Pharmaceutical Medicine provides an accessible, user-friendly and up-to-date guide for those involved in clinical trials or marketing of new medicines in the pharmaceutical industry. How do you write good research articles -- articles that are interesting, compelling, and easy to understand? How do you write papers that influence the field instead of falling into obscurity? Write It Up offers a practical and revealing look at how productive researchers write strong articles. The book's guiding idea is that academics should write to make an impact, not just to get something published somewhere. Your work will be more influential if you approach it reflectively and strategically. Based on his experience as an author, journal editor, and reviewer, Paul Silvia offers systematic approaches to problems like picking journals; cultivating the right tone and style; managing collaborative projects and co-authors; crafting effective Introduction, Method, Results, and Discussion sections; and submitting and resubmitting papers to journals. With its light-hearted style and practical advice, Write It Up will help graduate students struggling with writing their first paper, early career professors who need advice on how to write better articles, and seasoned academic writers looking to refresh their writing strategy or style. Dewey. Bellow. Strauss. Friedman. The University of Chicago has been the home of some of the most important thinkers of the modern age. But perhaps no name has been spoken with more respect than Turabian. The dissertation secretary at Chicago for decades, Kate Turabian literally wrote the book on the successful completion and submission of the student paper. Her Manual for Writers of Research Papers, Theses, and Dissertations, created from her years of experience with research projects across all fields, has sold more than seven million copies since it was first published in 1937. Now, with this seventh edition, Turabian's Manual has undergone its most extensive revision, ensuring that it will remain the most valuable handbook for writers

at every level—from first-year undergraduates, to dissertation writers apprehensively submitting final manuscripts, to senior scholars who may be old hands at research and writing but less familiar with new media citation styles. Gregory G. Colomb, Joseph M. Williams, and the late Wayne C. Booth—the gifted team behind *The Craft of Research*—and the University of Chicago Press Editorial Staff combined their wide-ranging expertise to remake this classic resource. They preserve Turabian's clear and practical advice while fully embracing the new modes of research, writing, and source citation brought about by the age of the Internet. Booth, Colomb, and Williams significantly expand the scope of previous editions by creating a guide, generous in length and tone, to the art of research and writing. Growing out of the authors' best-selling *Craft of Research*, this new section provides students with an overview of every step of the research and writing process, from formulating the right questions to reading critically to building arguments and revising drafts. This leads naturally to the second part of the *Manual for Writers*, which offers an authoritative overview of citation practices in scholarly writing, as well as detailed information on the two main citation styles ("notes-bibliography" and "author-date"). This section has been fully revised to reflect the recommendations of the fifteenth edition of *The Chicago Manual of Style* and to present an expanded array of source types and updated examples, including guidance on citing electronic sources. The final section of the book treats issues of style—the details that go into making a strong paper. Here writers will find advice on a wide range of topics, including punctuation, table formatting, and use of quotations. The appendix draws together everything writers need to know about formatting research papers, theses, and dissertations and preparing them for submission. This material has been thoroughly vetted by dissertation officials at colleges and universities across the country. This seventh edition of *Turabian's Manual for Writers of Research Papers, Theses, and Dissertations* is a classic reference revised for a new age. It is tailored to a new generation of writers using tools its original author could not have imagined—while retaining the clarity and authority that generations of scholars have come to associate with the name Turabian. This book on doctoral writing offers a refreshingly new approach to help Ph.D. students and their supervisors overcome the host of writing challenges that can make—or break—the dissertation process. The book's unique contribution to the field of doctoral writing is its style of reflection on ongoing, lived practice; this is more readable than a simple how-to book, making it a welcome resource to support doctoral writing. The experiences and practices of research writing are explored through bite-sized vignettes, stories, and actionable 'teachable' accounts. *Doctoral Writing: Practices, Processes and Pleasures* has its origins in a highly successful academic blog with an international following. Inspired by the popularity of the blog (which had more than 14,800 followers as of October 2019) and a desire to make our six years' worth of posts more accessible, this book has been authored, reworked, and curated by the three editors of
