Advancing Business Ethics Education Nov 29 2020 This book features sixteen chapters written by distinguished scholars who collectively point to a roadmap for advancing business ethics education at a critical juncture in the history of corporate America. The editors frame the book with an introductory chapter that details a gold standard for delivering ethics in the business school curriculum that signals to students that ethics matters, provides an adequate counterbalance to the amoral subtext that dominates much of business education, remedies assessment problems associated with current accrediting standards, and prepares students for newly minted and fast-growing careers in ethics compliance, risk management, and corporate social responsibility. The chapters that follow lay out some challenges and opportunities that administrators and educators need to address in order to improve business ethics education and business school reputations in a post-Enron climate. Both traditional and experimental perspectives on delivering ethics in the curriculum are covered in conjunction with research that substantiates the potential for improving student ethics competencies after exposure to ethics coursework. Methods for incorporating ethics in various subjects, including accounting, corporate governance, environmentalism, global business, managerial decision making, and human resource management are also given as part of the roadmap for advancing business ethics education.
