Operation Terror' is a science-fiction novel written by Murray Leinster. A strange object from space created a crater on Boulder Lake Park, Colorado; and this unidentified space object is carrying an equally unidentified group of creatures inside, who have chosen to disembark from their ship to Earth. The Interstellar Medical Service was just about the only remaining galactic organization that every one of the hundreds of inhabited planets respected. So when their service broke down in Star Sector Twelve, it created a very dangerous situation. When Calhoun took his Med ship out of overdrive near that sector's planet Weald, he was vaguely aware of the risks. But the crisis came home to him with a crash the moment he radioed in for landing coordinates. "Contamination! Full mobilization! Red alert! Death to blueskins!" Such were the nature of his greetings. And it began to look like a case of the cosmic jitters that only the most drastic of orbital surgery could cure. Space Platform tells of man's first step into outer space ... of the

difficulties and dangers of reaching for the stars. It is also an exciting adventure. When young Joe Kenmore came to Bootstrap to install pilot gyros in the Platform he hadn't bargained for sabotage or murder or love. But Joe learned that ruthless agents were determined to wreck the project. He found that the beautiful girl he loved, and men like The Chief, a rugged Indian steelworker, and Mike, a midget who made up for his size by brains, would have to fight with their bare hands to make man's age old dream of space travel come true! Long before extended space travel became a reality, prolific science fiction author Murray Leinster created a richly detailed scenario in which a project that bears a striking resemblance to the International Space Station is being planned and executed. However, several nefarious factions want the planned expedition to fail. Can unlikely hero Joe Kenmore salvage the project? We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience. Sometimes it seems nobody loves a benefactor ... particularly nobody on a well-heeled, self-satisfied planet. Grandpa always said Pirates were really benefactors, though. Murray Leinster weaves a science fiction masterpiece! Men Into Space is the thrilling story of man's gradual conquest of outer space, seen through the eyes of young Ed McCauley, whose adventures in outer space will excite you with the sheer wonder of man's daring entry into the Space Age. You do not always have to go looking for a guardian angel. He may be looking for you—but perhaps for somebody else's benefit! Rhadampsicus and Nodalictha were on their honeymoon, and consequently they were sentimental. To be sure, it would not have been easy for humans to imagine sentiment as existing between them. Humans would hardly associate tenderness with glances cast from sets of sixteen eyes mounted on jointed eye stalks, nor link langorous thrills with a coy mingling of positronic repulsion blasts—even when the emission of positron blasts from beneath one's mantle was one's normal personal mode of locomotion. And when two creatures like Rhadampsicus and Nodalictha stood on what might be roughly described as their heads and twined their eye stalks together, so that they gazed fondly at each other with all sixteen eyes at once, humans would not have thought of it as the equivalent of a loving kiss. Humans would have screamed and run—if they were not paralyzed by the mere sight of such individuals. Kim Rendall will not yield to the tyranny of the power-madrulers of Alphin III. Branded an outlaw, he is in danger of psychological torture worse than death from the Disiplinary Circuit, which keeps the masses in check. His one hope lies in the Starshine, an outmoded spaceship. In a world where teleportation is the norm, no one travels by interstellar vessel anymore. Rendall plans to use the Starshine to save his girlfriend and himself -- and possibly his entire planet! The MARINTHA hurtled into space to

discover the secret of the galactic ancestors of the human race. In the shattered rubble of great civilizations they discovered bizarre remnants of humanity beside whom they would battle the poisonous forces arrayed against all human life... Humanity's future hung in the starry balance! A ship heading from Earth to Athena, a planet 500 light years away, is suddenly attacked by the Gerns, an alien empire in its expansion phase. People aboard are divided by the invaders into Acceptables and Rejects. The Acceptables would become slave labor for the Gerns on Athena, and the Rejects are forced ashore on the nearest 'Earth-like' planet, called Ragnarok. The Gerns say they will return for the Rejects, but the Rejects quickly realise that that isn't going to happen. Ragnarok is not so 'Earth-like.' Its gravity is 1.5 times that of Earth, it is populated by deadly, aggressive creatures and it contains little in the way of usable metal ores. This, combined with a terrible deadly fever that kills in hours, more than decimates the population. The novel follows the stranded humans through several generations as they try to survive there, and their unswerving goal to repay the Gerns for their cruelty. Jed Cochrane -- sophisticate in a world grown too crowded to breathe, newsman, interviewer, television personality -- begins this tale when he's sent on a wild goose chase (literally, to the moon) after the wayward son of one of his network's principals. But the path he follows will lead him to the stars -- and beyond them * Murray Leinster published more than fifteen hundred stories in a life that lasted the best part of the 20th century -- from 1896 until 1975. He's remembered as a great deal less a writer than he was: he tells a thoughtful, stylish tale, and he tells it damned well. . . . Put yourself in the place of Kim Rendall, a handsome, idealistic young man living on a distant planet ruled by a super-efficient government. Here is industrialization carried to its illogical conclusion. Kim Rendall lives in the shadow of mechanized terror, for machines have taken over, and the disciplinary circuit keeps the inhabitants in check . . . IMPOSSIBLE? DON'T BE SO SURE! As the "realm of the possible" expands at an almost frightening rate, the tales of the best science fiction writers become more than merely imagination inspired. Voyaging to the stars, discovering life forms there which seem, at first, inconceivable to us oxygen-breathers, may well occur in this or not-too-distant generations. What might those intrepid explorers of the solar system and beyond encounter? Here are the speculations, some terrifying, some delightful, all thought-provoking, by science fiction's greatest writers. DigiCat Publishing presents to you this special edition of "Space Tug" by Murray Leinster. DigiCat Publishing considers every written word to be a legacy of humankind. Strange exiles were landing throughout the night . . . exiles from the unknown depths of outer space -- seeking human beings for food! Things were quiet that night in the space port. Then the 'Theban' arrived without warning, bringing with it a surly crew, led by a blustering captain, Larson... The 'Theban' was old, propelled by a totally obsolescent interplanetary drive. The only way Larson could get it off the ground was to kidnap the young engineer, Horn, who he hoped could at least manage to keep the ship in flight until it reached its final rendezvous. Their destination was the spaceship 'Danae' - a ship loaded with millions in space credit notes. If Horn wanted to save the 'Danae' from the onslaughts of

the Space Invaders, he had his work cut out for him... DigiCat Publishing presents to you this special edition of "Operation: Outer Space" by Murray Leinster. Dunne was a crystal miner among the stars until he discovered the biggest strike in space. Drilling through the Rings of Thothmes with a mysterious lady stowaway, the lonely hunter soon realized that every miner in this golden mist was out to get him - and the treasure. Even as bloodshed spreads across the sky, eyes both inhuman and unseen watched, waiting to close in... Long before extended space travel became a reality, prolific science fiction author Murray Leinster created a richly detailed scenario in which a project that bears a striking resemblance to the International Space Station is being planned and executed. However, several nefarious factions want the planned expedition to fail. Can unlikely hero Joe Kenmore salvage the project? The third and final book in the Galactic Empire series, the spectacular precursor to the classic Foundation series, by one of history's most influential writers of science fiction, Isaac Asimov. After years of bitter struggle, Trantor had at last completed its work—its Galactic Empire ruled all 200 million planets of the Galaxy . . . all but one. On a backward planet called Earth were those who nurtured bitter dreams of a mythical, half-remembered past when the planet was humanity's only home. The other worlds despised it or merely patronized it—until a man from the past miraculously stepped through a time fault that spanned a millennium, living proof of Earth's most preposterous claims. Joseph Schwartz was a happily retired Chicago tailor circa 1949. Trapped in an incredible future he could barely comprehend, the unlikely time traveler would soon become a pawn in a desperate conspiracy to bring down the Empire in a twist of agony and death—a mad plan to restore Earth's tarnished glory by ending human life on every other world. Because Bron Hoddan was a serious electronics engineer, he didn't want any part of his particular planetary heritage. For he was from Zan - and Zan's only occupation was spaceship piracy! So Bron went to Walden, the most civilized planet of them all. His first step to making himself a good reputation was to invent a machine that would save the government millions. But when instead he was seized and jailed as the most unspeakable criminal in Walden's history, he realized that there was only one way open to remedy this "civilized" disaster. And that was by putting into use some of Zan's old-fashioned buccaneering techniques! Based on its title, this tale might sound like an absurd bit of space-opera fluff, but it's actually a deeply engaging story packed with interesting theories and ideas. The "vampires" in question aren't literal bloodsuckers, but rather are mysterious beings who subsist on the life force of others. It's a fascinating and thought-provoking tale that will please connoisseurs of classic science fiction. Get set for interstellar adventure with this action-packed novel from groundbreaking SF writer Murray Leinster. In an amazingly prescient plot that resonates with today's reality TV-obsessed culture, the space flight project of the book's title is a television show that helps fund humanity's first foray into the cosmos. SPACE CAPTAIN follows the interstellar journey of space buccaneer Captain Trent as he chases down a band of opportunistic space pirates. Space Platform by Murray Leinster Space Platform

Space Tug by Murray Leinster is an independent sequel to the author's popular Space Platform. Three complete novels, one of them a Hugo Award finalist, with a number of short stories. Reaching for the Stars.... Ever since ancient man first gazed in wonder at the stars, humanity has dreamed of traveling to outer space. Now scientists agree that space-flight may very soon become a reality. Space Platform tells of man's first step into outer space ... of the difficulties and dangers of reaching for the stars. It is also an exciting adventure. When young Joe Kenmore came to Bootstrap to install pilot gyros in the Platform he hadn't bargained for sabotage or murder or love. The public abruptly ceased to be interested in news of the signals. Rather, it suddenly wanted to stop thinking about them. The public was scared. Throughout all human history, the most horrifying of all ideas has been the idea of something which was as intelligent as a man, but wasn't human. The first sounds came at midnight, a plaintive keening from an unknown voice in the vastness of uncharted space. Within hours the whole world had heard the strange, unearthly music--and the panic had begun. Were the sounds a plea for help? From whom? From where? Or were they a command too terrible to think about? No one knew: And in billions of earth-bound minds the horror grew... For how could man, who had not yet claimed the moon, defy a challenge from the

stars? And hours later, to the ears of a helpless world, the second message came. . . And Earth's days were numbered. A collection of the trend-setting stories from "the Dean of Science Fiction" which opened and explored such topics as first contact with aliens, the Internet, transfers among parallel universes, and many more. "The best of [these stories] are remarkable inventions, providing a window on to science fiction's first Golden Age that demonstrates exactly what made it golden" - Kirkus Review What will happen when we first encounter sentient beings from outer space? In this action-packed account of first contact between the human denizens of Earth and an alien species, Murray Leinster details the tense early interactions between clashing spaceships. Is long-term coexistence possible? Read *The Aliens* to find out. It was a nightmare world of grotesque and terrifying animal-plant life. Gigantic beetles, spiders, bugs and ants filled the putrid, musty earth - ready to kill and devour anything in sight. There were men amidst this horror - men who cringed and ran from the ravening monsters and huddled in the mushroom forests at night. Burl was one of these creatures. But one day inspiration hit Burl. He would find a weapon - he would fight back. And with this idea the first step was taken in man's most desperate flight for freedom in this most horrible of all worlds. But it was only a first step. Breathtaking Space Adventure by a Master of Interplanetary Science Fiction, Including a Hugo Award-Winner At the publisher's request, this title is sold without DRM (Digital Rights Management). "Murray Leinster was not only a very good writer, he was a pioneer. . . . The wondrous thing about his work is that those great, trend-setting stories read as fresh and timely today as they did all those years ago." ¼Frederik Pohl "The Dean of modern science fiction." ¾Time ". . . robust and adventurous." ¾The Encyclopedia of Science Fiction
