Discover "How Howler the Wolf Got His Name," "Where Mrs. Quack Got Webbed Feet," and other Green Forest fables. Each tale is just a few pages long — ideal for quickly lulling children to sleep. General George Armstrong Custer and his wife, Libbie Custer, were wholehearted dog lovers. At the time of his death at Little Bighorn, they owned a rollicking pack of 40 hunting dogs, including Scottish Deerhounds, Russian Wolfhounds, Greyhounds and Foxhounds. Told from a dog owner's perspective, this biography covers their first dogs during the Civil War and in Texas; hunting on the Kansas and Dakota frontiers; entertaining tourist buffalo hunters, including a Russian Archduke, English aristocrats and P. T. Barnum (all of whom presented the general with hounds); Custer's attack on the Washita village (when he was accused of strangling his own dogs); and the 7th Cavalry's march to Little Bighorn with an analysis of rumors about a Last Stand dog. The Custers' pack was re-homed after his death in the first national dog rescue effort. Well illustrated, the book includes an appendix giving depictions of the Custers' dogs in art, literature and film. New Way, renowned for its phonic focus and success with generations of children, has always been committed to a balanced phonic approach. In this account of the growth of newspapers in modern, industrial society, Helen Hughes traces the development of a mass audience through analysis of the origins of the human interest story in the popular ballads of an earlier day. She shows how such commonly found interests as a taste for news of the town, ordinary gossip, and moving or gripping tales with a legendary or mythic quality have reflected the tastes of ordinary folk from the days of illiterate audiences to the present. She explains how these interests ultimately were combined with practical economic and political information to create the substance and demand for a popular press. In describing the rise and fall of newspaper empires, each with their special readership attractions, Dr. Hughes shows how technological innovation and idiosyncratic creativity were used by owners to capture and hold a reading audience. Once this audience

developed, it could be fed a variety of messages--beamed at reinforcing and maintaining both general and specific publics--as well as a view of the world consonant with that of the publisher and major advertisers. Hughes offers a persuasive argument for the continuing viability of this method for combined social control, instruction, and amusement captured by the association of news and the human interest story. His amazing life experience also includes being an oyster pirate, railroad hobo, gold prospector, sailor, war correspondent and much more. He wrote adventure novels & sea tales, stories of the Gold Rush, tales of the South Pacific and the San Francisco Bay area - most of which were based on or inspired by his own life experiences. The pre-1960 history of print culture and libraries, as they relate to the First Peoples of Canada, has gone largely untold. Paper Talk explores the relationship between the introduction of western print culture to Aboriginal peoples by missionaries, the development of libraries in the Indian schools in the nineteenth century, and the establishment of community-accessible collections in the twentieth century. While missionaries and the Department of Indian Affairs envisioned books and libraries as assimilative and civilizing tools, Edwards shows that some Aboriginal peoples articulated western ideas of print culture, literacy, books, and libraries as tools to assist their own cultural, social, and political aspirations. This text also serves to illustrate that the contemporary struggle of Aboriginal peoples in Canada to establish libraries in communities has a historical basis and that many of the obstacles faced today are remarkably similar to those encountered by earlier generations. Children's series fiction comprises tales incorporating innocence and hard reality along with romance, wit, and character. Heavy streaks of morality diminished as the entertainment element increased. Heroes performed in a wide range of adventures, but restrictions often kept heroines close to home. Series fiction peaked, then waned, but such writers as Beverly Cleary and Madeleine L Engle carried on the style." This book chronicles the history of The Sun, a New York newspaper published from 1833 until 1950. It was considered a serious paper, like the city's two more successful broadsheets, The New York Times and the New York Herald Tribune. Careers in Focus : Journalism contains profiles of more than 21 careers in this exciting field. Job profiles include: Art Directors Cartoonists Columnists Copy Editors Desktop Publishing Specialists Editorial and Research Assistants F. This book provides a rich and nuanced examination of children learning to read and write a second language in primary schools in Kenya, taught by teachers who themselves have often learned English as a second or third language. The author uses two case studies, of an urban and a rural school, to explore how different socioeconomic and cultural contexts can affect the enactment of language policies and their effect on literacy. This book contributes a unique perspective to studies in language and literacy education due to its distinctive exploration of young children learning to read and write in the English language in Kenya, and it will be of particular interest to students and scholars of applied linguistics, language education, bilingualism and language policy. The Greater Plains tells a new story of a region, stretching from the state of Texas to the province of Alberta, where the environments are as varied as the myriad ways people have inhabited them. These innovative essays document a complicated history of human interactions with a sometimes plentiful and sometimes foreboding landscape, from the Native Americans who first shaped the prairies with fire to twentieth-century oil regimes whose pipelines linked the region to the world. The Greater Plains moves beyond the narrative of ecological desperation that too often defines the region in scholarly works and in popular imagination. Using the lenses of grasses, animals, water, and energy, the contributors reveal tales of human adaptation through technologies ranging from the travois to bookkeeping systems and hybrid wheat. Transnational in its focus and interdisciplinary in its scholarship, The Greater Plains brings together leading historians, geographers, anthropologists, and archaeologists to chronicle a past rich with paradoxical successes and failures, conflicts and cooperation, but also continual adaptation to the challenging and ever-shifting environmental conditions of the North American heartland. For many, their first experience of the natural world is in the pages of books and in library collections--a Paper Zoo. This stunning book gathers together a wide

range of beautiful nature illustrations from the British Library's collections, including manuscripts, prints and drawings, and rare printed books, and featuring items from all around the world. With striking images of butterflies, beetles, spiders, animals, shells, fish and birds, the pages bring readers into contact with some of the world's most renowned natural history illustrators, such as Audubon and Catesby, and on expeditions to discover the lesser known rare finds as well. The text traces the story of the art of natural history from the Renaissance through the great age of exploration to the 19th century, to demonstrate how the collaboration between the fields of art and science has rendered such exquisite forms. The plates, all taken from books, are organized into several themed sections, though not on strict taxonomic grounds, but rather on broader themes of exotic, native, domestic, and paradoxical (with reference to what the species were at that time--for what is native now may well once have been exotic). A Manual for Newspaper Writing. Dog is the faithful but none-too-bright guardian of a chicken coop. He is plagued by fleas for which the wily fox offers a remedy. But the fox's plan misfires and Dog comes out the winner in the end. Pullout sections, poster supplements, contests, puzzles, and the funny pages--the Sunday newspaper once delivered a parade of information, entertainment, and spectacle for just a few pennies each weekend. Paul Moore and Sandra Gabriele return to an era of experimentation in early twentieth-century news publishing to chart how the Sunday paper became an essential part of American leisure. Transcending the constraints of newsprint while facing competition from other media, Sunday editions borrowed forms from and eventually partnered with magazines, film, and radio, inviting people to not only read but watch and listen. This drive for mass circulation transformed metropolitan news reading into a national pastime, a change that encouraged newspapers to bundle Sunday supplements into a panorama of popular culture that offered something for everyone. How cross-species companionship is figured across a variety of media--and why it matters. The animal stories produced around the turn of the 20th century have maintained a remarkable hold on the imagination of children worldwide. This book examines the performance of masculinity in these stories, particularly in light of the waning years of Victoria's reign when changing historical, political and social pressures altered the definition of masculinity. Topics covered include the roles of violence, rebellion, escape, spirituality, social hierarchies and law.
