Reverse Phase Protein Arrays Mar 03 2021 This book provides practical guidance on all aspects of reverse phase protein array (RPPA) technology, which permits the quantification of protein levels in cell or tissue lysates. In addition, the latest results are presented from laboratories across the world where experts are successfully running the challenging RPPA data platform. After an introductory chapter by the inventor of the RPPA technique, the demanding task of lysate preparation is explained. Subsequent chapters review printing platforms and analytical platforms and discuss antibody screening in detail. The role of RPPA data in integrative analyses is thoroughly examined, and the various applications of RPPA, for example to identify molecular targeting drugs or evaluate cancer drug efficacy, are discussed with reference to the latest knowledge. It is hoped that the book will foster the implementation of RPPA by documenting the practical details of the technology and by revealing its great potential. It will be of high value for researchers who plan to build an RPPA platform in their institute and for researchers, clinicians, and companies who use RPPA through collaboration with an existing RPPA facility.

The Long Evolution of Brains and Minds May 17 2022 The main topic of the book is a reconstruction of the evolution of nervous systems and brains as well as of mental-cognitive abilities, in short "intelligence" from simplest organisms to humans. It investigates to which extent the two are correlated. One central topic is the alleged uniqueness of the human brain and human intelligence and mind. It is discussed which neural features make certain animals and humans intelligent and creative: Is it absolute or relative brain size or the size of "intelligence centers" inside the brains, the number of nerve cells inside the brain in total or in such "intelligence centers" decisive for the degree of intelligence, of mind and eventually consciousness? And which are the driving forces behind these processes? Finally, it is asked what all this means for the classical problem of mind-brain relationship and for a naturalistic theory of mind.
