Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews. "Changing Focus" recounts Kodak's roller-coaster history, including a string of failed product launches, management blunders, and ill-conceived attempts to diversify. Readers see today's Kodak struggling to revitalize itself, beginning with a portrait of CEO George Fisher, who has been charged with the daunting task of remaking one of the world's largest companies. Photo insert. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. The damage that incompetent managers do is incalculable. Every year they wipe tens of billions off the value of companies around the world. But routinely incompetent behaviour is covered up, incompetent managers paid off and causes swept under the carpet. Yet there is a great deal to be learned from failure. This book will help managers and leaders at all levels to not only identify and weed out incompetence, but avoid it altogether. Morgen Witzel tackles the problem of incompetence in the round by exploring the political, cultural, psychological and personal factors that lead to incompetency at the top, including arrogance, excessive reliance on formal plans and metrics, lack of professional pride and poor and misguided business education and training. Using international case studies from Ford Motor Company, Royal Ahold and Lehman Brothers, practical solutions are provided for avoiding incompetence by changing the culture within organizations and the ways in which managers

are trained and developed to truly manage for success and minimise failure. Celebrating the camera and the art of the photograph, created in collaboration with the George Eastman House, spans almost 200 years, from the first faint image ever caught to today's state-of-the-art digital equipment. The includes insightful essays by Steve Sasson (inventor of the digital camera) and Alexis Gerard (visionary founder of Future Image Inc.), tracing the camera's development, the lives of its inventors, and the artists behind the lens. Images of more than 350 cameras from the George Eastman House Collection, plus historic photos, ads, and drawings, complement the text. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Provides lists of selling prices of items found on eBay in such categories as antiques, boats, books, cameras, coins, collectibles, dolls, DVDs, real estate, stamps, tickets, and video games.
