*Montessori Madness* Dec 25 2019 "We know we need to improve our traditional school system, both public and private. But how? More homework? Better-qualified teachers? Longer school days or school years? More testing? More funding? No, no, no, no, and no. Montessori Madness! explains why the incremental steps politicians and administrators continue to propose are incremental steps politicians and administrators continue to propose are incremental steps in the wrong direction. The entire system must be turned on its head. This book asks parents to take a look--one thirty-minute observation--at a Montessori school. Your picture of what education should look like will never be the same"--Back cover.

**Blood in the Machine** Apr 20 2022 The true story of what happened the first time machines came for human jobs, when an underground network of 19th century rebels, the Luddites, took up arms against the industrialists that were automating their work—and how it explains the power, threat, and toll of big tech today. The most pressing story in modern tech begins not in Silicon Valley, Seattle, or even Shenzhen. It begins two hundred years ago in rural England, when working men and women rose up en masse rather than starve at the hands of the factory owners who were using machines to erase and degrade their livelihoods. They organized guerilla raids, smashed those machines, and embarked on full-scale assaults against the wealthy machine owners. They won the support of Lord Byron, inspired Mary Shelley, and enraged the Prince Regent and his bloodthirsty government. Before it was over, much blood would be spilled—of rich and poor, of the invisible and of the powerful. This all-but-forgotten and deeply misunderstood class struggle nearly brought 19th century England to its knees. We live now in the second machine age, when similar fears that big tech is dominating our lives and machines replacing human labor run high. We worry that technology imperils millions of jobs, robots are ousting workers from factories, and artificial intelligence will soon remove drivers from cars. How will this all reshape our economy and the way we live? And what can we do about it? The answers lie in the story of our first machine age, when mechanization first came to British factories at the beginning of the industrial revolution. Intertwined with a lucid examination of our current age, the story of the Luddites, the working-class insurgency that took up arms against automation (at a time when it was punishable by death to break a machine), *Blood in the Machine* reaches through time and space to tell a story about how technology changed our world—and how it's already changing our future.

**1001 Cool Freaky Facts** Jun 22 2022 The truth is often stranger than fiction. Need proof? In England, in the 1880's, 'pants' was considered a

dirty word. Statistically you are more likely to be attacked by a cow than a shark. The sun loses close to a billion kilograms of weight every second. An office desk has 400 times more bacteria than a toilet. A rhinoceros horn is made of compacted hair. Phobophobia is fear of fear. 'Twinkle Twinkle Little Star' was written by Mozart. There are 1001 cool, freaky, funny, fabulous, foul, frightening, far-out, fascinating, first-class, phenomenal, fantastic facts here for you amusement and edification! *Branding For Dummies* Dec 29 2022 Why do consumers pay a premium for a Dell or Hewlett-Packard laptop, when they could get a generic machine with similar features for a lower price? The answer lies in the power of branding. A brand is not just a logo. It is the image your company creates of itself, from your advertising look to your customer interaction style. It makes a promise for your business, and that promise becomes the sticking point for customer loyalty. And that loyalty and trust is why, so to speak, your laptops sell and your competitors' don't. Whatever your business is, whether it's large or small, global or local, *Branding For Dummies* gives you the nuts and bolts know-how to create, improve, or maintain a brand. This plain-English guide will help you brand everything from products to services to individuals. It gives you step-by-step advice on assembling a top-notch branding team, positioning your brand, handling advertising and promotion, avoiding blunders, and keeping your brand viable, visible, and healthy. You'll get familiar with branding essentials like: Defining your company's identity Developing logos and taglines Launching your brand marketing plan Managing and protecting your brand Fixing a broken brand Making customers loyal brand champions Filled with easy-to-navigate icons, charts, figures, top ten lists, and humor, *Branding For Dummies* is the straight-up, jargon-free resource for making your brand stand out from the pack—and for positioning your business to reap the ensuing rewards.

**Winners Take All - The 9 Fundamental Rules of High Tech**

**Strategy** Nov 27 2022 'Winners Take All' is about building a product and a company into a winner. Written by Tony Seba, a high tech entrepreneur and Stanford University lecturer, this book is an easy-to-read guide to the strategies, tools, templates, and step-by-step implementation frameworks that recent Silicon Valley winners have used to achieve market leadership. Seba, who teaches entrepreneurship and strategic marketing looked at recent winners like Google, Symantec, Netflix, Apple, Craigslist, Salesforce, and compared them to the competition (Yahoo, McAfee, Sony) in order to learn what differentiated these companies He found 9 really simple rules that winning companies

can follow. To test the 9 Rules's predictive power, the author published two portfolios. 18 months later the results were compelling: 80% of the '9 Rules' companies beat the market and the portfolio had a 57% return (details: [www.tonyseba.com](http://www.tonyseba.com)). *Winners Take All* is refreshingly free of buzzwords and consultant-speak.

**Cave Carson Has a Cybernetic Eye Vol. 1: Going Underground** May 22 2022 DC's classic Silver Age hero is revived in *CAVE CARSON HAS A CYBERNETIC EYE VOL. 1: GOING UNDERGROUND*, the first chapter of a trailblazing new saga from artist Michael Avon Oeming (Powers) and writers Jonathan Rivera and My Chemical Romance's Gerard Way, the visionary founder of DC's Young Animal imprint! Cave Carson was once the world's greatest underground adventurer-but that was a long time ago. When he settled down with his wife, Eileen, to raise their daughter, Chloe, he traded the controls of his vehicle, the Mighty Mole Mark 1, for a desk and keyboard. Since then, Cave has led a quiet life-even with the constant distraction of his otherworldly cybernetic eye. But when a sudden illness claims Eileen's life, Cave's tranquil existence is shattered and he and Chloe soon find themselves hurtling down a terrifying tunnel of danger, discovery, mayhem and madness. At the bottom of that tunnel lie secrets buried for decades-secrets that hold the key to thwarting a conspiracy that threatens to consume the surface and subterranean worlds alike. But will Cave and his intrepid team of super-spelunkers be able to overcome this new generation of evil-or is there less to this hero than meets the eye? Collects issues #1-6.

*Understanding Business Ecosystems* Feb 28 2023 *Understanding Business Ecosystems: How Firms Succeed in the New World of Convergence?* builds on strategic management and innovation management academic contributions to better understand theoretical and empirical challenges of business ecosystems. Even if the concept of business ecosystem was coined in 1993, it will lie fallow during more than ten years before gaining scholars' interest. Managers will however recognize the relevance of this concept as it grasps the complexity of their business reality in terms of new collaborative and innovative strategies. Thus, the main purpose of this book is twofold. On the one hand, the objective is to identify the epistemological and theoretical fundamentals of business ecosystems, and on the other hand, the purpose is to analyse the various managerial challenges. This volume analyses in particular the issues of knowledge management, competition strategies, platforms, governance, etc. *Understanding Business Ecosystems: How Firms Succeed in the New World of Convergence?* is finally a key reference book that innovates by integrating for the first time well known French speaking scholars' contributions from the strategy and innovation management fields.

**Radar Instruction Manual** Dec 05 2020 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

*How to Draw Cool Stuff* Jun 10 2021 "How to Draw Cool Stuff: Basics, Shading, Texture, Pattern and Optical Illusions" is the second book in the How to Draw Cool Stuff series. Inside you will find simple illustrations that cover the necessities of drawing cool stuff. Specific exercises are provided that offer step-by-step guidelines for drawing a variety of subjects. Each lesson starts with an easy-to-draw shape that will become the basic structure of the drawing. From there, each step adds elements to that structure, allowing the artist to build on their creation and make a more detailed image. Starting with the basic forms, the artist is provided a guide to help see objects in terms of simplified shapes. Instructions for shading to add depth, contrast, character and movement to a drawing are then covered. The varieties of texture and pattern that can be included in an artwork offer another layer of interest and depth to a design. These elements are necessary to indicate the way something looks like it feels in a work (texture) or creating the repetition of shapes, lines or colors (patterns). Illustrated optical illusions involve images that are sensed and perceived to be different from what they really are, showing examples of how the mind and the eyes can play tricks on each other. All you need is a piece of paper, a pencil and an eraser and you are ready to draw cool stuff. Once the drawing is complete, it can be colored, shaded or designed in any way you like to make it original. Following these exercises is a great way to practice your craft and begin seeing things in terms of simple shapes within a complex object.

**The Business of Electronics** May 10 2021 Electronics is an ever-changing field with an entrepreneurial spirit and a rich history, populated by some of the world's most famous companies and personalities. The Business of Electronics details the field's complex ecosystem in all its trials and tribulations. It looks at companies such as Apple, IBM, Samsung, and Nokia, as well as now-extinct companies such as Honeywell Bull (France) and Sinclair Computers (UK) that contributed to technology and business. Sethi shows us how a handful of US companies led the charge in designing equipment that could make millions of small, reliable components; how Nokia started in the timber business; the history of inventors like J.C. Bose, a pioneer in radio communication (who inadvertently made Guglielmo Marconi famous); and why there are numerous companies and creators that never made it or that we have never heard of. This all-encompassing book not only explores the vibrant history of electronics, it uses case studies to examine the companies and people that made history and explain how we ended up where we are today.

[Hamlet's Mill](#) Nov 23 2019 The main argument of the book may be summarized as the claim of an early (Neolithic) discovery of the precession of the equinoxes (usually attributed to Hipparchus, 2nd century BCE), and an associated very long-lived Megalithic civilization of "unsuspected sophistication" that was particularly preoccupied with astronomical observation. The knowledge of this civilization about precession, and the associated astrological ages, would have been encoded in mythology, typically in the form of a story relating to a millstone and a young protagonist-the "Hamlet's Mill" of the book's title, a reference to the kenning Amlóða kvren recorded in the Old Icelandic Skáldskaparmál.[1] The authors indeed claim that mythology is primarily to be interpreted as in terms of archaeoastronomy ("mythological language has exclusive reference to celestial phenomena"), and they mock alternative interpretations in terms of fertility or agriculture.[2]
