Media Ownership Apr 16 2022 Trends and developments in social values, political ideologies, media policies, economic conditions, globalization, media technologies, and telecommunications networks have all interacted to generate significant changes in the nature of media industries, production, content, distribution, exhibition, and use. This book considers a wide variety of interdisciplinary discussion and analysis of historical, legal, cultural, policy, research, professional, oppositional and ethical perspectives on the media ownership question.

Legendary Farm Tractors Jul 07 2021 DIVIf youâ€™re a tractor enthusiast with a passion for tractor photography, *Legendary Farm Tractors* is a

dream-come-true pictorial produced with you in mind. Containing more color photographs of more types of farm tractors than any other book in print, *Legendary Farm Tractors* presents tractors from the United States, Canada, Europe, and Japan—models from the 1880s to today—along with detailed captions, together offering a comprehensive photographic history of tractors. Organized alphabetically by make so that readers can find their favorites easily, the tractors covered here include everything from familiar manufacturers like John Deere, Ford, Farmall, Case, Caterpillar, and International Harvester to obscure tractors that have seldom been seen, such as the special streamlined Porsche coffee plantation tractor that looks more like a sports car than a piece of farm equipment. The extensive variety and distinguished photographs by noted photographer Andrew Morland make this an exceptional book for tractor buffs and the perfect gift book for any machine enthusiast.

Food Trucks, Cultural Identity, and Social Justice Feb 02 2021 Aspects of the urban food truck phenomenon, including community economic development, regulatory issues, and clashes between ethnic authenticity and local sustainability. The food truck on the corner could be a brightly painted old-style lonchera offering tacos or an upscale mobile vendor serving lobster rolls. Customers range from gastro-tourists to construction workers, all eager for food that is delicious, authentic, and relatively inexpensive. Although some cities that host food trucks encourage their proliferation, others throw up regulatory roadblocks. This book examines the food truck phenomenon in North American cities from Los Angeles to Montreal, taking a novel perspective: social justice. It considers the motivating factors behind a city's promotion or restriction of mobile food vending, and how these motivations might connect to or impede broad goals of social justice. The contributors investigate the discriminatory implementation of rules, with gentrified hipsters often receiving preferential treatment over traditional immigrants; food trucks as part of community economic development; and food trucks' role in cultural identity formation. They describe, among other things, mobile food vending in Portland, Oregon, where relaxed permitting encourages street food; the criminalization of food trucks by Los Angeles and New York City health codes; food as cultural currency in Montreal; social and spatial bifurcation of food trucks in Chicago and Durham, North Carolina; and food trucks as a part of Vancouver, Canada's, self-branding as the "Greenest City." European Land Law Sep 28 2020 In his remarkable, path-breaking new book, Peter Sparkes takes stock of the development of a distinctive body of European land law, taking as his starting point the idea that methods of land-holding permitted by a legal system both shape and reflect the attitudes of the land owners and society in general. However it quickly becomes very difficult to test that idea when the society in question is governed by an internal market composed of 30 countries (the EU-27, including Bulgaria and Romania, and the EEA-3), whose property systems differ so markedly and which reflect such widely differing cultures. Yet the internal market has already effected a gradual equalisation and standardisation across Europe as foreign capital spreads to create equality of yield. "We all become better off by joining a larger trading block but the social consequences will be profound: Brits will need to emigrate to the continent to afford a home, Bulgarians will need to make way for them along the Black Sea coast, and title deeds will be reshuffled all over Europe on a giant Monopoly board" writes the author in his preface, before embarking on a dispassionate examination of the beginning of that process of profound change. The opening chapters are devoted to an explanation of how the internal market has created a substantive European land law. Chapter 3 examines the rise of a distinctive European land law, and the development of conflicts principles applying to recovery of land. Chapters 5 to 9 on the marketing and sale of land focus upon Community competence on consumer protection. The decision to treat land as a product like any other in the Unfair Commercial Practices Directive will have wide ranging and far reaching implications and, apart from marketing of land and of timeshares, other chapters deal with conveyancing, contracting and the emerging market in mortgage credit. The book concludes with a miscellany of conflicts rules which are gradually coalescing and form the elements from which a substantive European land law can be forged. A number of topics which it is not possible to cover in detail (VAT, other taxes, environmental controls and agriculture) are touched on briefly, and the same is true of international aspects of trusts and succession.

Strong Managers, Weak Owners May 17 2022 In this major reinterpretation of the evolution of the American corporation, Mark Roe convincingly demonstrates that the ownership structure of large U.S. firms owes its distinctive character as much to politics as to economics and technology. His provocative examination addresses essential issues facing American businesses today as they compete in the new international marketplace.

Psychological Ownership and the Organizational Context Oct 10 2021 Psychological ownership as a phenomenon and construct attracts an increasing number of scholars in a variety of fields. This volume presents a comprehensive and up-to-date review of the psychological ownership literature with particular attention paid to the theory, research evidence, and comments on managerial applications. The authors address key elements that examine an employee's ownership feelings for his or her employing organization. The chapters address, among others, the following themes: the meaning of psychological ownership, the genesis of ownership feelings, the experiences and paths down which people travel that give rise to experiences of ownership, and the consequences (the personal and work outcomes) that stem from the sense of ownership. While the majority of the book is focused on feelings of ownership that exist at the individual-level, the authors introduce the construct of collective psychological ownership as well. This work acknowledges that teamwork has become increasingly commonplace in organizations and that like individuals, teams can come to a collective sense of ownership for a variety of targets within their work environment. The book closes by drawing upon the existing science of psychological ownership to provide a perspective on its applied (managerial) implications. This book will make a noteworthy addition to scholars' libraries: university libraries will also value it among their collections. Students of organizational psychology, management, organizational behavior, sociology and communication and their professors will find much of interest here.
