**Principles and Practice of Mechanical Ventilation** Nov 24 2022 Audience: Critical Care Physicians, Pulmonary Medicine Physicians; Respiratory Care Practitioners; Intensive Care Nurses Author is the most recognized name in Critical Care Medicine Technical and clinical developments in mechanical ventilation have soared, and this new edition reflects these advances Written for clinicians, unlike other books on the subject which have primarily an educational focus Neonatal Respiratory Disorders, 2Ed Aug 09 2021 Lung disease is a major indication for the admittance of the neonate to a specialist intensive care unit, and is a particularly common complication in the pre-term baby where the lungs are insufficiently developed at birth and easily damaged by early treatments. As a consequence, this is an area of intensive international research activity. In this Care of the Critically Ill Patient Jan 02 2021 Nine years have passed since the first edition of Care of the Critically Ill Patient was published. As its editors Maurice Rapin and I were fortified

by the many positive and helpful comments of reviewers and readers: the work appeared to have fulfilled our original aims and objectives. Intensive care medicine has, of course, advanced and changed in many ways since 1982 and it therefore seemed appropriate to consider the preparation of a second edition. Encouraged by the reception of the first and the timely prompting of the publishers we began, in 1986, to prepare for a new edition. Caring for critically ill patients is of universal concern and we were therefore delighted when Warren Zapol joined us as C'n editor widening our international base. The three of us subsequently spent many happy and productive times together planning the content, priorities, scale and contributions for the new edition. A great tragedy then overcame us: Maurice Rapin died suddenly. His death deprived us of a true friend and colleague who had been an international pioneer during the development of intensive care medicine. I will always remember, with affection and professional pride, the many hours he and I worked together in preparing the first edition of this book and also as founding editors of the now firmly established journal Intensive Care Medicine. An obituary, written by Warren Zapol, that appeared in the journal follows the Preface. *The Newborn Lung* Feb 15 2022 Dr. Richard Polin's Neonatology Questions and Controversies series highlights the most challenging aspects of neonatal care, offering trustworthy guidance on up-to-date diagnostic and treatment options in the field.
