**Nursing and Globalization in the Americas** Oct 27 2020

Nursing is vital to millions of people worldwide. This book details the ebb and flow of its fascinating history and politics through case studies from Brazil, Argentina, Chile, Colombia, Mexico, Canada, and the United States. Authors from across the Americas share findings and explore new thinking about Western hemisphere-specific issues that affect nursing and health care. Using economic globalization as an overarching framework, these cross-national case studies show the strengths and contradictions in nursing, elucidating common themes and examining successes. The partnership of authors shapes a collective understanding of nursing in the Americas and forms a basis for enduring hemisphere-wide academic exchange. Thus, the book offers a new platform for understanding the struggles and obstacles of nursing in a climate of globalization, as well as for understanding nursing's richness and accomplishments. Because politics, economics, health, and nursing are inextricably linked, this volume

critically explores the intersections among political economies and nursing and health care systems. The historical and contextual background allows readers to make sense of how and why nursing in the Americas has taken on its present form.

Communities in Action Dec 09  
2021 In the United States,  
some populations suffer from  
far greater disparities in health  
than others. Those disparities  
are caused not only by  
fundamental differences in  
health status across segments  
of the population, but also  
because of inequities in factors  
that impact health status, so-

called determinants of health.  
Only part of an individual's  
health status depends on his or  
her behavior and choice;  
community-wide problems like  
poverty, unemployment, poor  
education, inadequate housing,  
poor public transportation,  
interpersonal violence, and  
decaying neighborhoods also  
contribute to health inequities,  
as well as the historic and  
ongoing interplay of structures,  
policies, and norms that shape  
lives. When these factors are  
not optimal in a community, it  
does not mean they are  
intractable: such inequities can  
be mitigated by social policies  
that can shape health in  
powerful ways. Communities in  
Action: Pathways to Health  
Equity seeks to delineate the  
causes of and the solutions to  
health inequities in the United  
States. This report focuses on  
what communities can do to  
promote health equity, what  
actions are needed by the many  
and varied stakeholders that  
are part of communities or  
support them, as well as the  
root causes and structural  
barriers that need to be  
overcome.
