Neuropsychological assessment is a difficult and complicated process. Often, experienced clinicians as well as trainees and students gloss over fundamental problems or fail to consider potential sources of error. Since formal test data on the surface appear unambiguous and objective, they may fall into the habit of overemphasizing tests and their scores and underemphasizing all the factors that affect the validity, reliability, and interpretability of test data. But interpretation is far from straightforward, and a pragmatic application of assessment results requires attention to a multitude of issues. This long-awaited, updated, and greatly expanded second edition of the Clinician's Guide to Neuropsychological Assessment, like the first, focuses on the clinical practice of neuropsychology. Orienting readers to the entire multitude of issues, it guides them step by step through evaluation and helps them avoid common misconceptions, mistakes, and methodological pitfalls. It is divided into three sections: fundamental elements of the assessment process; special issues, settings, and populations; and new approaches and methodologies. The authors, all of whom are actively engaged in the clinical practice of neuropsychological assessment, as well as in teaching and research, do an outstanding job of integrating the academic and the practical. The Clinician's Guide to Neuropsychological Assessment, Second Edition will be welcomed as a text for graduate courses but also as an invaluable hands-on handbook for interns, postdoctoral fellows, and experienced neuropsychologists alike. No other book offers its combination of breadth across batteries and approaches, depth, and practicality. A guide to buying a used car or minivan features information on the strengths and weaknesses of each model, a safety summary, recalls, warranties, and service tips. The explosive new saga continues The year is 2063. Earth has been reborn, unleashing long-dormant magical forces across the globe. Megacorporations rule from on high, while organized crime syndicates rule the underworld. Sliding through the cracks are the shadowrunners-professionals who will do anything for a profit, and anything it takes to get the job done . . . Kellan Colt has come far in her magical training. But all her accomplishments haven't satisfied her desire to know the truth about her shadowrunner mother, and to learn the secrets of the amulet she found among her mother's possessions. Kellan is determined to find answers-and to earn the respect of her fellow runners in the process. Lately, Kellan has been troubled by disturbing dreams. Something seems to be calling her, but before she can figure out who-or what-she joins a run into the paranoiac elven homeland of Tir Tairngire. Puts the current thinking on suicide into historical context tracing how people have thought and felt about it for thousands of years.

How to maintain your import car. When Colt and Francie Hart stumble upon an empty 150-year-old house during a weekend drive in the country, they each fall in love with it and want to buy it -- for entirely different reasons. For Colt, the house will become a trophy representing his enormous success at trading stocks. For Francie, a blocked poet, the house seems to whisper hints for reawakening her creativity. Picking up the house for a song, the couple begins the transition from city dwelling to country life and find for the first time in too long that they have something to work on together. Yet the more the Harts learn about the house, its history, and its previous inhabitants, the more it drives them apart. And when Francie discovers an old family cemetery hidden on the property, it somehow brings out qualities in each of them that come as a total surprise to the other. Events that conspire to destroy their marriage could just as easily bring the couple together again in this story of two people who, in looking for a place to call home, find themselves instead.
