Spiritual trailblazer Huston Smith has written comprehensive books about religion and a memoir of his own life, but nowhere has he merged the two elements of seeking and experience with such storytelling flair as he has in these pages. Few have done as much as Smith to explore and illuminate the world's religions and spiritual traditions, and none have done it with such accessibility, wonder, and delight. In this joyous volume, he looks back on his extraordinary life, describing riveting scenes with unforgettable characters in India, Africa, Tibet, and Japan. Smith's charm and exuberance come through on every page. What is time? How does our sense of time lead us to approach the world? How did the peoples of the past view time? This book answers these questions through an investigation of the cultures of time in Christianity, Islam, Buddhism, Judaism and the Australian Dreamtime. It argues that our contemporary world is blind as to the significance and complexity of time, preferring to believe that time is 'natural' and unchanging. This is of critical importance to historians since the base matter of their study is time, yet there is almost no theoretical literature on time in history. This book offers the first detailed historiographical study of the centrality of time to human cultures. It sets out the complex ways in which ideas of time developed in the major world religions, and the manner in which such conceptions led people both to live in ways very different to our contemporary world and to make very different kinds of 'histories'. It goes on to argue that modern scientific descriptions of time, such as Einstein's Theory of Relativity, lie much closer to the complex understandings of time in religions such as Christianity than they do to our 'common-sense' notions of time which are centred on progress through a past, present and future. "This is truly a major contribution to African American literary criticism, and it promises to elevate Johnson to the place in the literary firmament he so richly deserves." -- Henry Louis Gates, Jr., Harvard University Charles Johnson came of age during the Black Arts Movement of the 1960s and 1970s. His fiction bears the imprint of his formal training as a philosopher and his work as a journalist and cartoonist with a well-honed interest in political satire. Mentored by the American writer John Gardner, Johnson is preoccupied with questions of morality, which are informed by his knowledge of Continental and Asian philosophical traditions. In this book, Rudolph Byrd examines Johnson's four novels -- Faith and the Good Thing, Oxherding Tale, Middle Passage (National Book Award Winner), and Dreamer -- under the rubric of philosophical black fiction, as art that interrogates experience. Byrd contends that Johnson suspends, shelves, and brackets all presuppositions regarding African American life. This bracketing accomplished, the African American experience becomes a pure field of appearances within two poles: consciousness and the people or phenomena to which it is related. Johnson's principal themes are identity and liberation. Intent upon the liberation of perception, for the reader and the writer, Johnson's fiction aims at "whole sight," encompassing a plurality of meanings across a symbolic geography of forms, texts, and traditions from within the matrix of African American life and culture. And like a palimpsest, Johnson's texts contain multiple layers of meaning of disparate origins imprinted over time with varying degrees of visibility and significance. Charles Johnson's Novels will appeal to fans of the writer's work, but it also will serve as a helpful guide for readers newly introduced to this brilliant contemporary American writer. The death of the witness in the era of testimony: Primo Levi and Georges Perec. Sigmund Freud's Moses and Monotheism and the possibility of writing a traumatic history of religion. During the first half of the twentieth century, Zen Buddhist leaders contributed actively to Japanese imperialism, giving rise to what has been termed "Imperial-Way Zen" (Kodo Zen). Its foremost critic was priest, professor, and activist Ichikawa Hakugen (1902-1986), who spent the decades following Japan's surrender almost single-handedly chronicling Zen's support of Japan's imperialist regime and pressing the issue of Buddhist war responsibility. Ichikawa focused his critique on the Zen approach to religious liberation, the political ramifications of Buddhist metaphysical constructs, the traditional collaboration between Buddhism and governments in East Asia, the philosophical system of Nishida Kitaro (1876-1945), and the vestiges of State Shinto in postwar Japan. Despite the importance of Ichikawa's writings, this volume is the first by any scholar to outline his critique. In addition to detailing the actions and ideology of Imperial-Way Zen and Ichikawa's riposte to them, Christopher Ives offers his own reflections on Buddhist ethics in light of the phenomenon. He devotes chapters to outlining Buddhist nationalism from the 1868 Meiji Restoration to 1945 and summarizing Ichikawa's arguments about the causes of Imperial-Way Zen. After assessing Brian Victoria's claim that Imperial-Way Zen was caused by the traditional connection between Zen and the samurai, Ives presents his own argument that Imperial-Way Zen can best be understood as a modern instance of Buddhism's traditional role as protector of the realm. Turning to postwar Japan, Ives examines the extent to which Zen leaders have reflected on their wartime political stances and started to construct a critical Zen social ethic. Finally, he considers the resources Zen might offer its contemporary leaders as they pursue what they themselves have identified as a pressing task: ensuring that henceforth Zen will avoid becoming embroiled in international adventurism and instead dedicate itself to the promotion of peace and human rights. Lucid and balanced in its methodology and well grounded in textual analysis, Imperial-Way Zen will attract scholars, students, and others interested in Buddhism, ethics, Zen practice, and the cooptation of religion in the service of violence and imperialism. The quoit brooch style, a decorative style of animal and geometric motifs, is unique to southern England in the 5th century AD, with the greatest concentration of such items occurring in Kent. Flourishing in Emerging Adulthood highlights the third decade of life as a time in which individuals have diverse opportunities for positive development. There is mounting evidence that this time period, at least for a significant majority, is a unique developmental period in which positive development is fostered. Dr. Lene Arnett Jensen highlights the importance of this work in an engaging foreword, and chapters are written by leading scholars in diverse disciplines who address various aspects of flourishing. They discuss multiple aspects of positive development including how young people flourish in key areas of emerging adulthood (e.g., identity, love, work, worldviews), the various unique opportunities afforded to young people to flourish, how flourishing might look different around the world, and how flourishing can occur in the face of challenge. Most chapters are accompanied by first-person essays written by a range of emerging adults who exemplify the aspect of flourishing denoted in that chapter and make note of how choices and experiences have helped them transition to adulthood. Taken together, this innovative collection provides rich evidence and examples of how young people are flourishing as a group and as individuals in a variety of settings and circumstances. This unique resource will be useful to students, faculty,

professionals, clinicians, and university personnel who work with young adults or who study development during emerging adulthood. This book addresses the unique sociocultural and historical systems of oppression that have alienated African-American and other racial minority patients within the mental healthcare system. This text aims to build a novel didactic curriculum addressing racism, justice, and community mental health as these issues intersect clinical practice. Unlike any other resource, this guide moves beyond an exploration of the problem of racism and its detrimental effects, to a practical, solution-oriented discussion of how to understand and approach the mental health consequences with a lens and sensitivity for contemporary justice issues. After establishing the historical context of racism within organized medicine and psychiatry, the text boldly examines contemporary issues, including clinical biases in diagnosis and treatment, addiction and incarceration, and perspectives on providing psychotherapy to racial minorities. The text concludes with chapters covering training and medical education within this sphere, approaches to supporting patients coping with racism and discrimination, and strategies for changing institutional practices in mental healthcare. Written by thought leaders in the field, *Racism and Psychiatry* is the only current tool for psychiatrists, psychologists, administrators, educators, medical students, social workers, and all clinicians working to treat patients dealing with issues of racism at the point of mental healthcare.
