*Soft Computing as Transdisciplinary Science and Technology* Feb 26 2023 This book presents the proceedings of the Fourth International Workshop on Soft Computing as Transdisciplinary Science and Technology (WSTST '05), May 25-27, 2005, Muroran, Japan. It brings together the original work of international soft computing/computational intelligence researchers, developers, practitioners, and users. This proceedings provide contributions to all areas of soft computing including intelligent hybrid systems, agent-based systems, intelligent data mining, decision support systems, cognitive and reactive distributed artificial intelligence (AI), internet modelling, human interface, and applications in science and technology.

**Principles of Economics Asia-Pacific Edition with Online Study Tools 12 Months** Nov 30 2020 Principles of Economics 7th edition combines microeconomics and macroeconomics into one volume for students who take a full year's course. The latest edition of this text continues to focus on important concepts and analyses necessary for students in an introductory economics course. In keeping with the authors' philosophy of showing students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues ' such as climate change and resource taxation, the impacts of the ongoing global financial crisis, inflation, unemployment, interest rates, monetary and fiscal policy.

**In the Air** Nov 18 2019 This first critical book of essays on the poetry of Peter Gizzi shows how his work extends the traditions of nineteenth- and twentieth-century modernism while also reclaiming the living presence of the “lyric” in its capacity to sing of the human predicament. Gizzi is author of seven critically acclaimed books of poetry, including most recently *Threshold Songs* and *Archeophonics*, a finalist for the National Book Award in 2016. Lauded contributors, including Ben Lerner, Michael Snediker, Marjorie Perloff, and Charles Altieri, explore Gizzi’s poetry for its embodiment of an American tradition—extending the poetics of Whitman, Dickinson, and Stevens, amongst others—while also exhibiting a twenty-first-century sensibility, perpetuating a new grammar and syntax to capture our place in the world today. Each essayist, in turn, works through close-readings of some of the most important poems of our times, enriching our understanding of a poetry of the mind which never loses track of what it means to feel.

Database Systems for Advanced Applications Jul 27 2020 The three-volume set LNCS 12681-12683 constitutes the proceedings of the 26th International Conference on Database Systems for Advanced Applications, DASFAA 2021, held in Taipei, Taiwan, in April 2021. The total of 156 papers presented in this three-volume set was carefully reviewed and selected from 490 submissions. The topic areas for the selected papers include information retrieval, search and recommendation techniques; RDF, knowledge graphs, semantic web, and knowledge management; and spatial, temporal, sequence, and streaming data management, while the dominant keywords are network, recommendation, graph, learning, and model. These topic areas and keywords shed the light on the direction where the

research in DASFAA is moving towards. Due to the Corona pandemic this event was held virtually.

**Build Your Own Electric Vehicle, Third Edition** Jan 25 2023 BUILD, CONVERT, OR BUY A STATE-OF-THE-ART ELECTRIC VEHICLE Thoroughly revised and expanded, Build Your Own Electric Vehicle, Third Edition, is your go-to guide for converting an internal combustion engine vehicle to electric or building an EV from the ground up. You'll also find out about the wide variety of EVs available for purchase and how they're being built. This new edition details all the latest breakthroughs, including AC propulsion and regenerative braking systems, intelligent controllers, batteries, and charging technologies. Filled with updated photos, this cutting-edge resource fully describes each component--motor, battery, controller, charger, and chassis--and provides illustrated, step-by-step instructions on how to assemble all the parts. Exclusive web content features current supplier and dealer lists. Custom-built for environmentalists, engineers, students, hobbyists, and mechanics, this hands-on guide puts you in the fast lane toward a cost-effective, reliable green machine. Build Your Own Electric Vehicle, Third Edition, covers: Environmental impact and energy savings The best EV for you--purchase trade-offs, conversion trade-offs, and conversion costs Chassis and design Different types of electric motors and controllers Lithium EV batteries Chargers and electrical systems EV builds and conversions Licensing and insuring your EV Driving and maintenance List of manufacturers and dealers regularly updated on website

**The Mobile Frontier** May 05 2021 Mobile user experience is a new frontier. Untethered from a keyboard and mouse, this rich design space is lush with opportunity to invent new and more human ways for people to interact with information. Invention requires casting off many anchors and conventions inherited from the last 50 years of computer science and traditional design and jumping head first into a new and unfamiliar design space.

*Western Mining* Aug 08 2021 Here, for the first time, is a clear account in words and pictures of the methods by which gold and silver were extracted and processed in the Old West. The author describes the early days of Spanish and Indian mining and the wild era inaugurated by the American prospector who rushed west to get rich quick, ending with the year 1893, when repeal of the Sherman Silver Purchase Act virtually closed the mining frontier. The account gives in laymen's language the techniques employed in prospecting, placering, lode mining, and milling, particularly those employed by the Spaniards, Indians, and Cornishmen, and shows how the ever-practical Americans adapted and improved them. Special attention is given to the methods employed in the California and Montana gold fields, Colorado and the Comstock Lode, the Black Hills, and Tombstone, Arizona. In these pages the reader also meets some of the unforgettable personalities whose lives enriched (and sometimes impoverished) the mining camps.

The Philosophy of Joss Whedon Dec 24 2022 Every generation produces a counterculture icon. Joss Whedon, creator of the long-running television series *Buffy the Vampire Slayer*, is famed for his subversive wit, rich characters, and extraordinary plotlines. His renown has only grown with subsequent creations, including *Angel*, *Firefly*, *Dollhouse*, and the innovative online series *Dr. Horrible's Sing-Along Blog*. Through premises as unusual as a supernatural detective agency run by a vampire and a Western set in outer space, Whedon weaves stories about characters forced to make commonplace moral decisions under the most bizarre of circumstances. *The Philosophy of Joss Whedon* examines Whedon's plots and characterizations to reveal their philosophical takes on the limits of personal freedom, sexual morality, radical evil, and Daoism.

Treasury Decisions Under Tariff and Navigation Laws Mar 23 2020 1890-1926 include also Decisions of the Board of U.S. General Appraisers no. 1-9135.

**Principles of Macroeconomics Asia-Pacific Edition with Online Study Tool S 12**

**Months** Oct 30 2020 The brief and student-friendly approach of this book boils economics down to its essentials, by considering what is truly important for students to learn in their first course in economics. In keeping with the authors' philosophy of showing students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues ' including the impacts of the ongoing global financial crisis, inflation, unemployment, interest rates, and monetary and fiscal policy. Continuing global financial uncertainty and the current state of the Australian economy provide a constant supply of new material, re-evaluated models, and policy changes and updates for the *Principles of Macroeconomics* text. The book emphasises the material that students should and do find interesting about the study of the economy, resulting in a focus on applications and policy, and less on formal economic theory. *Principles of Macroeconomics, 7e* encourages students to make their own judgements by presenting both sides of the debate on five controversial issues facing policymakers: the proper degree of policy activism in response to the business cycle, the choice between rules and discretion in the conduct of monetary policy, the desirability of reaching zero inflation, the importance of balancing the government's budget, and the need for tax reform to encourage saving.

*Engineering News and American Contract Journal* Aug 28 2020

The International Space Station Sep 28 2020 Looks at the operations of the International Space Station from the perspective of the Houston flight control team, under the leadership of NASA's flight directors, who authored the book. The book provides insight into the vast amount of time and energy that these teams devote to the development, planning and integration of a mission before it is executed. The passion and attention to detail of the flight control team members, who are always ready to step up when things do not go well, is a hallmark of NASA human spaceflight operations. With tremendous support from the ISS program office and engineering community, the flight control team has made the International Space Station and the programs before it a success.

**When Form Becomes Substance** Oct 22 2022 This interdisciplinary volume collects contributions from experts in their respective fields with as common theme diagrams. Diagrams play a fundamental role in the mathematical visualization and philosophical analysis of forms in space. Some of the most interesting and profound recent developments in contemporary sciences, whether in topology, geometry, dynamic systems theory, quantum field theory or string theory, have been made possible by the introduction of new types of diagrams, which, in addition to their essential role in the discovery of new classes of spaces and phenomena, have contributed to enriching and clarifying the meaning of the operations, structures and properties that are at the heart of these spaces and phenomena. The volume gives a closer look at the scope and the nature of diagrams as constituents of mathematical and physical thought, their function in contemporary artistic work, and appraise, in particular, the actual importance of the diagrams of knots, of braids, of fields, of interaction, of strings in topology and geometry, in quantum physics and in cosmology, but also in theory of perception, in plastic arts and in philosophy. The editors carefully curated this volume to be an inspiration to students and researchers in philosophy, phenomenology, mathematics and the sciences, as well as artists, musicians and the general interested audience.
