The Toxic Spew is back, and in even more trouble than usual. WOOP WOOP WOOP! ALARM ALARM ALARM! It's chaos once more on the bridge of the Toxic Spew. But this time, the ship's problems are of a most human nature - they've run out of food! Mutiny, cannibalism and plain old theft are suggested as potential problem-solvers, but Captain Harvey politely requests that the crew buck their ideas up and think of something else. At which point the ISS is mentioned - no, not the International Space Station! - the Interstellar Service Station . . . But the ISS is spookily

deserted when the team arrive, and it's not long before Harvey suspects there's something fishy going on... and he's not just talking about the Spew's malfunctioning rubbish chute. Can Harvey unite his crew one more time and solve the mystery of the abandoned space station? Will Scrummage really eat Yargal if they don't find some food? And will Harvey EVER get home? Join the gang for another rip-roaring, space-hopping and (frankly) stomach-turning adventure on the universe's worst intergalactic rubbish truck - and see if you can spot the special input from kids on The Story Adventure! In the dead of winter, during a nasty snowstorm, a routine homicide investigation takes a literary twist. A suspected drug dealer is found dead, naked and with what seems to be part of a larger story written all over his body. This is the beginning of the serial killing spree dubbed by the press as the 'The Writer.' Detectives Sam Burke and Twitch Williams, helped by graphologist Charlotte Garland, have to discover the truth and end the literary nightmare that has descended, like the snow, upon the city. In this text the basic principles of copywriting are covered, along with more specific guidance on writing for online sources. The differences between writing for online and offline are highlighted to enable the reader to distinguish between the two and consequently write the best form of copy for the end source. Different sources of online content require different approaches, and therefore the author takes a structured approach, taking each of these channels in turn, for example writing for web sites, writing for email, ezines and newsletters, writing for search engines, and writing for online ads. By approaching each topic individually, specific guidance is provided enabling the reader to be properly equipped with the tools required to write the most appropriate copy for the task in hand. This extensively revised and updated edition of the classic text on power system economics explains the basic economic principles underpinning the design, operation, and planning of modern power systems in a competitive environment.
