Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling,

connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin. Generation TreX: My Thoughts is a journal recounting the personal experiences and insights of a young man while he plans a 27-month non-motorized trek of service throughout America. 1/24/00 - What will become of this quest? Will anyone care? I don't have an answer for these questions and I'm not sure I really want to. To be honest, I'm feeling a little tired of this idealistic crusade. I have no desire to make it a big hoopla event. I've been writing that the success of the Trek depends upon my commitment to the principles and not the attention it receives. In reality, however, I have been living the opposite. I have gotten so focused on the image and organization of the Trek that I have stopped simply doing it. This Trek is about exemplifying certain qualities in life, not getting on a TV show. It is about having the courage to display an example for others to follow. I don't have control of its scale (how many people hear about it), I just have control of its success ( living its principles regardless of the circumstances). If I make it home it will be nothing short of a miracle. I don't know if I will complete the goal of the 10,350 mile Trek. I do know that I believe in its mission and have to try. I may set out on the Trek, but it is the support team and the people I meet along the way that will bring me home. Lauren Fix's straight-forward, clear and fun advice makes caring for your
