Introduce the latest version of the fundamental SQL language used in all relational databases today with Casteel's ORACLE 12C: SQL, 3E. Much more than a study guide, this edition helps those who have only a basic knowledge of databases master the latest SQL and Oracle concepts and techniques. Learners gain a strong understanding of how to use Oracle 12c SQL most effectively as they prepare for the first exam in the Oracle Database Administrator or Oracle Developer Certification Exam paths. This edition initially focuses on creating database objects, including tables, constraints, indexes, sequences, and more. The author then explores data query techniques, such as row filtering, joins, single-row functions, aggregate functions, subqueries, and views, as well as advanced query topics. ORACLE 12C: SQL, 3E introduces the latest features and enhancements in 12c, from enhanced data types and invisible columns to new CROSS and OUTER APPLY methods for joins. To help readers transition to further studies, appendixes introduce SQL tuning, compare Oracle's SQL syntax with other databases, and overview Oracle connection interface tools: SQL Developer and SQL Plus. Readers can trust ORACLE 12C: SQL, 3E to provide the knowledge for Oracle certification testing and the solid foundation for pursuing a career as a successful database administrator or developer. The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ► an explanation of the key aspects of the CEFR for teaching and learning; ► a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre-A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ► a short report on the four-year development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ► promote and support the learning and teaching of modern languages; ► enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ► protect linguistic and cultural diversity in Europe; and ► promote the right to quality education

for all. En esta nueva edición (cuarta edición española correspondiente a la 21a edición americana del Manual de Mineralogía) se intenta conseguir un equilibrio entre conceptos y principios por una parte y el tratamiento más descriptivo y sistemático de la Mineralogía por otro. Este objetivo equilibrado requiere el tratamiento de muchos temas. No todos ellos pueden tratarse en un curso de un año y mucho menos en un curso semestral o trimestral. En esta edición, los capítulos 2 a 9 se refieren a los conceptos, principios y técnicas. Los capítulos 10 a 13 tratan de la Mineralogía sistemática y descriptiva. El capítulo 14 es una introducción a la Petrología y el capítulo 15 ofrece una introducción a las gemas más comunes. La meta propuesta en la elaboración de este libro de datos para la industria del cemento era lograr una descripción, lo más general y concisa posible, de los métodos de fabricación, de las máquinas y de los datos numéricos, diagramas y tablas de valores, Con esta limitación a lo más importante, el ingeniero dedicado al cemento dispondrá de bases válidas para su constante y rápida consulta. "This is the first translation into English of a priceless record of social, religious, economic, political, and institutional change in 12c. France. The Chronicle, which Abbot Pons (1138-1161) ordered his notary Hugh of Poitiers to write, is a passionate "

This accessible, hands-on text not only introduces students to the important topics in historical linguistics but also shows them how to apply the methods described and how to think about the issues; abundant examples and exercises allow students to focus on how to do historical linguistics. Distinctive to this text is its integration of the standard topics with others now considered important to the field, including syntactic change, grammaticalization, sociolinguistic contributions to linguistic change, distant genetic relationships, areal linguistics, and linguistic prehistory. Examples are taken from a broad range of languages; those from the more familiar English, French, German, and Spanish make the topics more accessible, while those from non-Indo-European languages show the depth and range of the concepts they illustrate. This second edition features expanded explanations and examples as well as updates in light of recent work in linguistics, including a defense of the family tree model, a response to recent claims on lexical diffusion/frequency, and a section on why languages diversify and spread. Presents a guide to the features and functions of the DAW software for recording, editing, and mixing audio and MIDI. One of the earliest troubadours, Marcabru was a remarkable artist and entertainer, and a figure of crucial importance to the development of the European courtly lyric. His blistering attacks on contemporary court society reveal an intellectual insider's view of the clash between clerical morality and the emerging secular ethics of love and courtesy. His fervent, often acerbic engagement with contemporary events also provides a unique

southern perspective on political upheavals and crusading movements in twelfth-century Occitania and northern Spain. This new critical edition, the first for nearly 100 years, makes his complete corpus accessible to a wide readership, supplying translations, full critical apparatus, and copious textual notes, with a substantial glossary of Marcabru's extraordinarily inventive vocabulary. The introduction supplies historical information, discussion of the poet's language, and an analysis of the manuscript transmission. It also raises fresh issues of troubadour versification techniques in this formative period, and engages in a new way with the current debate about editorial methodology and medieval textual criticism.

Leaflet blurb - see ANJ Vols. for Jan. 1958-Mar. 1976 include Repertorio bibliográfico. La industria aeroespacial es la segunda actividad más normada luego de las actividades nucleares; está regida por infinidad de normas, reglamentaciones, directivas, documentación específica y todo tipo de manuales de referencia obligatoria. La gran mayoría llega a manos de usuarios, operadores, talleristas, etc. en idioma inglés, el idioma de uso aeronáutico por naturaleza. A ello se suma el hecho de que la industria aeronáutica no está aislada de las actividades humanas, sino que interactúa, se nutre y hace su aporte a ellas creando la necesidad de un sólido vínculo interdisciplinario. Ahora bien, si bien conocemos la existencia de esta necesidad de creación de un fuerte vínculo interdisciplinario también sabemos que en esta tarea nos encontramos con una gran barrera en el mismo: la comunicación. A partir de esto es posible considerar varios impedimentos en esa "barrera". Uno de los más importantes es el idioma; como factor concurrente está el uso de "regionalismos" y, como consecuencia de ellos, la aplicación de "jergas específicas". Desde los albores de la aviación hemos convivido con ese problema; sucede que al incrementarse día a día el número de operaciones, al crecer el parque aeronáutico y convertirse la aviación en una necesidad para el resto de las actividades humanas, las condiciones inseguras, los incidentes y los accidentes continúan produciéndose, quedando de manifiesto las falencias de la industria en ese aspecto. Las nuevas tecnologías en materiales, los nuevos métodos de diseño y los planes de mantenimiento con técnicas de inspección no destructivas han reducido los riesgos latentes de fallas técnicas, pero no todos los aspectos relacionados con la vida humana puede solucionarlos la tecnología, por lo que en paralelo con los desarrollos tecnológicos, se han creado conceptos de gestión del factor humano que han contribuido en gran medida a la seguridad operacional y desde el año 1978 su estudio y prevención se ha expandido considerablemente, por lo que en todos los programas de estudio y mejoramiento de la interacción antropológica (CRM, MRM, LOFT, SHELL, etc.), la comunicación es un vínculo importantísimo en la seguridad operacional. Si trasladamos lo

expuesto a las tareas diarias, ya sea en la operación de una aeronave, en el mantenimiento de la misma, en el control del tránsito aéreo, en la administración de las empresas operadoras o en cualquier otra actividad relacionada con la industria aeroespacial, se presentará el problema del uso del idioma inglés, los “regionalismos” y las “jergas específicas”, factores tendientes a desencadenar una sucesión de eventos inseguros que podrían desembocar en un incidente o en un accidente de consecuencias catastróficas. Cuando se analiza la comunicación oral y escrita, es importante tener en cuenta que, si bien manejamos un vocabulario técnico en común, es inevitable, tanto en inglés como en español, el uso de regionalismos y “argot” (“jargon” en inglés). Por ejemplo, un técnico ecuatoriano hablará de “la bitácora de la aeronave”, mientras que uno argentino hablará de “la libreta historial de la aeronave”. Esta divergencia puede justificarse como un caso de regionalismos de países diferentes; ahora bien, en el segundo ejemplo, el mismo técnico argentino en la provincia de Buenos Aires, hablará de “chavetas para frenar un bulón”, mientras que otro técnico argentino, en Córdoba, hablará de “cupillas para frenar un bulón”. En paralelo, se puede ver también que los diferentes fabricantes tienen léxicos específicos con respecto a sus productos; por ejemplo, uno de los más conocidos fabricantes británicos de motores, posee un sistema propio de códigos de denominación y aplicación de Boletines de Servicio no mandatorios, muy distinto al que manejan sus competidores directos de Estados Unidos y Canadá.
