What began as a covert black ops program to keep reverse-engineered ET technologies from the Soviets during the Cold War has become a compartmentalized criminal transnational enterprise illegally kept from presidents, world leaders, and congress. Dr. Steven M. Greer, the world's foremost authority on UFOs and ETS has provided briefing materials for sitting U.S. Presidents, members of congress, directors of the CIA and DIA, world leaders, and members of the Joint Chiefs. As founder and director of CSETI (Center for the Study of Extraterrestrial Intelligence) he has pioneered CE-5 protocols that have enabled thousands of civilians to engage in peaceful contact with our interstellar visitors. Now, he and hundreds of military personnel, scientists, and civilians who had top-secret access to Unacknowledged Special Access Projects (USAPs) have come forward with startling revelations about the greatest cover-up in human history in an attempt to prevent a false flag event in the works that - if unleashed - would make 9/11 look like a fender bender. Holding nothing back, Dr. Greer and his witnesses provide startling details about this unacknowledged chapter in history, energy and anti-gravitic systems, lunar bases, and black shelved technologies (purposely denied patents) that can transform our world...if we force their introduction into the free market.

And the Grim Reaper, loosed upon the land by a humanity who has once again tipped the scales in favor of evil over good, is stalking Patrick Shepherd. If Michael Crichton and Clive Cussler were to combine their talents to create the ultimate summer read, MEG would be the result--a jaw-dropping and terrifying page-turner of the deep. On a top-secret dive into the Pacific Ocean's deepest canyon, Jonas Taylor found himself face-to-face with the

largest and most ferocious predator in the history of the animal kingdom. The sole survivor of the mission, Taylor is haunted by what he's sure he saw but still can't prove exists--"Carcharodon megalodon, the massive mother of the great white shark. The average prehistoric Meg weighs in at twenty tons and could tear apart a Tyrannosaurus rex in seconds. Written off as a crackpot suffering from post-traumatic stress disorder, Taylor refuses to forget the depths that nearly cost him his life. With a Ph.D. in paleontology under his belt, Taylor spends years theorizing, lecturing, and writing about the possibility that Meg still feeds at the deepest levels of the sea. But it takes an old friend in need to get him to return to the water, and a hotshot female submarine pilot to dare him back into a high-tech miniature sub. Diving deeper than he ever has before, Taylor will face terror like he's never imagined, and what he finds could turn the tides bloody red until the end of time. Steve Alten holds a master's degree in sports medicine and has a Ph.D. from Temple University. An avid amateur oceanographer, Alten has been studying Megalodons for over ten years. STEP RIGHT UP AND GET YOUR FREE PASS... TO CRYPTID ZOO A veteran of the Iraq war is appointed Under Secretary of Defense in order to penetrate a secret government purposely black-shelving zero-point-energy, a clean, abundant energy source reverse-engineered from downed UFOs. Are Extraterrestrials and UFOs real? Are there secret subterranean military bases hiding advanced technologies that date back to the incident at Roswell? Is there a False Flag in the works intended to wipe out billions? Steve Alten's UNDISCLOSED is a mind-opening thriller of "faction" which incorporates testimonials from military and intelligence personnel who were actual eyewitnesses and participants involved in the greatest secret in history. From Publishers Weekly: Even die-hard conspiracy theorists will be dubious about the sinister government-led plots that form the shaky foundation of this political thriller. Alten, best-known for his gory novels featuring giant prehistoric sharks (Meg; The Trench), goes well beyond the already far-fetched idea that the Bush administration let the devastating 9/11 attacks happen to further the neoconservative agenda of reshaping the Middle East. In 2012, with centrist conservative David McKuin in the White House, the federal government plots to detonate a nuclear bomb in a U.S. city and blame Iran as a cover to take out that country's radical leadership. Standing in the plotters' way is Ace Futrell, an energy expert whose murdered wife was possibly targeted by U.S. intelligence.
