Sicheres Netzwerkmanagement Nov 12 2021 Die Administration komplexer Rechnernetzwerke verlangt durch die ständige Weiterentwicklung etablierter Standards und die Integration gänzlich neuer Technologien ein umfassendes technisches Know-how von Administratoren und Systementwicklern. Dabei ist insbesondere die Sicherheit und Verfügbarkeit aller Systemkomponenten von zentraler Bedeutung für die Funktionsfähigkeit eines Netzes. Das vorliegende Buch gibt eine fundierte und umfassende Darstellung zentraler Techniken und nützlicher Werkzeuge zur TCP/IP-Netzwerk-Konfiguration und -Überwachung. Besonderes Augenmerk wird dabei auf Sicherheitsbedrohungen und deren wirksame Abwehr mittels entsprechender Netzwerkmanagement-Tools gelegt. Das Spektrum der betrachteten Technologien reicht von etablierten Netzwerkprotokollen über den Einsatz komplexer Software-Systeme bis hin zu aktuellen Trends der drahtlosen Kommunikation und priorisierten Datenströme des Quality of Service (QoS).

Advances in Databases and Information Systems Mar 24 2020 The 3rd Eastern European Conference on Advances in Databases and Information Systems (ADBIS'99) took place on 13-16- September 1999, in Maribor, Slovenia. It was organized in cooperation with ACM SIGMOD, the Moscow chapter of ACM SIGMOD, Slovenian Society Informatika, and the Slovenian Ministry of Technology. The aim of the ADBIS series of conferences is to provide a forum for the exchange of scientific achievements and experiences using innovative methods and approaches between the research communities of Central and Eastern Europe and the rest of the world in the area of databases and information systems. The 1999 conference continues the series of ADBIS events held in Moscow, St. Petersburg, and Poznan. The ADBIS steering committee has the ambition to make the ADBIS conference the premiere database and information systems conference in Central and Eastern Europe, to increase interaction and collaboration between researchers from East and West, and to provide an internationally recognized forum for the presentation of research and experiences in all aspects of modern database technology and information systems. To achieve these goals an international program committee selected 26 full research papers in a rigorous reviewing process from a total of 94 submissions from 33 different countries. This high number of submissions from so many different areas shows the truly worldwide recognition of and interest in the ADBIS series.

Cyber Defense and Situational Awareness Feb 15 2022 This book is the first publication to give a comprehensive, structured treatment to the important topic of situational awareness in cyber defense. It presents the subject in a logical, consistent, continuous discourse, covering key topics such as formation of cyber situational awareness, visualization and human factors, automated learning and inference, use of ontologies and metrics, predicting and assessing impact of cyber attacks, and achieving resilience of cyber and physical mission. Chapters include case studies, recent research results and practical insights described specifically for this book. Situational awareness is exceptionally prominent in the field of cyber defense. It involves science, technology and practice of perception, comprehension and projection of events and entities in cyber space. Chapters discuss the difficulties of achieving cyber situational awareness – along with approaches to overcoming the difficulties - in the relatively young field of cyber defense where key phenomena are so unlike the more conventional physical world. Cyber Defense and Situational Awareness is designed as a reference for practitioners of cyber security and developers of technology solutions for cyber defenders. Advanced-level students and researchers focused on security of computer networks will also find this book a valuable resource.

Gegenüberstellung dreier Leitungsstrukturmodelle für Pflegepersonal im OP. Dabei handelt es sich um die separate Leitung für Anästhesie- und OP-Pflegepersonal, die Gesamtleitung für Anästhesie- und OP-Pflegepersonal sowie das OP-Management mit Gesamtleitungsfunktion für Anästhesie- und OP-Pflegepersonal. Nach einer kurzen Einleitung werden die Begriffe Leiten, Führen und Management erläutert. Weiterhin werden die Vergleichsdimensionen der Untersuchung vorgestellt, die aus zwei einschlägigen Veröffentlichungen zum Thema Aufbauorganisation abgeleitet sind. In Kapitel 3 werden die Leitungsstrukturmodelle beschrieben und anhand von Grafiken die Aufbauorganisation und das Weisungsgefüge für das jeweilige Modell dargestellt. Im nächsten Kapitel werden die Leitungsstrukturmodelle mit Hilfe der Dimensionen der formalen Organisationsstruktur verglichen, wobei die Kriterien hierzu operationalisiert und skaliert werden. Das Kapitel 5 fasst die wesentlichen Aspekte der Arbeit zusammen und gibt einen Ausblick auf mögliche Ressourcen und die Grenzen des Vergleichs.

New Challenges in Applied Intelligence Technologies Sep 22 2022 To built intelligent systems that can cope with real world problems we need to -velop computational mechanisms able to deal with very large amounts of data, gen- ate complex plans, schedules, and resource allocation strategies, re-plan their actions in real time, provide user friendly communication for human-device interactions, and perform complex optimization problems. In each of these tasks intelligence techno- gies play an important role, providing designers and creators with effective and adequate computational models. The field of intelligence technologies covers a variety of computational approaches that are often suggested and inspired by biological systems, exhibiting functional richness and flexibility of their natural behavior. This class of technologies consists of such important approaches as data mining algorithms, neural networks, genetic al- rithms, fuzzy and multi-valued logics, rough sets, agent-oriented computation, often integrated into complex hybrid solutions. Intelligence technologies are used to built machines that can act and think like living systems, solve problems in an autonomous way, develop rich private knowledge bases and produce results not foreseen and programmed in a direct way by designers and creators.
