Consider Miles Davis, horn held high, sculpting a powerful musical statement full of tonal patterns, inside jokes, and thrilling climactic phrases—all on the fly. Or think of a comedy troupe riffing on a couple of cues from the audience until the whole room is erupting with laughter. Or maybe it's a team of software engineers brainstorming their way to the next Google, or the Einsteins of the world code-cracking the mysteries of nature. Maybe it's simply a child playing with her toys. What do all of these activities share? With wisdom, humor, and joy, philosopher Stephen T. Asma answers that question in this book: imagination. And from there he takes us on an extraordinary tour of the human creative spirit. Guided by neuroscience, animal behavior, evolution, philosophy, and psychology, Asma burrows deep into the human psyche to look right at the enigmatic but powerful engine that is our

improvisational creativity—the source, he argues, of our remarkable imaginal capacity. How is it, he asks, that a story can evoke a whole world inside of us? How are we able to rehearse a skill, a speech, or even an entire scenario simply by thinking about it? How does creativity go beyond experience and help us make something completely new? And how does our moral imagination help us sculpt a better society? As he shows, we live in a world that is only partly happening in reality. Huge swaths of our cognitive experiences are made up by “what-ifs,” “almosts,” and “maybes,” an imagined terrain that churns out one of the most overlooked but necessary resources for our flourishing: possibilities. Considering everything from how imagination works in our physical bodies to the ways we make images, from the mechanics of language and our ability to tell stories to the creative composition of self-consciousness, Asma expands our personal and day-to-day forms of imagination into a grand scale: as one of the decisive evolutionary forces that has guided human development from the Paleolithic era to today. The result is an inspiring look at the rich relationships among improvisation, imagination, and culture, and a privileged glimpse into the unique nature of our evolved minds. A collection of valiant vessels and storied sea captains from years past, *Pirates and Pickled Heads* is an eclectic look at some of Scotland's most unusual maritime stories. Within four sections spanning the personalities, ships, places, and pirates of Scotland, you'll discover an intriguing nautical history nestled among sweeping sea views and lush coastal landscapes. From tales of warrior lords and privateers to the mystery of the Maggie Smith, and the strange legend of the remote island of Rona, you'll explore the unique seafaring history of Scotland. Patch, Chloe, and the other souls of the Terrabite, known as the Gulch Cemetery, only want one thing. They must retrieve their hearts from the evil entity that has captured their beating organ. They need their hearts to once again celebrate Halloween, their favorite holiday, even though they are dead-dead. What is a Terrabite you ask? Well that will be revealed in the pages of this tale. Arterial A. Flow, the resident evil one, keeps his captured hearts close and wants you to remember that there are more than two places you can go when you die and every Halloween needs a pickle. The natural history museum is a place where the line between "high" and "low" culture effectively vanishes--where our awe of nature, our taste for the bizarre, and our thirst for knowledge all blend happily together. But as Stephen Asma shows in *Stuffed Animals and Pickled Heads*, there is more going on in these great institutions than just smart fun. Asma takes us on a wide-ranging tour of natural history museums in New York and Chicago, London and Paris, interviewing curators, scientists, and exhibit designers, and providing a wealth of fascinating observations. We learn how the first museums were little more than high-toned side shows, with such garish exhibits as the pickled head of Peter the Great's lover. In contrast, today's museums are hot-beds of serious science, funding major research in such fields as anthropology and archaeology. "Rich in detail, lucid explanation, telling anecdotes, and fascinating characters.... Asma has rendered a fascinating and credible account of how natural history museums are conceived and presented. It's the kind of book that will not only engage a

wide and diverse readership, but it should, best of all, send them flocking to see how we look at nature and ourselves in those fabulous legacies of the curiosity cabinet."--The Boston Herald. Frederick Fritzschenburg, 80 years old and dying in hospital, is a second generation Australian of German descent. Rejected by his mother at birth and raised by his Grossmutter and Grossvater, Frederick recalls a life torn by two world wars and the Great Depression; a life of uncertainty and anguish, of disappointment, human frailties, and estranged relationships, in which Frederick wants nothing more than to rekindle the special childhood bond that existed between himself and his Grossmutter. Follow the mischievous and hilarious adventures of four grammar school-age boys growing up in the late 1920s. The good, not-so-good, and hilarious situations the four boys became involved in on a day-to-day basis are insights into what city boys did to keep themselves busy during school days, after school was out for the summer and on

weekends in Berwyn, Illinois. Lacking the many entertainment forms of modern society, the young boys of the late 1920s spent much of their time roaming the city streets and parks, riding the elevated train, finding other forms of entertainment, and sometimes seeking scary adventures. Mr. Pickle is an amazing enigma. The children for which he is responsible, are constantly amazed by the adventures that seem to "just happen". Far from being Mary Poppins, Mr. Pickle always seems to be confused and befuddled. Something rotten has taken root! But what they unearth is a pretty rotten bunch! That gnarly old lettuce head, The Romaine Gladiator, rises from the garden patch with dastardly plans to reunite the Brotherhood of Evil Produce! Can the Magic Pickle make a knuckle sandwich out of those notorious no-good veggies before their seeds of destruction destroy the world? Digitization projects, infotainment, and the Internet are redefining the library's and the museum's roles in the community. What are the implications for the future of these institutions? The authors examine, and set out an exciting vision of, a new library-museum hybrid. The juxtaposition of library collections and museum artefacts, they assert, has the potential to create authentic, interactive experiences, and can help establish a distinct, meaningful, and sustainable role for libraries. In the authors' words, libraries can then "reassert themselves as places devoted to contemplation, wonder, knowledge acquisition, and critical inquiry". Commercialization, edutainment, and the library as a learning community are just some of the fascinating topics addressed as the authors explore the future's terrain, and how libraries might situate themselves upon it.
