Pressure Reinforcement	Two-way design	One-way design
Intermediate Main	$A_s = 0.0025bd$	$A_s = 0.0025bd$
Low	$A_s = 0.0018bd$	$A_s = 0.0018bd$
High	$A_s = 0.0020bd$	$A_s = 0.0025bd$
Other	$A_s = 0.0018bd$	$A_s = 0.0018bd$

But not less than  $A/4$  used in the main direction (see Fig. F.2 for coefficients) where  $A$  = area of compression reinforcement within the width  $b$ ,  $d$  = distance from the extreme compression fibre to the centroid of compression reinforcement,  $a$  = depth of the equivalent rectangular stress block =  $(A_s / A_c) f_y / 0.85 f_c$ . The minimum area of flexural reinforcement is given in Table F.1.

**Ultimate Static Shear Capacity**

**Diagonal Tension (1)** The ultimate shear stress  $v_u$ , as a measure of diagonal tension, is computed for type I sections from  $v_u = V_u / bd$  (F.5) and for type II and III sections from  $v_u = V_u / bd$ , (F.6) where  $V_u$  is the total shear on a width  $b$  at the section a distance  $u$  (type I) or  $d$  (type II and III) from the face of the support. The shear at sections  $c$  between the face of the support and the section  $d$  or  $d$  therefrom need not be considered critical.

**(2)** The shear stress permitted on an unreinforced web is limited to 200, 230, 250, 260, 280, 300 & 320

You'll get step-by-step troubleshooting procedures ranging from safely jump starting a battery to diagnosing parasitic current drain and vehicle energy diagnosis. And you'll find detailed testing procedures for most problematic electrical components on your European car such as oxygen sensors, crankshaft and camshaft sensors, wheel speed sensors, fuel pumps, solenoids, and actuators. The authoritative companion book for your Ford F-Series pickup, covering model years 1948-1995. - A thrilling photographic account of the treasure trove of cars kept by the Mercedes-Benz Museum in Stuttgart that are not currently on display to the public The Mercedes-Benz Museum in Stuttgart is one of the largest and most visited industrial museums in the world. But the 160 or so automobiles on display are only a small part of the shiny chrome treasures that form the Mercedes-Benz Classic vehicle collection. Another 1,000 historical models are 'parked' in secret places outside Stuttgart - these secret places are called the 'Holy Halls'. This collection is the treasure trove of the brand. It has existed since 1923 and offers a comprehensive overview of the model history of Mercedes-Benz. Cars with special technology and equipment are stored here, as are the silver arrows of Caracciola, Lang and Fangio, the Pope's carriages, the state cars of the young Federal Republic of Germany or Mercedes models that became collectors' items due to their prominent previous owners. Some of these exhibits are well protected and waiting in special wooden boxes for their next use at exhibitions, fairs, events or classic car races. Others stand next to each other as silent witnesses of the past. Each time a model is modified, the collection is extended by the last vehicle of the discontinued series, which experts believe will be one of tomorrow's classic cars. The 'Holy Halls' are not open to the public; enquiries from editorial offices and TV teams have often been rejected. But, during the years 2016 to 2018, almost all the vehicles of the Mercedes collection were photographed. Thus, a unique photographic collection was created, the automobile history from more than ten decades; many of the previously unpublished photographs are exclusively available here in this book. In addition, Mercedes-Benz Classic agreed to open the 'Holy Halls' for an external photo team and provide*

information about the car models stored there. For the first time, it has been possible to produce a fascinating illustrated book with panoramic and detailed shots from the 'halls', and lively photo reports on cars that tell stories - from the first Benz battling motor car to the latest Formula 1 racing car. Equally thrilling are the stories of the unique specimens and prototypes that are stored in the 'Holy Halls': Mercedes models that never went into production are presented for the first time. The stories about the selected automobiles of the vehicle collection are supplemented by historical recordings from the Mercedes-Benz Classic archive. Does not cover diesel or 2.6 liter. C180, C200, C220, C230 & C250 Saloon & Estate (C-Class). Does NOT cover supercharged (Kompressor) or 6-cyl petrol, C200 or CDI 220 Diesel, or AMG versions.
