The maximum burst rate remains the same as the earlier model: six fps at full size and seven fps in 1.3x crop mode. Autofocus performance in low light is improved the Multi-CAM 3500DX II still offers 51 AF points (the central 15 cross-type), but all are sensitive to -3EV (the D7100's were limited to -2EV), and the camera includes Wi-Fi with "SnapBridge" Near Field Communication (NFC) for pairing with Android devices. Also on offer is 15% better battery life, and 60p video (with Flat Picture Control, also available for stills), in 1.3x crop mode. The D7200 is the only Nikon DX format camera to support autofocus on screw drive lenses."

Green Gold Nov 23 2019 In 1850, young Scottish plant hunter John Jeffrey was despatched by an elite group of Victorian subscribers to seek highly prized exotic trees in North America. An early letter home told of a 1,200-mile transcontinental journey by small boat and on foot. Later, tantalising collections of seeds and plants arrived from British Columbia, Oregon and California, yet early promise soon withered. Four years after setting out, John Jeffrey, and his journals, disappeared without a trace. Was he lost to love, violence or the Gold Rush? *Green Gold* combines meticulous research with the fictional narrative of Jeffrey's lost journals, revealing an extraordinary adventure.
