**PC-8001A Micro Computer User's Manual** Mar 16 2022

*Z - 248 PC Series Computers* Jan 26 2023 This manual has been prepared for ... the new computer owner and user.-Welcome.

**The Apollo Guidance Computer** Oct 11 2021 The technological marvel that facilitated the Apollo missions to the Moon was the on-board computer. In the 1960s most computers filled an entire room, but the spacecraft's computer was required to be compact and low power. Although people today find it difficult to accept that it was possible to control a spacecraft using such a 'primitive' computer, it nevertheless had capabilities that are advanced even by today's standards. This is the first book to fully describe the Apollo guidance computer's architecture, instruction format and programs used by the astronauts. As a comprehensive account, it will span the disciplines of computer science, electrical and aerospace engineering. However, it will also be accessible to the 'space enthusiast'. In short, the intention is for this to be the definitive account of the Apollo guidance computer. Frank O'Brien's interest in the Apollo program began as a serious amateur historian. About 12 years ago, he began performing research and

writing essays for the Apollo Lunar Surface Journal, and the Apollo Flight Journal. Much of this work centered on his primary interests, the Apollo Guidance Computer (AGC) and the Lunar Module. These Journals are generally considered the canonical online reference on the flights to the Moon. He was then asked to assist the curatorial staff in the creation of the Cradle of Aviation Museum, on Long Island, New York, where he helped prepare the Lunar Module simulator, a LM procedure trainer and an Apollo space suit for display. He regularly lectures on the Apollo computer and related topics to diverse groups, from NASA's computer engineering conferences, the IEEE/ACM, computer festivals and university student groups.

The Home Owner's Manual Jan 22 2020 At Last! A

Beginner's Guide to Home Technology Water stains on your ceiling. Dents and cracks in your drywall. Radiators that hiss and gurgle all night long. It's enough to make you cry out, "Why doesn't my house come with an owner's manual?" And now—finally!—it does. Through step-by-step instructions and helpful schematic diagrams, *The Home Owner's Manual* explores hundreds of frequently asked questions: What's the best way to fix a leaky faucet? When should I have my chimney cleaned? How can I reset a circuit breaker without electrocuting myself? Whatever your concerns, you'll find the answers here—courtesy of licensed building contractor Dan Ramsey, who has taught the basics of renovation to thousands of homeowners.

*SWATHGEN Computer-aided Design System User's Manual* Aug 29 2020 SWATHGEN is an interactive computer-aided design program for SWATH ships, written in FORTRAN 77 on a VAX 11/780. It uses TEMPLATE graphics software for plotting. This program produces faired hull forms, including fairing of the strut-lower hull intersection. SWATHGEN interfaces with a resistance calculation program, REPOW, and a wave resistance optimization program, OPTVOL, which contours the lower hull to minimize wave resistance. Swathgen produces a complete mathematical description of the hull surface geometry using parametric cubic splines. This description is used to produce plots (Stations, Waterlines and 3-D Views), to calculate hydrostatic properties and to generate a source panel distribution for wave resistance calculations. (Author).
