**The Unbearable Lightness of Being Unbearable** Aug 02 2021 I don't consider myself the sharpest knife in the drawer, but I'm certainly not a spoon. I think about things. I put human nature under a microscope. Sometimes to my own peril. And I write about it. And politics, science, cosmology, relationships, sex, coffee, my angst, my weirdness, my cats & anything else that pops or chaps. But I think you will often find me quite humorous. Especially if you like sarcasm. Unless you're just blithely cruising through life, you'll notice there's a lot going on in this macrocosm of existence. This means there's a lot going on the microcosm of my brain. Not that there's anything "micro" about my brain. Anyway—here is a collection in which I share my thoughts, ruminations, suggestions, complaints and epiphanies where these "cosms" are concerned. Wear a helmet.

*Cell Phones: The Silent Killer or Just a Hoax?* Mar 09 2022 Table of Contents Introduction Understanding Radiation Concerning radiation produced from cell phones Why cell phones emit radiation? Understanding radiofrequency energy Non-ionizing versus Ionizing Radiation Frequency levels of different cell phone connections Radiofrequency energy and cancer Reasons for conflicting results in cell phone studies Conclusion on cancer risk from mobile phone usage Children vs. Adults: Who has a higher risk of developing cancer due to cell phone Usage? Factual dangers of mobile phones Reducing exposure to Mobile Phone radiation Concerning base stations and mobile phone antennas Scam products Conclusion Author Bio Publisher Introduction I want to thank and congratulate you for downloading the book, "Cell Phones: The Silent Killer or Just a Hoax?" This book offers the readers an overview of the technological world of cell phones and the effects of its usage on both the adults as well as children in order to improve the perceptions and precautions of

mobile phone usage. Given that mobile devices are being used in everyday life, it is necessary to understand some of the dangers that might be associated with their use. Most of you have probably heard about the 'carcinogenic' properties of cell phones which contribute to the growth of tumors and other types of cancer and this book comprehensively covers both topics in length so that the reader is well informed to make better choices with regard to mobile devices. Most of you have probably been using cell phones from a very young age, humans normally pick up after habits and trends that are new and resourceful. Perhaps some of you have undergone medical challenges which you think have been caused by cell phone usage. This is one of the reasons why this book has been written so that those individuals who lack the right knowledge understand the difference between what information is factual and what is not true. Every person deserves to attain wellness and that should be in every area of their life including their social lives. Cell phones play a key role in the World of social sphere, giving its users the ability to relate to friends and family and most importantly connect with other people in their World. Basically, it helps people to establish and maintain relationships with co-workers, friends and family members. There is, however, the difficult question as to whether it is safe to use it constantly. It is because of such arguments that we end up developing opinions on cell phone devices. This is a situation that cannot be addressed vaguely as it may actually end up affecting our health in the future, especially when we have to deal with difficult medical conditions.

Mobile Tech Report 2014 Sep 03 2021 If you read technology news, you'll notice it's not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter,

commentator and blogger on mobile technology, I've collected what happened in the industry in 2013 and make predictions on what will and won't happen in 2014. You can read what did happen in the mobile technology in 2013. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I'm surprised no one else has collected it and presented it for consideration. Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who's up, who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years.

He gave some boring answer about Moore's Law, but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won't and will happen in 2014 for the mobile technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, Blackberry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare, SnapChat and the carriers themselves Verizon, AT&T, Sprint and T-Mobile. You can also review my 2013 mobile predictions and see my track record on predictions. Finally there are some essays on how all this mobile tech is figuring into our lives. I've divided the news into the subjects it covers, but also put in the appendix all the news as it came out in chronological ordering. You can read the firehose of events in the appendix, or just read about one topic at a time in the earlier chapters. Table of Contents Preface Introduction Chapter 1: 2014 Predictions Chapter 2: Mobile Marketshare Chapter 3: Apple Chapter 4: Samsung Chapter 5: Google Chapter 6: Microsoft Chapter 7: Nokia Chapter 8: Blackberry Chapter 9: Amazon Chapter 10: Social Media Chapter 11: Yahoo Chapter 12: Carriers Chapter 13: 2013 Predictions Chapter 14: Essays Appendix

**Korea's Online Gaming Empire** Jul 13 2022 The rapid growth of the Korean online game industry, viewed in social, cultural, and economic contexts. In South Korea, online gaming is a cultural phenomenon. Games are broadcast on television, professional gamers are celebrities, and youth culture is often identified with online gaming. Uniquely in the online games market, Korea not only dominates the local market but has also made its mark globally. In Korea's Online Gaming Empire, Dal Yong Jin examines the rapid growth of this industry from a political economy perspective, discussing it in social, cultural, and economic terms. Korea has the largest percentage of broadband subscribers of any country in the world, and Koreans spend increasing amounts of time and money on Internet-based games. Online gaming has become a mode of socializing—a channel for human relationships. The Korean online game industry has been a pioneer in software development and eSports (electronic sports and leagues). Jin discusses the policies of the Korean government that encouraged the development of online gaming both as a cutting-edge business and as a cultural touchstone; the impact of economic globalization; the relationship between online games and Korean

society; and the future of the industry. He examines the rise of Korean online games in the global marketplace, the emergence of eSport as a youth culture phenomenon, the working conditions of professional gamers, the role of game fans as consumers, how Korea's local online game industry has become global, and whether these emerging firms have challenged the West's dominance in global markets.

**The Hitchhiker's Guide to Going Mobile** Dec 14 2019 "The Hitchhiker's Guide to Going Wireless" quickly established itself as the essential guide to mobile technology in South Africa. Going Mobile starts where Wireless left off and shows how the vision for the future is becoming a reality today. Wireless talked about the future high-speed wireless technology called WiMax, and already WiMax services are being offered commercially. The future is rushing up on us so fast that the time for a new edition of the Hitchhiker's Guide is now. As in Wireless, we ask the critical questions: What does it all mean? Where is it all going? How do ordinary people tap into this communication revolution? Here is a guide that once again catches the wave of interest and activity, that taps into the buzz, and also sets the mobile agenda for ordinary people and businesses throughout South Africa.

*Japanese Multinationals in China* Jul 01 2021 China is poised to gain global importance as a growth engine for the world economy on a par with Europe and the USA. Japanese multinational enterprises are increasingly active in relocating to China their R&D and capital- and knowledge-intensive production for both export-platform and target market reasons. It is at the juncture of the growing impact of China-related activities of Japanese corporations on the transformation of Japanese management philosophies, on the one hand, and the transformation of the Japanese economy more generally, on the other, that this book is situated. As Japanese corporations re-align activities to increasingly accommodate the growing importance of China as a business location, inter-regional expansion will integrate more deeply the Chinese economy within their global strategies, business structures and decision-taking. By presenting current research and thinking on the significance of corporate Japan's growing engagement with China, the book explores the following imminent questions: What is China's future position in the global corporate activities of Japanese firms? How has China's investment profile changed and how and with what purpose do Japanese firms enforce their Chinese presence? The book sheds light on the implications for European businesses and policy-makers of the consequences of deepening integration of these two economic powerhouses.

This book was published as a special issue of Asia Pacific Business Review.

Building Network Capabilities in Turbulent Competitive Environments Mar 17 2020 Since the start of the recent financial crisis, as most global firms struggle to remain competitive, an increasing number of Korean and Japanese firms have experienced an amazing rate of growth and expansion. Although academic researchers and business leaders in the United States, China, Brazil, India, and Europe seek out the secrets to these businesses' success, little is known about their business practices. Supplying an insider's perspective, *Building Network Capabilities in Turbulent Competitive Environments: Practices of Global Firms from Korea and Japan* unveils the strategic and operational practices that have allowed these firms to catch and surpass their competitors in North America and Europe. Based on fieldwork studies and extensive interviews with senior executives, it explains how these companies have developed and enhanced their core competencies through effective integration of product architecture, supply chain management, and IT strategy. The book provides practical insight into changing business patterns while avoiding extensive mathematical algorithms and drawn-out theoretical descriptions. It uses cutting-edge case studies to illustrate the innovative manufacturing strategies of these rapidly emerging companies. Accessible to anyone with a basic understanding of business, it reveals the organizational processes of strategy formulation and implementation that are required for success. Providing a clear understanding of both the career implications of the changing business landscape and how to deliver products and services that meet and exceed the needs of your customers, this book will help you develop the socio-technical skills needed to succeed in an increasingly competitive and turbulent business environment.
