All Bill wanted out of life was to be a normal bloke, and part of someone's life... preferably a female's life. On first glance, a reader might think this book is just another painful and sad love story, but that is not so. Bill was a walking live example of avoidable human disaster and bad luck... a sort of modern-day Medusa with an unforeseen hilarious side. The love part of this story was much more challenging, especially for all those helpful mates in the bush who had made a vow to help resolve Bill's biggest problem... finding a woman to love him. Then there are all the other interesting stories that just sort of happened around Bill... Remember, these are all true stories. Please do enjoy the reading as I did in writing them. The definitive story of the Mitsubishi Lancer Evolution in top-class rallying - an adventure that began in 1993, and finally came to an end over a decade later. Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. The Group B cars marked one of the most thrilling yet most tragic periods in the history of world rallying and beyond. The 037, the S4, the EVC and the ECV2, "ephemeral player" of a still-born Group S, were the unforgettable protagonists of the 1982-1986 seasons that for the Lancia marque were constellated by a series of World, European and Italian titles, but also by terrible accidents that cost the lives of Attilio Bettega, Henri Toivonen and Sergio Cresto. Sergio Remondino, a historic journalist and great expert in the multifaceted field of rallying, traces that unforgettable era, year by year, through a text rich in anecdotes and thanks to the contribution of the engineer Sergio Limone, one of the artificers of the Group B cars. This invaluable book is completed by the evocative images of Reinhard Klein, one of the most successful rallying photographers. For 30 years some of the most talented and bravest drivers have battled across the continents of the world to claim what is arguably motorsport's toughest prize: the World Rally Championship. Now a multi-million dollar, global technology battle and terrestrial television phenomenon played out over the frozen wastes of Finland, the dusty plains of Australia and the sun-kissed mountain roads of Corsica, the WRC has reached its 30th birthday. This book celebrates that important milestone and paints an exhaustively detailed picture of the people and personalities who have shaped this great sport. The Complete Book of the World Rally Champions provides a biographical account of the 65 men who have won at least one World Championship Rally since 1973. The biographies are compiled by the sport's leading writers and historians and complemented by stunning photography. The book includes a detailed and accurate statistical career record of each driver, plus highlights of all the significant cars. This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle. Includes 27,000 codes for 2,500 games (console/PC) with special accessory review section! Worldwide Edition: Stairway to the Destined World And more! From the author of Booker Prize finalist The Sisters Brothers: "Viciously hilarious . . . deWitt's portrayal of the drinking life is staunchly unromantic." —Time Out New York In a famous, but declining, Hollywood bar works a barman, morbidly amused by the decadence of his surroundings. He quietly observes as the patrons fall into their nightly oblivion, taking notes for his novel. In the hopes of uncovering their secrets and motives, he establishes tentative friendships with a cast of variously pathological regulars. But as his tenure at the bar continues, he begins to serve himself more often than his customers, and the time he spends outside the bar becomes more and more painful. He loses his wife, his way, himself. Trapped by habits and loneliness, the barman realizes he will not survive if he doesn't break free. And so he hatches a terrible, necessary plan of escape and redemption. "Sharp and

bitter and funny” (Los Angeles Times), Ablutions steps behind the bar and goes below rock bottom for a brilliant new twist on the classic tale of addiction and its consequences “so punctuated with tiny, heartbreaking moments of grace—it becomes impossible to put the book down” (Portland Mercury). “Dark and provocative . . . ‘Ablutions’ has achieved something remarkable.” —The New York Times Book Review “Melancholic, sentimental, and very funny.” —Harper’s Bazaar (UK) “As heartbreaking as it is hilarious . . . an utterly compelling novel.” —The Believer

Transport Revolutions: Moving People and Freight without Oil sets out the challenges to our growing dependence on transport fuelled by low-priced oil. These challenges include an early peak in world oil production and profound climate change resulting in part from oil use. It proposes responses to ensure effective, secure movement of people and goods in ways that make the best use of renewable sources of energy while minimizing environmental impacts. Transport Revolutions synthesizes engineering, economics, environment, organization, policy and technology, and draws extensively on current data to present important conclusions. The authors argue that land transport in the first half of the 21st century will feature at least two revolutions. One will involve the use of electric drives rather than internal combustion engines. Another will involve powering many of these drives directly from the electric grid - as trains and trolley buses are powered today - rather than from on-board fuel. They go on to discuss marine transport, whose future is less clear, and aviation, which could see the most dramatic breaks from current practice. With its expert analysis of the politics and business of transport, Transport Revolutions is essential reading for professionals and students in transport, energy, town planning and public policy.
