The Art Of Lutherie offers a glimpse into the mind and craft of luthier Tom Bills, whom many consider to be one of the most talented luthiers today. In this beautifully written and enjoyable read, Tom elegantly and clearly shares his best- kept secrets and methods of custom guitar making - those which make his guitars favorites among top collectors and players. Tom's unique approach to The Art Of Lutherie will empower and inspire you to create more than just a guitar, but a truly unique work of art. The information that is generously shared within this insightful and timeless work is both practical and applicable. It contains the same hard-won wisdom that only comes from years of experience and experimentation that Tom uses in creating his inspiring instruments. Over the years, he has produced instruments considered to be some of the best sounding guitars ever made. Learning the steps of how to build a guitar is important, but understanding why master luthiers take those steps and make those decisions can empower you to make your own

educated choices. This will allow you to create unique guitars, and the world needs your art, your guitars - your important contribution. The Art Of Lutherie, a truly unique and inspiring guide, can prepare you to reach new heights when designing and creating unique guitars. It is not often I heap such lavish praise on people; however, Tom is in this case more than deserving: I know of no other luthier whose work I respect more. Tom knows his craft inside and out; he pours his soul into every guitar he makes; he uses cutting-edge science to guide his work, and it shows...as head of Artist Relations and Product Development at Mel Bay, it gives me great pleasure to publish Tom's work, which will no doubt take the art of lutherie to a new level. I hope you'll spend some time soaking in this book - it will certainly augment your musicality - Collin Bay.

Includes access to online video From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent - and loud - fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it - personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. research, nongovernmental organizations, and manufacturers, Josephson's compelling history

leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat. A comprehensive guide to all-terrain vehicles that provides information on manufacturers, models, features, repairs, and uses. An illustrated study of both the combat vehicles of Russia's legendary Spetsnaz special forces and the whole range of unique and modified vehicles that Russia's elite units use, from combat snowmobiles to the world's biggest water-cannon. Elite forces need elite vehicles. As Vladimir Putin has devoted effort and funds into modernising Russia's armed forces and turning them into an instrument geared not just for defending the Motherland but also

projecting power beyond its borders, Russia has seen a growing emphasis on special and specialist forces. Traditionally, the elite Spetsnaz commandos had to make do with regular vehicles or civilian-based 'technicals', not least to conceal their presence (or, indeed, very existence). Now, increasingly at the forefront of Russian power projection, the Spetsnaz are acquiring more capable, versatile vehicles, such as the paratroopers' BTR-D personnel carrier, and also experimenting with exotic, specialist new acquisitions, such as the Chaborz M-3 buggy and Yamaha Grizzly all-terrain vehicle. The other elite branches of Russia's forces, such as the Arctic-warfare troops of the 200th Independent Motor Rifle Brigade, the paratroopers of the Air Assault Troops (VDV), the Naval Infantry, and the elite units of the security forces are also developing and fielding new vehicles for their specialist roles, from combat snowmobiles to urban-warfare vehicles. From highly-mobile LMVs able to operate in the deserts of Syria or the streets of Ukraine, through dedicated fire-support vehicles such as the air-droppable Sprut-SD or the massive BMPT 'Terminator', to amphibious tanks and drone-equipped security trucks, these are the workhorses of Russia's special forces. This study explores all these combat vehicles in detail, combining expert analysis from Russia expert Mark Galeotti with highly accurate full-colour illustrations and photographs. Welcome to the Sixth Terrace of Dante's tower of Purgatory, serving up sins of gluttony in an eternal banquet. On this carefully curated menu you'll find children stuffing themselves to death, a forgotten saviour gorging on cheeseburgers between bareknuckle rounds on the roadhouse circuit, wealthy socialites revel in an orgiastic alien feast, and the end of days as seen through an apocalyptic carnival of indulgence. Excessive consumption also

manifests in darker hungers, for cruelty, for distraction, or possession. A pair of grifters bent on having it all chase a Scottish leprechaun across the English countryside, a newly deceased addict vies for the attention of Heavenly Higher Ups, degenerate poker players gamble with unforeseen currency, and when an old lady swallows a fly, it's just the beginning... Featuring nine stories of grotesque appetite and glorious excess from a gory gaggle of creators, they say too much of anything is poison, yet these condemned swallow each piece of forbidden fruit while reaching for the next, never to be sated. They can't help themselves. Can you?
