Survey123 Apr 14 2022

Academic Paper from the year 2019 in the subject Geography / Earth Science - Cartography, Geographic Information Science and Geodesy, grade: 1, University of Salzburg (ZGIS), language: English, abstract:

This paper presents a scavenger hunt. A scavenger hunt can be a ludic and active approach to address pupils and transport educational and subject content. Thus, this scavenger aims to familiarize pupils of the age class 10-12 years with GIS and the possibilities GIS offer in a playful manner. It includes 5 stations which are addressed by following an instruction-sheet with QR-codes leading to the respective places and posing questions and tasks. For the scavenger hunt there are two datasets that must be handled: The tasks for each station including the submitted answers and the tracks of the groups. The results and the tracks should also be made available to the Z_GIS geoportal following the guidelines of open standards

and interoperability. To fulfill these requirements a combination of two ESRI software products was used: ArcGIS Collector and Survey123. The tracks can be accessed as web feature service via REST URL whereas the survey answers are directly integrated into a dashboard with a map. So, the results are immediately updated and available in ArcGIS Online for inspection, comparison and discussion.

Some of these distractions may slow you down, but some may help you get where you need to go. As always, enjoy them, do your best, make good choices. So get going. Take on the tasks. The Secret Feb 24 2023 The tale begins over three-hundred years ago, when the Fair People—the goblins, fairies, dragons, and other fabled and fantastic creatures of a dozen lands—fled the Old World for the New, seeking haven from the ways of Man. With them came their precious jewels: diamonds, rubies, emeralds, pearls... But then the Fair People vanished, taking with them their twelve fabulous treasures. And they remained hidden until now... Across North America, these twelve treasures, over ten-thousand dollars in precious jewels in 1982 dollars, are buried. The key to finding each can be found within the twelve full-color paintings and verses of THE SECRET. Are you smart enough? THE SECRET: A TREASURE HUNT was published in 1982. The year before publication, the author

and publisher Byron Preiss had traveled to 12 locations in the continental U.S. (and possibly Canada) to secretly bury a dozen ceramic casques. Each casque contained a small key that could be redeemed for one of 12 jewels Preiss kept in a safe deposit box in New York. The key to finding the casques was to match one of 12 paintings to one of 12 poetic verses, solve the resulting riddle, and start digging. Since 1982, only two of the 12 casques have been recovered. The first was located in Grant Park, Chicago, in 1984 by a group of students. The second was unearthed in 2004 in Cleveland by two members of the Quest4Treasure forum.
