American Light Trucks and Utility Vehicles, 1967-1989 Nov 10 2021 The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more.

B-29 Airplane Commander Training Manual in Color Aug 19 2022 The Boeing B-29 was one of the most sophisticated aircraft of WWII. It featured many innovations including guns that could be fired by remote control and pressurized crew compartments. It was also the heaviest production plane of the war, with terrific range and bomb-carrying capabilities. Carrying a crew of ten, the Superfortress devastated Japan in a series of raids in 1944-45. Finally, in August of 1945, the B-29s "Enola Gay" and "Bock's Car" dropped the atomic bombs and forced Japan to surrender. Originally printed by the U.S. Army Air Force, this B-29 Airplane Commander Pilot's Training Manual taught pilots everything they needed to know about the Superfortress. Classified "Restricted", the text was declassified long ago and is here reprinted in book form. This impressive facsimile presents the manual in its entirety. It is over 200 pages long, and reproduced in its original multi-color glory for the first time ever.
