magnusson. His book of behind-the-scenes or in-the-chair anecdotes is a valedictory celebration of a much-loved program. Montague Rhodes James is considered one of the greatest writers of ghost stories of all time. His story-telling is noted for how it updated the conception of the ghost story from its formal gothic counterpart to the more realistic contemporary settings of the early 20th century. Included in this volume is a collection of James' most famous ghost stories which include the following: "Canon Alberic's Scrap-Book," "Lost Hearts," "The Mezzotint," "The Ash-Tree," "Number 13," "Count Magnus," "Oh, Whistle, and I'll Come to You, My Lad'," "The Treasure of Abbot Thomas," "A School Story," "The Rose Garden," "The Tractate Middoth," "Casting the Runes," "The Stalls of Barchester Cathedral," "Martin's Close," and "Mr. Humphreys and His Inheritance." A Magnus effect windmill for generating electrical power is disclosed. A large nacelle-hub mounted pivotally (in Azimuth) atop a support tower carries, in the example disclosed, three elongated barrels arranged in a vertical plane and extending symmetrically radially outwardly from the nacelle. The system provides spin energy to the barrels by internal mechanical coupling in the proper sense to cause, in reaction to an incident wind, a rotational torque of a predetermined sense on the hub. The rotating hub carries a set of power take-off rollers which ride on a stationary circular track in the nacelle. Shafts carry the power, given to the rollers by the wind driven hub, to a central collector or accumulator gear assembly whose output is divided to drive the spin mechanism for the Magnus barrels and the main electric generator. A planetary gear assembly is interposed between the collector gears and the spin mechanism functioning as a differential which is also connected to an auxiliary electric motor whereby power to the spin mechanism may selectively be provided by the motor. Generally, the motor provides initial spin to the barrels for start-up after which the motor is braked and the spin mechanism is driven as though by a fixed ratio coupling from the rotor hub. During high wind or other unusual conditions, the auxiliary motor may be unbraked and excess spin power may be used to operate the motor as a generator of additional electrical output. Interposed between the collector gears of the rotating hub and the main electric generator is a novel variable speed drive-fly wheel system which is driven by the variable speed of the wind driven rotor and which, in turn, drives the main electric generator at constant angular speed.

Reference is made to the complete specification for disclosure of other novel aspects of the system such as, for example, the aerodynamic and structural aspects of the novel Magnus barrels as well as novel gearing and other power coupling combination apparatus of the invention. A reading of the complete specification is recommended for a full understanding of the principles and features of the disclosed system. Magnus Mandalaria never planned to go out into the big, wide world. He thought he'd live out his life in his homely little village, happily cooking and eating pflugberry pies. But fate had other ideas. Before he knows it, Magnus has embarked on an incredible adventure. He discovers a world full of marvels and wonder, surprises and delights. But it's also a world of perils and danger. As Magnus finds himself right in the middle of a long-running war between the fair and noble Cherines and the vile and despicable Glurgs, he faces challenges beyond anything he could have imagined. 'The greatest Scottish novelist of modern times . . . She was peerless, sparkling, inventive and intelligent - the crème de la crème.' Ian Rankin One October evening five London couples gather for a dinner party, enjoying 'the pheasant (flambe in cognac as it is)' and waiting for the imminent arrival of the late-coming guest Hilda Damien, who has been unavoidably detained due to the fact that she is being murdered at this very moment. With an introduction by Ian Rankin. Symposium is Muriel Spark - one of the greatest writers of the twentieth century and author of classics including The Prime of Miss Jean Brodie - at her wicked best. 'A rich, heady, disturbing brew.' Lorna Sage 'Extremely clever and highly entertaining.' Penelope Lively 'Stiletto-sharp fiction.' Alan Taylor, Scotland on Sunday Hans Magnus Enzensberger is one of the most widely read and respected writers in post-war Germany. In the present study a considerable number of his most important poems are closely analyzed, including the texts that make up his major poetic cycles, Mausoleum (1975) and Der Untergang der Titanic (1978). Central to any discussion of this highly diverse corpus is the way in which Enzensberger creates strikingly original poems on the basis of borrowed material. Der Untergang der Titanic, for example, is closely based on the famous bestseller A Night to Remember (1955) by the American writer Walter Lord and on the film of the same name by Roy Baker (1958). Enzensberger's 'Versepos' is simply unimaginable without Lord's book, and certain episodes represented in the poem can be fully understood only by readers who have seen the film. The appropriation of documentary material also plays an important role in the series of poems devoted to nature or science, many of which present themselves as riddles. An entire chapter is devoted to the analysis of these fascinating riddle poems. The various personages portrayed in Mausoleum comprise not only scientists, inventors, explorers, and thinkers who were responsible for truly world-

changing discoveries (Gutenberg, Humboldt, and Darwin for example), but also a whole series of historical figures whose admission to this oddball pantheon is best explained by the bizarreness of their often utopian projects or by their compulsive or megalomaniacal personalities. The playful and provocative Enzensberger clearly chose several of these latter for their shock value (Raimondo di Sangro, V. M. Molotov, Ernesto Guevara de la Serna). Our reading of this collection demonstrates Enzensberger's willingness to undermine seriousness with irony and humor, hence the presence of Dante and Marilyn Monroe on board the sinking Titanic. The final chapter examines the relation between poetry and politics and examines the notorious essay 'Gemeinplätze, die Neueste Literatur betreffend?' (1968) as well as the disturbing interview with the Weimarer Beiträge (1971), in which the poet expresses his thankfully short-lived rejection of literature as art and his desire to break out of the 'Ghetto des Kulturlebens.' This chapter also discusses the influence of Bertolt Brecht. Other chapters focus on the poet's taste for anachronism, his 'asynchronous' sensibility, and the recurrent theme of disappearance. -- Collects ghost stories and tales of the supernatural, featuring such works as "Count Magnus," "Number 13," and "Casting the Runes." Zack has no idea that he is trapped. For twelve years he has lived in a safe society that has cut itself off from the rest of the planet. A century before Zack was born his community secluded itself by building a thirty-foot wall of mortar and stone. No windows or doors led to the outside world. No one entered; no one exited. Young Zack is completely content in his community until he is enlightened by a soon to be expelled criminal. The lawbreaker treats his day of punishment as if it is his ticket to independence. Zack had never thought about visiting the world outside Magnus Kir, but after a series of events including a run-in with the king, he finally gets his chance. Magnus Kir is the tale of his hesitant escape. 'The best English novel since the war' Philip Roth Magnus Pym - ranking diplomat, consummate Englishman, loving husband, secret agent - has vanished. Has he defected? Gone to ground? As the hunt for Pym intensifies, the secrets of his life are revealed: the people he has loved and betrayed, the unreliable con-man father who made him, the two mentors who moulded and shaped him, and now wish to claim this perfect spy as their own. Described by le Carré as his most autobiographical novel, A Perfect Spy is a devastating portrayal of a man who has played different roles for so long, he no longer knows who he is. 'Le Carré understood that espionage is an extreme version of the human comedy, even the human tragedy. A Perfect Spy will very likely remain his greatest book' New Yorker Some trends are clear and visible; others are less so. But it is the invisible trends that have a greater impact on our lives and society. An example of this is the current global recession, which few people saw coming. If you really want to understand the present and the future, you need to look at the long-term invisible changes taking place behind the scenes - not the plethora of trendy gadgets and fashion statements surrounding us on a daily basis. In this book, leading trendspotter and

futurist Magnus Lindkvist goes beyond the latest handbag colours and digital gadgets, and instead takes us on a breathtaking tour of the real trends that are happening and evolving. These are the trends that will make a lasting impact on the world and our daily lives. They will provoke you into thinking about the present and future in a completely different way. The report is in two volumes and is intended to present the known data and past and future applications of Magnus effect devices. (Magnus effect devices are very high lift devices which can be used in applications where airfoils are currently used.) This first volume includes the history of Magnus effect devices, theory and principles, a significant patent review, practical marine applications, formulas and experimental data, comparisons of Magnus effect and other state-of-the-art devices, identification of further testing needed, and a proposed test program. Appendices include rudder research and a literature critique. The second volume is a collection of the drawings for 39 Magnus effect patents plus a critique of each patent evaluating its potential, especially for marine applications. Keywords: Flettner rotors, Rudders, Propellers; Stabilizers; Generators. FASCINATING BACKGROUND FACTS, STORIES AND MYTHOLOGICAL INFORMATION FOR THE MAGNUS CHASE AND THE GODS OF ASGARD SERIES Long ago in the legendary land of Asgard, battles raged throughout the Heavens and Earth between powerful gods, Viking heroes and deadly monsters. These timeless tales of bravery, deceit and love come alive in this all-new illustrated guide. As enthralling today as when first told around arctic campfires, these ancient myths are the inspiration for Rick Riordan's captivating new Magnus Chase books. An ideal source of Norse mythology for anyone reading his novels, this handy companion includes information on: •Odin: King of the gods •Asgard: Realm of the gods •Fenrir: A blood-thirsty giant wolf •Loki: The trickster god •Fafnir: A treasure-hoarding dragon •Valhalla: Heaven's golden hall •Freyja: Goddess of love •Ragnarok: Battle of the doomed gods IMPORTANT NOTE TO READERS: This book is an independent and unauthorized fan publication. No endorsement or sponsorship by or affiliation with Rick Riordan, his publishers, or other copyright and trademark holders is claimed or suggested. All references in this book to copyrighted or trademarked characters and other elements of books by Rick Riordan are for the purpose of commentary, criticism, analysis, and literary discussion only. When a stroke of fate opens Magnus' eyes to the abilities of the most magnificent minds of our time, he learns that his wild imagination, once harnessed, is truly a virtue, rather than a vice. Honouring the minds of Einstein, Tesla, Mozart, and more, this book will delight and inspire people of all ages to explore the potential of their minds. Magnus Carlsen is the greatest chess player of the 21st century. His tactical wizardry, strategic inventiveness, technical expertise and legendary fighting spirit put him head and shoulders above all other players. They also make his games tremendously instructive. To extract the best lessons from this amazing source material, Gambit has commissioned Martyn Kravtsiv, a Ukrainian grandmaster from the same generation as

Carlsen (in fact, they were born just a few days apart). He has annotated these 42 games from a thoroughly modern perspective and with an innate understanding of the impact Carlsen's play has had on modern chess. In each game Kravtsiv picks out a key point - the Magnus Moment - where he demonstrates the special insight that sets him apart from other players. Perhaps he clarifies a messy situation, confident in his technical ability. Or sacrifices to gain practical chances in a game that has not gone to plan. Throughout, the emphasis is on how Carlsen makes life hard for his opponents in any way he can, whatever the objective assessment of the position on the board. Each game is a themed lesson on an important chess topic. The bulk of the book addresses the fight for advantage and initiative in the middlegame, but there are also chapters focusing on opening ideas, endgame play and human factors. Martyn Kravtsiv is a grandmaster from Lviv, Ukraine. His tournament results include tied first places at Cappelle in 2012 and the 2015 Ukrainian Championship. He represented his country at the 2017 World Team Championship and was a coach for the team that won silver medals at the 2016 Olympiad. Magnus Chase has seen his share of trouble. Ever since that terrible night two years ago when his mother told him to run, he has lived alone on the streets of Boston, surviving by his wits, staying one step ahead of the police and truant officers. On Eight classics by great Edwardian scholar and storyteller. "Number Thirteen," "The Mezzotint," "Canon Alberic's Scrapbook," more. Renowned for their wit, erudition and suspense, these stories are each masterfully constructed and represent a high achievement in the ghost genre. After abandoning her bastard child, Ellen met a middle aged American who took her as Celine, the name she gave him, to America. Twenty years later, she would take Magnus Eden, a young playwright, to be her lover. With the death of Horace her husband, she felt a solid grip on Magnus' affection until a return to La Playa unravelled Magnus' true identity and challenged her vow not to let him go even if it would mean crying to other gods. "A bravura performance...An entertaining book" (Kirkus Reviews) about the dramatic 2016 World Chess Championship between Norway's Magnus Carlsen and Russia's Sergey Karjakin, which mirrored the world's geopolitical unrest and rekindled a global fascination with the sport. The first week of November 2016, hundreds of people descended on New York City's South Street Seaport to watch the World Chess Championship between Norway's Magnus Carlsen and Russia's Sergey Karjakin. By the time it was over would be front-page news and thought by many the greatest finish in chess history. With both Carlsen and Karjakin just twenty-five years old, it was the first time the championship had been waged among those who grew up playing chess against computers. Originally from Crimea, Karjakin had recently repatriated to Russia under the direct assistance of Putin. Carlsen, meanwhile, had expressed admiration for Donald Trump, and the first move of the tournament he played was called a Trompowsky Attack. Then there was the Russian leader of the World Chess Federation being barred from attending due to US sanctions, and chess fanatic and Trump adviser Peter Thiel being called on to make the

honorary first move in sudden death. That the tournament even required sudden death was a shock. Oddsmakers had given Carlsen, the defending champion, an eighty percent chance of winning. It would take everything he had to retain his title. Author Brin-Jonathan Butler was granted unique access to the two-and-half-week tournament and watched every move. The Grandmaster "is not the usual chronicle of a world-championship chess match....Butler offers insight into what it takes to become the best chess player on the planet...A vibrant and provocative look at chess and its metaphorical battle for territory and power" (Booklist). Magnus Chase has seen his share of trouble. Ever since that terrible night two years ago when his mother told him to run, he has lived alone on the streets of Boston, surviving by his wits, staying one step ahead of the police and truant officers. One day, he's tracked down by an uncle he barely knows-a man his mother claimed was dangerous. Uncle Randolph tells him an impossible secret: Magnus is the son of a Norse god. The Viking myths are true. The gods of Asgard are preparing for war. Trolls, giants, and worse monsters are stirring for doomsday. To prevent Ragnarok, Magnus must search the Nine Worlds for a weapon that has been lost for thousands of years. When an attack by fire giants forces him to choose between his own safety and the lives of hundreds of innocents, Magnus makes a fatal decision. Sometimes, the only way to start a new life is to die . . . A Chinese Beauty and the Beast -- A Scandinavian Jack the Giant- Killer -- An Egyptian Puss in Boots -- An ocean Sleeping Beauty -- Saaoud and his steed -- Valentine and Orson in Arabia -- A Persian Jack and the bean-

stalk -- Magnus and the white bear -- Little Sosana and her gold-wrought shoe -- A Japanese Red Riding Hood. A trusted economic commentator provides a penetrating account of the threats to China's continued economic rise Under President Xi Jinping, China has become a large and confident power both at home and abroad, but the country also faces serious challenges. In this critical take on China's future, economist George Magnus explores four key traps that China must confront and overcome in order to thrive: debt, middle income, the Renminbi, and an aging population. Looking at the political direction President Xi Jinping is taking, Magnus argues that Xi's authoritarian and repressive philosophy is ultimately not compatible with the country's economic aspirations. Thorough and well researched, the book also investigates the potential for conflicts over trade, China's evolving relationship with Trump, and the country's attempt to win influence and control in Eurasia through the Belt and Road initiative. Excerpt from *The Gates of the Future Thrown Open: Dreams and Omens*, From the *Ancient Manuscripts of Nostradamus, Albertus Magnus and Other Famous Sorcerers, Modernized and Alphabetically Arranged A not E* - To hear yourself giving out the A note in a concert, is a most favorable omen of success. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. The brilliant new novel by the author of *The Restraint of Beasts* The lead feature in this collected work is *Magus* which ties into the Saint Germaine comic series storyline but stands on its own. The *Magus* is said to be immortal and secrets are revealed as to how he obtained his immortality. There was a heavy price to pay and now, Beelzebub, the Lord of the Flies has come to collect. Will *Magus* sacrifice his only daughter to this master of the darkness? Also included here are two standalone Saint Germaine stories. "The Tragedy of Falstaff" is based on one of William Shakespeare's most tragic characters. Formerly an influential force with the young Prince Hal, Falstaff is ostracized by Hal when he assumes the throne as King Henry the V. While Henry prepares for his epic battle at Agincourt which led to the eventual unification of his kingdoms of France and England, Falstaff must stay behind and tells Saint Germaine of his tale. Then in "Quasimodo's Tale", over a game of chess with author Victor Hugo the immortal Saint Germaine tells the tale of love and tribulations of the hunchback at the cathedral of Notre Dame, Quasimodo, that ended with tragic results "A jewel of writing and design a work that dares to dream" - Lino Terlich, Drive Magazine. "itaken alternate comics into the next level of storytelling. I am in awe." - Jazma Online
