**What do Amazon's product reviews, eBay's feedback score system, Slashdot's Karma System, and Xbox Live's Achievements have in common? They're all examples of successful reputation systems that enable consumer websites to manage and present user contributions most effectively. This book shows you how to design and develop reputation systems for your own sites or web applications, written by experts who have designed web communities for Yahoo! and other prominent sites. Building Web Reputation Systems helps you ask the hard questions about these underlying mechanisms, and why they're critical for any organization that draws from or depends on user-generated content. It's a must-have for system architects, product managers, community support staff, and UI designers. Scale your reputation system to handle an overwhelming inflow of user contributions Determine the quality of contributions, and learn why some are more useful than others Become familiar with different models that encourage first-class contributions Discover tricks of moderation and how to stamp out the worst contributions quickly and efficiently Engage contributors and reward them in a way that gets them to return Examine a case study based on actual reputation deployments at industry-leading social sites, including Yahoo!, Flickr, and eBay The cleanest CD sound, the quietest turntable, and the clearest FM signal are useless without a fine speaker system. This book not only tells readers how to build quality speaker systems, it also shows them what components to choose and why. Everything you need to know to build a high-quality sound system! *Handbook of Exploration Geochemistry, Volume 3: Rock Geochemistry in Mineral Exploration* focuses on the application of rock geochemistry in mineral exploration, including deposits of plutonic association, volcanic and sedimentary association, and sequence of geochemical exploration. The publication first elaborates on geochemistry in the exploration sequence, crustal abundance, geochemical behavior of elements, and problems of sampling and recognition of geochemical anomalies. Discussions focus on population partition, spatial distribution of data, abundance of elements, classification and geochemical behavior of elements, principles underlying geochemical exploration, sequence of geochemical exploration, and main types of geochemical surveys. The text then takes a look at regional scale exploration for deposits of plutonic association; regional scale exploration for vein and replacement deposits; and regional scale exploration for stratiform deposits of volcanic and sedimentary association. The book ponders on the synthesis of geochemical responses and operational conclusions, local and mine scale exploration for stratiform deposits of volcanic and sedimentary association in Cyprus, Turkey, and Oceania, New Brunswick deposits, and Precambrian, Proterozoic, and Kuroko deposits. The text is a valuable reference for researchers interested in the application of rock geochemistry in mineral exploration. More than 2,750 card sets are listed in this popular book. It's the most comprehensive basketball card source ever! Includes complete coverage of cards and collectibles from 1933 to present. Features how-to-collect guide, history of basketball cards and much more. The 21st edition of this popular guide includes virtually every football card ever produced. Also includes coverage of autographs, collectible programs, starting lineups and more. By analyzing ways in which indigenous cultures described the American Southwest, David Teague persuasively argues against the destructive approach that Americans currently take to the region. Included are Native American legends and Spanish and Hispanic literature. As he traces ideas about the desert, Teague shows how literature and art represent the Southwest as a place to be sustained rather than transformed. 14 illustrations. Nostalgic treasury of 74 early pen-and-ink sketches of snow-covered landscapes, sturdy stone barns and farmhouses, covered bridges, farming implements, spring houses, and more; plus autobiographical commentary on roads traveled and sights seen. Presents listings and prices for virtually every known basketball card from 1948 to 2001. Special sections feature graded cards, figurines and autographs. More than 2,000 photos and 150,000 cards cover the NBA, WNBA, CBA, regional, Olympic, international, college, and high school issues. John Yolton seeks to allow readers of *Locke* to have accessible in one volume sections from a wide range of *Locke's*

books, structured so that some of the interconnections of his thought can be seen and traced. Although Locke did not write from a system of philosophy, he did have in mind an overall division of human knowledge. The readings begin with Locke's essay on Hermeneutics and the portions of his Essay Concerning Human Understanding on how to read a text. The rest of the selections are organized around Locke's division of human knowledge into natural science, ethics, and the theory of signs. Yolton's introduction and commentary explicate Locke's doctrines and provide the reader with the general background knowledge of other seventeenth-century writers and their works necessary to an understanding of Locke and his time. This volume of original stories is all for furry feline friends. A unique collection of fantastical cat tales. Nobody hoops it up like basketball card collectors. There has been much opinion and little fact written on the subject of lock picking. It is the purpose of this book to clarify the facts about this delicate process, and at the same time to train you in proper procedure. Reading this book is certainly enough to get you started picking simple locks, but remember: a great deal of time and patience are needed to become a truly proficient locksmith. In this volume, you will learn the fundamental theories of lock picking in addition to proper terminology, the importance of tool design (i.e. how to select and use the

right tool for a given job), the effects of tolerances, and finally the techniques most commonly used by locksmiths to successfully pick the vast majority of standard pin and wafer tumbler locks. Lock picking is a useful, engaging, and satisfying skill; with this book and a little determination, you'll be off to a great start. As a young boy, Prabir Suresh lives with his parents and sister on an otherwise uninhabited island in a remote part of the Indonesian peninsula. Prabir names it Teranesia, populating it with imaginary creatures even stranger than the evolutionarily puzzling butterflies that his parents are studying. Civil war strikes, orphaning Prabir and his sister. Eighteen years later, rumours of bizarre new species of plants and animals being discovered in the peninsula that was their childhood home draw Prabir's sister back to the island - Prabir cannot bear for her to have gone out alone and he follows, persuading a pharmaceutical researcher to take him along as a guide. This book provides an analysis of the mind of a fox and identifies questions one must ask before committing to action. The authors have constructed a matrix around these questions, which assists in identifying the rules of the game; assess the key uncertainties; paint scenarios; evaluate realistic options; and thereby make effective decisions. Nobody hoops it up like basketball card collectors. They're rabid about their ball and even more so when it comes to their cards.
