NASA Apollo 11 Aug 21 2022 On July 20, 1969, US astronauts Neil Armstrong and Buzz Aldrin became the first men to walk on the moon. The Apollo 11 mission that carried them and fellow astronaut Michael Collins on their epic journey marked the successful culmination of a quest that, ironically, had begun in Nazi Germany thirty years before. This is the story of the Apollo 11 mission and the 'space hardware' that made it all possible. Author Chris Riley looks at the evolution and design of the mighty Saturn V rocket, the Command and Service Modules, and the Lunar Module. He also describes the space suits worn by the crew, with their special life support systems. Launch procedures are described, 'flying' the Saturn V, navigation, course correction 'burns', orbital rendezvous techniques, flying the LEM, moon landing, moon walk, take-off from the moon, and earth re-entry procedure. Includes performance data, fuels, biographies of Armstrong, Aldrin and Collins, Gene Kranz and Werner von Braun. Detailed appendices cover all of the Apollo missions, with full details of crews, spacecraft names and logos, mission priorities, moon landing sites, and the Lunar Rover.

[Fire and Rescue Service operational guidance - incidents in tunnels and underground structures](#) Jul 20 2022 This publication presents a framework for a safe system of work for operations at incidents involving tunnels and underground structures. It provides a robust yet flexible insight that can be adapted to the nature, scale and requirements of the incident. Incidents involving tunnels and underground structures may place significant demands on local fire and rescue services and have often required a national co-ordinated response from across the country. This type of incident may generate intense media attention where the operations of the emergency services are rigorously scrutinised. Whilst much of this attention is approving it will invariably focus on the preparedness of the emergency services and their operational effectiveness.

[Apollo by the Numbers](#) Mar 16 2022 This work is a unique collection of valuable statistical information about Project Apollo. It includes a chapter (about 20 pages each) for Apollo 1 through Apollo 17. There are several data tables for each mission, plus a 50-page section with additional statistics and tables that merge data for each mission so you can easily make comparisons. Tables include launch and ascent data, fuel consumption, stage impact locations, very detailed mission timelines, and much more.

Mac OS X Unwired Jun 07 2021 Mac OS X Unwired introduces you to the basics of wireless computing, from the reasons why you'd want to go wireless in the first place, to setting up your wireless network or accessing your wireless services on the road. The book provides a complete introduction to all the wireless technologies supported by Mac OS X, including Wi-Fi (802.11b and g), infrared, Bluetooth, CDMA2000, and GPRS. You'll learn how to set up your first wireless network and how use the Mac OS X software that supports wireless, such as iSync, iChat, and Rendezvous. You'll also get a good understanding of the limitations and liabilities of each wireless technology. Other topics covered in the book include: Using wireless at home, in the office, or on the road Connecting to wireless hotspots Wireless Security Mac OS X Unwired is a one-stop wireless information source for technically savvy Mac users. If you're considering wireless as an alternative to cable and DSL, or using wireless to network computers in your home or office, this book will show you the full-spectrum view of wireless capabilities of Mac OS X, and how to get the most out of them.

NASA Saturn V 1967-1973 (Apollo 4 to Apollo 17 & Skylab) Mar 24 2020 Few launch vehicles are as iconic and distinctive as NASA's behemoth rocket, the Saturn V, and none left such a lasting impression on those who watched it ascend. Developed with the specific brief to send humans to the Moon, it pushed rocketry to new scales. Its greatest triumph is that it achieved its goal repeatedly with an enviable record of mission success. Haynes' Saturn V Manual tells the story of this magnificent and hugely powerful machine. It explains how each of the vehicle's three stages worked; Boeing's S-IC first stage with a power output as great as the UK's peak electricity consumption, North American Aviation's S-II troubled second stage, Douglas's workhorse S-IVB third stage with its instrument unit brain - as much a spacecraft as a rocket. From the decision to build it to the operation of its engines' valves and pumps, this lavishly illustrated and deeply informative book offers a deeper appreciation of the amazing Saturn V.

Airport Services Manual Apr 17 2022 In accordance with ICAO provisions, countries are required to establish at every airport an emergency plan commensurate with the aircraft operations and other activities conducted at the airport. This manual will assist countries in the implementation of these specifications and thereby ensure their uniform application. Covers pre-planning for airport emergencies, as well as co-ordination between the different airport agencies and those of the surrounding community that could be of assistance in responding to an emergency. Includes a sample emergency exercise critique form, glossary, and references. Illustrated.

Buncefield Sep 10 2021 The Explosion and fire at the Buncefield Oil Storage Depot involved 22 tanks. The main fires were extinguished in three days but the overall fire response lasted 26 days and 642 fire appliances were moved to the incident. This report sets out the chronological sequence of events and reviews the fire response. It covers pre-planning and pre-training; the response of the Hertfordshire Fire and Rescue Service; the response by other fire provider and supporting organisations; and presents the learning points of local, national, and international significance, which are drawn both from good practice at the incident and the areas that could have been improved.

Apollo Dec 01 2020 This book provides an overview of the origins of the Apollo program and descriptions of the ground facilities, launch vehicles and spacecraft that were developed in the quest to reach – and return from - the surface of the moon. It will serve as an invaluable single-volume sourcebook for space enthusiasts, space historians, journalists, and others. The text includes a comprehensive collection of tables listing facts and figures for each mission.

[Telepresence](#) Jun 26 2020 Telepresence is enabling human interaction at a distance, creating a sense of being present at a remote location. In the next millennium we are certain to be increasingly 'telepresent' both at work and at play, with an expanding market for telepresence services. As we move from a physical to an information economy, demand will grow for services which transport bits not atoms and which support the output of the human mind. Moreover, technology continues to advance at an unprecedented rate, and it could be suggested that we are reaching key breakpoints in client processing power and global network interconnectivity. In practice, telepresence systems utilise a very wide range of technologies. In compiling this book the editors have included chapters from across these technologies which they have broadly classified as audio, data, video and virtual environments. Telepresence gives a flavour of the exciting developments in telepresence and teleconferencing technologies being researched and developed within BT. Just as the telephone began changing the world a century ago, so will telepresence one day alter the way we live, think, do business and react to the world around us. The potential for these technologies is staggering, the implications mind-boggling. Building on a strong base of established audiovisual conferencing and interactive multimedia services, BT and MCI are leading the way in defining the commercial applications of telepresence that will shape the future of global telecommunication. Telepresence is a snapshot of these groundbreaking activities and conveys the complexity, uncertainty and enthusiasm involved in this challenging and exciting work. It is essential reading for all researchers, engineers and managers working in this stimulating field.

Fire Service Manual Oct 23 2022 This Fire and Rescue Manual is the first manual within the Fire Service Operations series dedicated to the protection of the environment. This publication provides information and guidance designed to support firefighters, Fire Brigade Service managers and trainers in their work at operational incidents, training events and during day-to-day activities. This manual contains guidance for Fire and Rescue Services (FRSs) on preventing and if necessary, dealing with incidents with the potential to pollute. Through its guidance this manual also ensures FRSs can help minimise their own impact on the environment by providing advice on how to prevent pollution from their own premises. This new Fire and Rescue Service manual is essential reading for Fire and Rescue Service managers and those involved in incident response across all of the emergency services.
