In *You've Come a Long Way, Baby*, Lilly J. Goren and an impressive group of contributors explore the remarkable advancement achieved by American women in a historically patriarchal social and political landscape, while examining where women stand today and contemplating the future challenges they face worldwide. As comprehensive as it is accessible, *You've Come a Long Way, Baby* appeals to anyone interested in confronting the struggles and celebrating the achievements of women in modern society. "Eight years after the Taliban was ousted from government, an insurgency rages in Afghanistan, drug barons and war lords rule the turf, and the truth remains unspoken. In *Bitter Roots, Tender Shoots: The Uncertain Fate of Afghanistan's Women*, author Sally Armstrong confronts unspoken truths and unravels the threads that are strangling Afghanistan's attempts to join the twenty-first century. A veteran reporter, Armstrong interviews women and girls from all walks of life, focusing on the change-makers—the women activists, journalists, politicians, and lawyers who have taken on the dangerous task of altering the status quo and yanking Afghanistan out of its primitive past. Combining the personal stories of women with the analysis of experts and the grassroots efforts of Canadians, *Bitter Roots, Tender Shoots* is an accurate and impassioned portrayal of the contemporary lives of women and girls in Afghanistan."--book desc. 2009, amazon.ca. The *End Of The Peace Process* is a new edition of Edward Said's passionate critique of the Oslo Accord and its aftermath, updated to include around twenty new essays about the events of 2000-1. Said brilliantly analyses the deficiencies of Oslo, and the reasons why the subsequent Middle East peace process failed so disastrously. His criticism of the Accord has proved acutely prescient; but he retains hope, writing in an impassioned new introduction about the growing non-violent, secular Palestinian movements, and calling for those on the Israeli, European and American left to support it. Esther Clayson Pohl Lovejoy, whose long life stretched from 1869 to 1967, challenged convention from the time she was a young girl. Her professional life began as one of Oregon's earliest women physicians, and her commitment to public health and medical relief took her into the international arena, where she was chair of the American Women's Hospitals after World War I and the first president of the Medical Women's International Association. Most disease, suffering, and death, she believed, were the result of wars and social and economic inequities, and she was determined to combat those conditions through organized action. Lovejoy's early life and career in the Pacific Northwest gave her key experiences and strategies to use for what she termed "constructive resistance," the ability to take effective action against unjust power. She took a political and pragmatic approach to what she called "woman's big job"—achieving a full female citizenship—and emphasized the importance of votes for women. In this engaging biography, Kimberly Jensen tells the story of this important western woman, exploring her approach to politics, health, and society and her civic, economic, and medical activism. Watch the book trailer: <http://www.youtube.com/watch?v=blyfLWnCTV0> From the New York Times bestselling author of *American Fascists* and the NBCC finalist for *War Is a Force That Gives Us Meaning* comes this timely and compelling work about new atheists: those who attack religion to advance the worst of global capitalism, intolerance and imperial projects. Chris Hedges, who graduated from seminary at Harvard Divinity School, has long been a courageous voice in a world where there are too few. He observes that there are two radical, polarized and dangerous sides to the debate on faith and religion in America: the fundamentalists who see religious faith as their prerogative, and the new atheists who brand all religious belief as irrational and dangerous. Both sides use faith to promote a radical agenda, while the religious majority, those with a commitment to tolerance and compassion as well as to their faith, are caught in the middle. The new atheists, led by Richard Dawkins, Christopher Hitchens and Sam Harris, do not make moral arguments about religion. Rather, they have created a new form of fundamentalism that attempts to permeate society with ideas about our own moral superiority and the omnipotence of human reason. I Don't Believe in Atheists critiques the radical mindset that rages against religion and faith. Hedges identifies the pillars of the new atheist belief system, revealing that the stringent rules and rigid traditions in place are as strict as those of any religious practice. Hedges claims that those who have placed blind faith in the morally neutral disciplines of reason and science create idols in their own image -- a sin for either side of the spectrum. He makes an impassioned, intelligent case against religious and secular fundamentalism, which seeks to divide the world into those worthy of moral and intellectual consideration and those who should be condemned, silenced and eradicated. Hedges shatters the new atheists' assault against religion in America, and in doing so, makes way for new, moderate voices to join the debate. This is a book that must be read to understand the state of the battle about faith. The how-to guide to becoming a go-to expert Within their fields, thought leaders are sources of inspiration and innovation. They have the gift of harnessing their expertise and their networks to make their innovative thoughts real and replicable, sparking sustainable change and even creating movements around their ideas. In *Ready to Be a Thought Leader?*, renowned executive talent agent Denise Brosseau shows readers how to develop and use that gift as she maps the path from successful executive, professional, or civic leader to respected thought leader. With the author's proven seven-step process—and starting from wherever they are in their careers—readers can set a course for maximum impact in their field. These guidelines, along with stories, tips, and success secrets from those who have successfully made the transition to high-profile thought leader, allow readers to create a long-term plan and start putting it into action today, even if they only have 15 minutes to spare. Offers a step-by-step process for becoming a recognized thought leader in your field Includes real-world examples from such high-profile thought leaders as Robin Chase, founder and former CEO of Zipcar; Chip Conley, author of *PEAK* and former CEO of JDV Hospitality; and more Written by Denise Brosseau, founder of Thought Leadership Lab, an executive talent agency that helps executives become thought leaders, who has worked with start-up CEOs and leaders from such firms as Apple, Genentech, Symantec, Morgan Stanley, Medtronic, KPMG, DLA Piper, and more *Ready to Be a Thought Leader?* offers essential reading for anyone ready to expand their influence, increase their professional success, have an impact far beyond a single organization and industry, and ultimately leave a legacy that matters. "Scudder Parker's poems allow us to see nature in a different light, and reflect on the meaning of life." --Governor Madeleine M. Kunin, author of *Coming of Age, My Journey to the Eighties* This book is about political ambition - who has it, how it is fostered and how it evolves. Feminists opened up thousands of doors in the 1960s and 1970s, but decades later, are U.S. women where they thought they'd be? The answer, it turns out, is a resounding no. Surely there have been gains. Women now comprise nearly 60 percent of college undergraduates and half of all medical and law students. They have entered the workforce in record numbers, making the two-wage-earner family the norm. But combining a career and family turned out to be more complicated than expected. While women changed, social structures surrounding work and family remained static. Affordable and high-quality child care, paid family leave, and equal pay for equal work remain elusive for the vast majority of working women. In fact, the nation has fallen far behind other parts of the world on the gender-equity front. We lag behind more than seventy countries when it comes to the percentage of women holding elected federal offices. Only 17 percent of corporate boards include women members. And just 5 percent of Fortune 500 companies are led by women. It's time, says Madeleine M. Kunin, to change all that. Looking back over five decades of advocacy, she analyzes where progress stalled, looks at the successes of other countries, and charts the course for the next feminist revolution—one that mobilizes women, and men, to call for the kind of government and workplace policies that can improve the lives of women and strengthen their families. *Going Up the Country* is part oral history, part nostalgia-tinged narrative, and part clear-eyed analysis of the multifaceted phenomena collectively referred to as the counterculture movement in Vermont. This is the story of how young migrants, largely from the cities and suburbs of New York and Massachusetts, turned their backs on the establishment of the 1950s and moved to the backwoods of rural Vermont, spawning a revolution in lifestyle, politics, sexuality, and business practices that would have a profound impact on both the state and the nation. The movement brought hippies, back-to-the-landers, political radicals, sexual libertines, and utopians to a previously conservative state and led us to today's farm to table way of life, environmental consciousness, and progressive politics as championed by Bernie Sanders. Many readers are already familiar with Madeleine Kunin, the former three-term governor of Vermont, who served as the deputy secretary of education and ambassador to Switzerland under President Bill Clinton. In her newest book, a memoir entitled *Coming of Age: My Journey to the Eighties*, the topic is aging, but she looks well beyond the physical tolls and explores the emotional ones as well. And she has had an extraordinary life: governor, ambassador, feminist, wife, mother, professor, poet, and much, much more. As recently reported in the New York Times, a girl born today can expect to live to the age of ninety, on average (boys, on the other hand, can expect to live until age eighty-five). Life expectancy, for many, is increasing, yet people rarely contemplate the emotional changes that come alongside the physical changes of aging. Madeleine wants to change that. *Coming of Age: My Journey to the Eighties* takes a close and incisive look at what it is like to grow old. The book is a memoir, yet most important of all, it is an honest and positive look at aging and how it has affected her life. Cover photo (c) Todd Lockwood. "Home : a place that provides access to every opportunity America has to offer.--A.H."--P. [vii] *Red Kite, Blue Sky*, the debut poetry collection from Madeleine May Kunin, celebrates life and the natural world, occasioned by the birth of grand-children, the memories of friendship and past birthdays/*Bar Mitzvahs*, a gift of plum-colored gloves from the poet's daughter, the Sicilian sun which "melts my argument against myself," with sharp observations and humor. Like Emily Dickinson before her, Kunin does not shy away from death; rather she embraces the anticipation "before death drags me deep," the gap in her life when her beloved husband dies, the fear of immigration to America during World War II with "an H for Hebrew, I found out later," and the sadness of being isolated as an older woman living alone during the pandemic. For years Kunin was caught in the tempo of politics -- as governor, as a federal official, and as an ambassador -- but as she eased into retirement from public life, she found a door that opened for her to explore the multi-layered language of poetry. An innovative analysis of how creative tensions between modern Orthodox Judaism and feminism can lead to unexpected perspectives and beliefs An irreverent, yet powerful exploration of race relations by the New York Times-bestselling author of *The Chris Farley Show* *Frank, funny, and incisive, Some of My Best Friends Are Black* offers a profoundly honest portrait of race in America. In a book that is part reportage, part history, part social commentary, Tanner Colby explores why the civil rights movement ultimately produced such little true integration in schools, neighborhoods, offices, and churches—the very places where social change needed to unfold. Weaving together the personal, intimate stories of everyday people—black and white—Colby reveals the strange, sordid history of what was supposed to be the end of Jim Crow, but turned out to be more of the same with no name. He shows us how far we have come in our journey to leave mistrust and anger behind—and how far all of us have left to go. The final words of the "Pledge of Allegiance to the Flag", "With Liberty and Justice for All", are powerful words, as powerful as any words found in any of our national documents. Every day, millions of children say the "Pledge of Allegiance to the Flag" in schools throughout the country. They are words that stir the emotions and inspire individuals to great acts of courage. They are words that inspire patriotism and national spirit. Liberty and Justice often seem elusive. Liberty and Justice mean different things to different people. Many people feel freedom gives them the absolute right to do what they choose without regard to other people. For many people, justice is considered a legal judgement rather than a moral judgement. In the courts, when a judgement has been rendered, the decision may be legally correct, but not "morally" correct. Justice and Liberty are like beauty; they are in the "eyes of the beholder". It is time to reexamine what these words mean and what they should mean. Looks at the current state of women's rights in the United States, highlighting the difficulty of juggling career and family, and focusing on the gap between American women and women in other nations around the world. An extraordinary look at what it means to grow old and a heartening guide to well-being, *Happiness Is a Choice You Make* weaves together the stories and wisdom of six New Yorkers who number among the "oldest old"--Those eighty-five and up. In 2015, when the award-winning journalist John Leland set out on behalf of *The New York Times* to meet members of America's fastest-growing age group, he anticipated learning of challenges, of loneliness, and of the deterioration of body, mind, and quality of life. But the elders he met took him in an entirely different direction. Despite disparate backgrounds and circumstances, they each lived with a surprising lightness and contentment. The reality Leland encountered upended contemporary notions of aging, revealing the late stages of life as unexpectedly rich and the elderly as incomparably wise. *Happiness Is a Choice You Make* is an enduring collection of lessons that emphasizes, above all, the extraordinary influence we wield over the quality of our lives. With humility, heart, and wit, Leland has crafted a sophisticated and necessary reflection on how to "live better"--informed by those who have mastered the art. Profiles women from across the political spectrum who have served in the U.S. House and Senate, the judiciary, and the U.S. cabinet, and describes organizations, movements, issues, and allies of feminists from colonial times to the present. The first time Madeleine M. Kunin ran for office it was because she thought there ought to be more women in politics. In time she fulfilled that belief by becoming the first woman governor of Vermont. Throughout her career, Kunin found that the rules for women politicians were different: she would not be forgiven (nor would she forgive herself) for neglecting her family. She could not afford to display emotion at the wrong times lest she be thought "weak." And she would have to learn to play political hardball with the best of them while keeping her integrity. In *Living a Political Life*, Kunin—who is now Deputy Secretary of the U.S. Department of Education—takes a frank look at the challenges that confronted her as she tried not just to succeed in politics but to set a precedent for other women. In doing so, she illuminates both what it means to be a woman and what it means to be a public servant and gives us a memoir as thoughtful and revealing as any to emerge from the corridors of power. All citizens must be educated about the economic and environmental realities of today's world. This report provides the impetus for that effort. Contents: a program for change; formal education (green schools: models and approaches, professional development, essential learnings); nonformal education (public awareness, sustainable development extension network, community visioning and assessment, workforce development, lifelong learning); cross-cutting themes (state and Federal policy changes, technology and information, multicultural perspectives, global perspectives). Illustrated. What unique challenges do women face as they seek and attain high-ranking positions in the executive branches of government? In the *Bernie Sanders Guide to Political Revolution*, Independent congressman, presidential candidate and activist Bernie Sanders continues his fight against the imbalances in the nation's status quo, and shows you how to make a difference to effect the changes America—and the world—need to create a better tomorrow. Throughout the Presidential campaign, Senator Bernie Sanders promised voters a future to believe in through his progressive platform and a vision for America worth fighting for. This vision calls for an economic, environmental, health care, and social justice revolution beyond the stagnant agendas of Democrat and Republican politicians to build an equitable future for all Americans—especially the younger generation that will inherit the consequences of decisions made now. Inside this practical and inspiring guide to effecting change in today's world, you'll learn how to: · Understand and navigate the current system of policy and government · Work to change the system to reflect your values and to protect our society's most vulnerable · Organize for the causes you care about most · Resources for further reading and organizations to get involved with With more than two decades of Washington D.C. insider knowledge and experience, Senator Sanders knows how to fight and change the system from within, a system desperately in need of reform in health care, immigration, taxes, higher education, climate change, and criminal justice. The political revolution is just beginning. What role will you play? *The Oxford Handbook of Transnational Feminist Movements* explores the historical, political, economic and social contexts in which transnational feminist movements have emerged and spread, and the contributions they have made to global knowledge, power and social change over the past half century. The publication of the handbook in 2015 marks the fortieth anniversary of the United Nations International Women's Year, the thirtieth anniversary of the Third World Conference on Women held in Nairobi, the twentieth anniversary of the Beijing Declaration and Platform for Action, and the fifteenth anniversaries of the Millennium Development Goals and of UN Security Council Resolution 1325 on 'women, peace and security'. The editors and contributors critically interrogate transnational feminist movements from a broad spectrum of locations in the global South and North: feminist organizations and networks at all levels (local, national, regional, global and 'glocal'); wider civil society organizations and networks; governmental and multilateral agencies; and academic and research institutions, among others. The handbook reflects candidly on what we have learned about transnational feminist movements. What are the different spaces from which transnational feminisms have operated and in what ways? How have they contributed to our understanding of the myriad formal and informal ways in which gendered power relations define and inform everyday life? To what extent have they destabilized or transformed the global hegemonic systems that constitute patriarchy? From a position of fifty years of knowledge production, activism, working with institutions, and critical reflection, the handbook recognizes that transnational feminist movements form a key epistemic community that can inspire and provide leadership in shaping political spaces and institutions at all levels, and transforming international political economy, development and peace processes. The handbook is organized into ten sections, each beginning with an introduction by the editors. The sections

explore the main themes that have emerged from transnational feminist movements: knowledge, theory and praxis; organizing for change; body politics, health and well-being; human rights and human security; economic and social justice; citizenship and statebuilding; militarism and religious fundamentalisms; peace movements, UNSCR 1325 and postconflict rebuilding; feminist political ecology; and digital-age transformations and future trajectories. In *THE CONFLICT* Elisabeth Badinter, France’s foremost feminist thinker, questions why our ideas of motherhood have been skewed by unachievable expectations that compromise notions of self and womanhood. *Pearls, Politics, and Power* is a call to action for new political engagement and leadership from the women of America. Informed by conversations with elected women leaders from all levels, former three-term Vermont Governor and Ambassador to Switzerland Madeleine M. Kunin asks: What difference do women make? What is the worst part of politics, and what is the best part? What inspired these women to run, and how did they prepare themselves for public life? How did they raise money, protect their families’ privacy, deal with criticism and attack ads, and work with the good old boys? Kunin’s core message is that America needs an infusion of new leadership to better address the major problems of our time. To see how women can achieve that goal, she combines her personal experience in politics; the lessons of past women’s movements; the stories of young women today who have new ideas about their role in society; and interviews with a wide range of women in positions of power, looking for clues to their leadership, as well as the effects of gender stereotyping. She interviews Senator Hillary Rodham Clinton, analyzes her campaign, and addresses the question: "Is the country ready?" Other interviewees include U.S. Representatives Loretta Sanchez, Linda Sanchez, Deborah Pryce, and Tammy Baldwin, and U.S. Senators Susan Collins. Amy Klobuchar, and Carol Moseley Braun, and Governors Kathleen Sibelius and Janet Napolitano. The next generation of women will be inspired to lead by seeing women like Nancy Pelosi wielding the gavel, and seeing themselves reflected in the portraits in statehouses, courthouses, corporate and university boardrooms, and the White House. *Pearls, Politics, and Power* will help ensure that this inspiration is not soured or deflected, but channeled into successful candidacies by America’s leaders of tomorrow. What will it take for women to assume their rightful places in the political corridors of power? A provocative and wide-ranging conversation between two distinctive women—one American and one French—on the dilemmas, rewards, and demands of womanhood. Lisa Alther and Françoise Gilot have been friends for more than twenty-five years. Although from different backgrounds (Gilot from cosmopolitan Paris, Alther from small-town Tennessee) and different generations, they found they have a great deal in common as women who managed to support themselves with careers in the arts while simultaneously balancing the obligations of work and parenthood. About Women is their extended conversation in which they talk about everything important to them: their childhoods, the impact of war on their lives and their work, and their views on love, style, self-invention, feminism, and child rearing. They also discuss the creative impulse and the importance of art as they ponder what it means to be a woman. When should the United States go to war? It is arguably the most important foreign policy question facing any president, and Richard Haass -- a member of the National Security Council staff for the first President Bush and the director of policy planning in the State Department for Bush II -- is in a unique position to address it. Haass is one of just a handful of individuals -- along with Colin Powell, Dick Cheney, Paul Wolfowitz, and Bob Gates -- involved at a senior level of U.S. government decision making during both Iraq conflicts. He is the first to take us behind closed doors and the first to provide a personal account. The result is a book that is authoritative, revealing, and surprising. Haass explains not only what happened but why. At first blush, the two Iraq wars appear similar. Both involved a President George Bush and the United States in conflicts with Saddam Hussein and Iraq. There, however, the resemblance ends. Haass contrasts the decisions that shaped the conduct of the two wars and makes a crucial distinction between the 1991 and 2003 conflicts. The first Iraq war, following Saddam Hussein’s invasion of neighboring Kuwait, was a war of necessity. It was limited in ambition, well executed, and carried out with unprecedented international support. By contrast, the second Iraq war was one of choice, the most significant discretionary war undertaken by the United States since Vietnam. Haass argues that it was unwarranted, as the United States had other viable policy options. Making matters worse was the fact that this ambitious undertaking was poorly implemented and fought with considerably more international opposition than backing. These are the principal conclusions of this compelling, honest, and challenging book by one of this country’s most respected voices on foreign policy. Haass’s assessments are critical yet fair -- and carry tremendous weight. He offers a thoughtful examination of the means and ends of U.S. foreign policy: how it should be made, what it should seek to accomplish, and how it should be pursued. War of Necessity, War of Choice -- part history, part memoir -- provides invaluable insight into some of the most important recent events in the world. It also provides a much-needed compass for how the United States can apply the lessons learned from the two Iraq wars so that it is better positioned to put into practice what worked and to avoid repeating what so clearly did not. What happened in Vermont when the anti-Communist fear known as the "Red Scare" swept the country? Rick Winston explores some forgotten history as we see how Vermont, a small, rural "rock-ribbed Republican" state with a historically libertarian streak, handled the hysteria of the McCarthy era. A timely book in the Trump era. This is a pioneering work on what it means to “engender” Jewish tradition—how women’s full inclusion can and must transform our understanding and practice of Jewish law, prayer, and marriage. Adler’s writing is passionate, sharply intelligent and offers a serious study of traditional biblical and rabbinic texts. Engendering Judaism challenges both mainstream Judaism and feminist dogma and speaks across the movements as well as to Christian theologians and feminists. This book provides a scientific forecast of development in aquaculture with a focus on the environmental, technological, social and economic constraints that need to be resolved to ensure sustainable development of the industry and allow the industry to be able to feed healthy seafood products to future generations. The chapters discuss the most critical bottlenecks of the development. They encompass subjects of understanding the environmental impacts, the current state-of-the-art in monitoring programs and in coastal zone management, the important interactions between wild and cultured organisms including release of non-native species into the wild. The Awakening, originally titled A Solitary Soul, is a novel by Kate Chopin, first published in 1899. Set in New Orleans and on the Louisiana Gulf coast at the end of the 19th century, the plot centers on Edna Pontellier and her struggle between her increasingly unorthodox views on femininity and motherhood with the prevailing social attitudes of the turn-of-the-century American South. Understanding the principles of sustainability and the interdependence of the environment, the economy, and social systems can help individuals learn to make the changes necessary to become effective stewards of natural resources and the environment. This document describes three broad policy recommendations as to how Americans can build concepts of sustainability into educational programs, and 12 strategic action plans for implementing those recommendations. The recommendations provide a framework for a flexible strategy and a toolbox of ideas which can be tailored to educational strategies reflective of individual and community needs. Chapters are as follows: (1) "A Program for Change"; (2) "Formal Education"; (3) "Nonformal Education"; (4) "Cross-Cutting Themes"; and (5) "Moving Forward." Core themes of the program include lifelong learning, interdisciplinary approaches, systems thinking, partnerships, multicultural perspectives, and empowerment. A key feature of the agenda is the Opportunities for Partnerships section at the conclusion of each chapter, which provides names, organizations, and resources to guide future steps. A sampling of programs and successful initiatives is presented to illustrate successful cooperative efforts and partnerships. (PVD) McLaughlin is concerned not so much with an explication of Bakunin’s anarchist position, as such, as with the basic philosophy which underpins it. He focuses on two central components: a negative dialectic, or revolutionary logic; and a naturalist ontology, a naturalistic account of the structure of being or reality. Bakunin scholarship, he notes, falls into two camps: Marxist and liberal. Both, he says, tend to be hostile. McLaughlin discredits one by one the analyses (published, usually, as part of a work on Marx et al.) by Francis Wheen ("schoolboy wit, idiocy of tone, poverty of content"), George Lichtheim ("completely misreads Bakunin") and Oxbridge scholar Aileen Kelly ("personality assassination, perverse, slanderous"), while upholding Eric Voegelin. Perhaps this book will spark a small revolution of its own. Scholars interested in Bakunin have had few resources available in English, and none of them, until now, presented a credible study of the man’s philosophy. The last two decades have given rise to a proliferation of scholarship by Israeli feminists working in diverse fields, ranging from sociology to literature, anthropology, and history. As the Israeli feminist movement continually decentralizes and diversifies, it has become less Eurocentric and heterocentric, making way for pluralistic concerns. Collecting fifteen previously published essays that give voice to this diversity, Israeli Feminist Scholarship showcases articles on Ashkenazi, Mizrahi, Palestinian, and lesbian identities as well as on Israeli women’s roles as mothers, citizens and activists, and soldiers. Citing evidence that these scholars have redefined their object of inquiry as an open site of contested and constructed identity, luminary Esther Fuchs traces the history of Israeli feminism. Among the essays are Jewish historian Margalit Shilo’s study of the New Hebrew Woman, sociologist Ronit Lentin’s analysis of gendered representations of the Holocaust in Israeli culture, peace activist Erella Shadmi on lesbianism as a nonissue in Israel, and cultural critic Nitzza Berkovitch’s examination of womanhood as constructed in Israeli legal discourse. Creating a space for a critical examination of the relationship between disparate yet analogous discourses within feminism and Zionism, this anthology reclaims the mobilizing, inclusive role of these multifaceted discourses beyond the postmodern paradigm. The story of Ben & Jerry’s and its controversial acquisition by Unilever, based on interviews with insiders and “rich in details” (Kirkus Reviews). Ben & Jerry’s has always been committed to an insanely ambitious three-part mission: making the world’s best ice cream, supporting progressive causes, and sharing the company’s success with all stakeholders: employees, suppliers, distributors, customers, cows, everybody. But it hasn’t been easy. This is the first book to tell the full, inside story of the inspiring rise, tragic mistakes, devastating fall, determined recovery, and ongoing renewal of one of the most iconic mission-driven companies in the world. No previous book has focused so intently on the challenges presented by staying true to that mission. No other book has explained how the company came to be sold to corporate giant Unilever or how that relationship evolved to allow Ben & Jerry’s to pursue its mission on a much larger stage. Journalist Brad Edmondson tells the story with an eye for details, dramatic moments, and memorable characters. He interviewed dozens of key figures, particularly Jeff Furman, who helped Ben and Jerry write their first business plan in 1978 and became chairman of the board in 2010. It’s a funny, sad, surprising, and ultimately hopeful story.
