Visitors Mar 03 2021 Suppose you could communicate with a visitor who was not from this place, time-space or even this dimension? What would you want to ask them? The answers probably lie in what our own response would be if we were them. This book is based on a collection of interviews I have had with a few individuals who may have actually had such an experience. The idea is that if enough of us are ready to ask the questions and gain the answers, then our collective knowledge and understanding of the "multiverse" about us can only continue to be enhanced. Sometimes the responses that you will read here are similar; often they are diametrically opposed to each other. An open but highly skeptical mind is extremely necessary if you are going to sift through the data that is presented in this book. The intent is that it should peak

your curiosity to learn more about "visitors." In this way, we may be better informed and prepared, and thus in some sort of coherent shape to deal with their arrival. If you read this book, you must be well prepared to choose for yourself what you will or will not believe.

Questions Are the Answer May 17 2022 2018 Nautilus Book Awards Silver Winner What if you could unlock a better answer to your most vexing problem—in your workplace, community, or home life—just by changing the question? Talk to creative problem-solvers and they will often tell you, the key to their success is asking a different question. Take Debbie Sterling, the social entrepreneur

who created GoldieBlox. The idea came when a friend complained about too few women in engineering and Sterling wondered aloud: "why are all the great building toys made for boys?" Or consider Nobel laureate Richard Thaler, who asked: "would it change economic theory if we stopped pretending people were rational?" Or listen to Jeff Bezos whose relentless approach to problem solving has fueled Amazon's exponential growth: "Getting the right question is key to getting the right answer." Great questions like these have a catalytic quality—that is, they dissolve barriers to creative thinking and channel the pursuit of solutions into new, accelerated pathways. Often, the moment they are voiced, they have the paradoxical effect of being utterly surprising yet instantly obvious. For innovation and leadership guru Hal Gregersen, the power of questions has always been clear—but it took some years for the follow-on question to hit him: If so much depends on fresh questions, shouldn't we know more about how to arrive at them? That sent him on a research quest ultimately including over two hundred interviews with creative thinkers. *Questions Are the Answer* delivers the insights Gregersen gained about the conditions that give rise to catalytic questions—and breakthrough insights—and how anyone can create them.
