**Our world isn't ours any more. It's theirs. The human survivors lead a hardscrabble life, scavenging what they can from the dead city, waiting and watching. Cedes isn't like Matthew and his regulars. She dreams. She talks. She questions. She wonders why Luke disappeared, where Luke disappeared to. She wants to know what we are to the machines. This is her story. This is our story. This is the story of us, the humans who survive. In the ruins of our world, a new order arose, an order controlled by the very machines humankind created. The end for us came not from a massive global war but from something unthinkable, incomprehensible. The machines simply replaced us and we let them, and so, in the end, humanity went out not with a bang, but with a whimper. No shots fired. No bombs dropped. No cities destroyed. We ended and the machines began—or at least that is what the few human survivors of the machine apocalypse believe. ### To the machines, we became nothing—except maybe outsiders, if they considered us at all. Outsiders looking in on their reality, for the machines weren't bothered by our existence, or at least, if they were, they weren't bothered enough to bother us. They certainly didn't seem to require anything of us or have any need of us at all—if they had needed us, they probably would have enslaved us. But they hadn't.**

Enslaved us that is. The machines hadn't done anything to us really. Except take over the world—and it was their world now. It certainly wasn't ours. We were outsiders, strangers really. We looked in on their world. They didn't acknowledge us. They probably didn't even consider us a part of their world. Just as we didn't consider the small things that crawled beneath our feet as part of our world. Matthew told us it wasn't the machines who killed us. Matthew being the only one here now who remembered when we drove the automobiles, flew on the airplanes, and rode on cars behind the locomotives. He said most of us just died. Us being the human race. I didn't believe that. I believed we died of neglect. The neglect of the machines. The machines who cared not enough to kill or enslave us. Luke would have called it benign neglect. Luke being the one who taught me to read and write my letters and words. He knew all the fancy words. He taught me everything really. He remembered—I didn't. Don't, really. These words—his really as much as my own. But Luke was gone. Is gone really, if you don't mind me slipping into the present. Luke said it's wrong to slip from past to present or present to past, but I do. The present is—and Luke isn't. The past was—and sometimes I can see it. ### After the Machines is a story unlike any other you've ever read. It's the story of us, the humans who struggle to survive in a world we no longer control. Roger Ebert has been writing film reviews for the Chicago Sun-Times for nearly forty years. And during those four decades, his wide knowledge, keen judgment, prodigious energy, and sharp sense of humor have made him America's most

celebrated film critic. He was the first such critic to win a Pulitzer Prize—one of just three film critics ever to receive that honor—and the only one to have a star dedicated to him on the Hollywood Walk of Fame. His groundbreaking hit TV show, *At the Movies*, meanwhile, has made “two thumbs up” one of the most coveted hallmarks in the entire industry. No critic alive has reviewed more movies than Roger Ebert, and yet his essential writings have never been collected in a single volume—until now. With *Awake in the Dark*, both fans and film buffs can finally bask in the best of Ebert’s work. The reviews, interviews, and essays collected here present a picture of this indispensable critic’s numerous contributions to the cinema and cinephilia. From *The Godfather* to *GoodFellas*, from *Cries and Whispers* to *Crash*, the reviews in *Awake in the Dark* span some of the most exceptional periods in film history, from the dramatic rise of rebel Hollywood and the heyday of the auteur, to the triumph of blockbuster films such as *Star Wars* and *Raiders of the Lost Ark*, to the indie revolution that is still with us today. The extraordinary interviews gathered in *Awake in the Dark* capture Ebert engaging not only some of the most influential directors of our time—Martin Scorsese, Steven Spielberg, Woody Allen, Robert Altman, Werner Herzog, and Ingmar Bergman—but also some of the silver screen’s most respected and dynamic personalities, including actors as diverse as Robert Mitchum, James Stewart, Warren Beatty, and Meryl Streep. Ebert’s remarkable essays play a significant part in *Awake in the Dark* as well. The book contains some of Ebert’s most admired pieces,

among them a moving appreciation of John Cassavetes and a loving tribute to the virtues of black-and-white films. If Pauline Kael and Andrew Sarris were godmother and godfather to the movie generation, then Ebert is its voice from within—a writer whose exceptional intelligence and daily bursts of insight and enthusiasm have shaped the way we think about the movies. *Awake in the Dark*, therefore, will be a treasure trove not just for fans of this seminal critic, but for anyone desiring a fascinating and compulsively readable chronicle of film since the late 1960s. Based on the biblical story of Judge Deborah, "Deborah Awake" is the account of a young Burger King manager, who was also a divorced mother of two, and how this unlikely woman brought down the billion dollar corporation, Chariots, inc. In her role as a teen Sunday school teacher at the behemoth 10,000 member Kedish Community Church, Deborah was alarmed at the unhealthy identification her students nurtured with the Chariots line of immodest apparel, their chain of 900 Chariot mall outlets coast to coast, and her Christian student's fascination with the immoral "Chariots The Magazine." To Deborah's astonishment, she learned that John Sisera, the manager of the local Chariots store, not only contributed heavily to the Kedish Community Church youth department, was good friends with Pastor Randy the youth minister, and that John Sisera was also a prominent member of the Kedish Community Church council. Senior Pastor Barrak was unaware of the vile philosophy of the Chariots corporation, and of John Sisera's heavy influence on Pastor Randy and the youth department. The Sisera's,

**in Barak's opinion, were a fine Kedish Community Church family, and was unconcerned with the moral storm brewing in the youth department. God called on Deborah to do something about it, and to recruit Pastor Barak in the Battle. This volume covers aspects of sudden infant and early childhood death, ranging from issues with parental grief, to the most recent theories of brainstem neurotransmitters. It also deals with the changes that have occurred over time with the definitions of SIDS (sudden infant death syndrome), SUDI (sudden unexpected death in infancy) and SUDIC (sudden unexpected death in childhood). The text will be indispensable for SIDS researchers, SIDS organisations, paediatric pathologists, forensic pathologists, paediatricians and families, in addition to residents in training programs that involve paediatrics. It will also be of use to other physicians, lawyers and law enforcement officials who deal with these cases, and should be a useful addition to all medical examiner/forensic, paediatric and pathology departments, hospital and university libraries on a global scale. Given the marked changes that have occurred in the epidemiology and understanding of SIDS and sudden death in the very young over the past decade, a text such as this is very timely and is also urgently needed. **This study is an investigation of the experience of awake living utilizing the qualitative research model of heuristics. The heuristic model was decided to be most appropriate for studying the personal nature of the phenomenon, while assuring its scholarly and disciplined character. The goal was to arrive at the essential structure and meaning of the experience. Inquiry involved three phases: 1) Examining the literature; 2) Immersion into the researcher's own experience of awake living and; 3) Exploring the nature and meaning of awake living in others. Major phases of the process were immersion, incubation, illumination, explication and creative synthesis. Nine co-researchers shared descriptive data relating to their experience of awake living during taped, open-ended interviews. Taped data were transcribed and synthesized, and nine themes were derived. They are : questioning opens a doorway; opening the heart to self and others; interconnection; inspiring example of others; inspired by nature; awareness in the moment; and its two related sub-themes of effort towards mental stability and integration of light**

and shadow; appreciating differences; accepting change; and irrevocable decision. Awake living is a response to fundamental questions of the heart concerning the meaning and purpose of life. The questioning sparks a flame of inspiration leading to a new and increasingly authentic way of being. Implications are presented for psychotherapy and future research. A young Indian woman studying medicine in Winnipeg visits her home in Bombay and discovers her parents are planning an arranged marriage. Suddenly Winnipeg, which she does not like, looks much more attractive. One of eleven stories in a collection. Every anaesthetist reaches the end of their career with a collection of difficult airway experiences. From Birth to Five Years: Practical

**Developmental Examination is a step-by-step 'how to' guide to the developmental examination of pre-school children. This book has been developed alongside the original From Birth to Five Years as a companion volume that expands on the normative developmental stages outlined in Mary Sheridan's pioneering work in the field, by offering practical guidance for health, education and social care professionals, or anyone concerned with putting the theory behind children's developmental progress into practice in a real-life setting. This book is based on up-to-date research into current child development philosophies and practices, and aims to support the wider group of professionals that are required to assess children's developmental progress as part of their day-to-day working practices. The book begins with a practical framework for developmental examination, then progresses through each of the key physical, cognitive and social developmental assessment areas, offering guidance on enquiry and observation, and how to chart typical and atypical patterns, with 'red flags' for recognising significant delay or abnormality. Advice is also given on how to make sense of the findings and how best to communicate this information to parents. To consolidate and expand on the practical and theoretical information across this book and the original From Birth to Five Years, a new companion website is available at [www.routledge.com/cw/sharma](http://www.routledge.com/cw/sharma), which includes the following additional learning material: An interactive timeline of the key developmental domains Introductions to theory with links to further reading Research**

**summaries Video clips demonstrating practical assessment skills Clinical practice related to sleep problems and sleep disorders has been expanding rapidly in the last few years, but scientific research is not keeping pace. Sleep apnea, insomnia, and restless legs syndrome are three examples of very common disorders for which we have little biological information. This new book cuts across a variety of medical disciplines such as neurology, pulmonology, pediatrics, internal medicine, psychiatry, psychology, otolaryngology, and nursing, as well as other medical practices with an interest in the management of sleep pathology. This area of research is not limited to very young and old patientsâ€"sleep disorders reach across all ages and ethnicities. Sleep Disorders and Sleep Deprivation presents a structured analysis that explores the following: Improving awareness among the general public and health care professionals. Increasing investment in interdisciplinary somnology and sleep medicine research training and mentoring activities. Validating and developing new and existing technologies for diagnosis and treatment. This book will be of interest to those looking to learn more about the enormous public health burden of sleep disorders and sleep deprivation and the strikingly limited capacity of the health care enterprise to identify and treat the majority of individuals suffering from sleep problems. **Natural History to his slave Diocles. Fat, wheezing, imperious and prone to nosebleeds, Pliny does not believe in spending his evenings in repose: no -- to be awake is to be alive. There's no time to waste if he is to classify every element of the natural world in a single work. By day Pliny the Elder carries out his many civic duties and gives the occasional disastrous public reading. But despite his astonishing ambition to catalog everything from precious metals to the moon, and a collection of exotic plants sourced from the farthest reaches of the world, Pliny the Elder still takes immense pleasure in the common rose. After he rushes to an erupting Mt Vesuvius and perishes in the ash, his nephew, Pliny the Younger, becomes custodian of his life's work. But where Pliny the Elder saw starlight, Pliny the Younger sees fireflies...**
