Incidents involving rescue from road vehicles are dramatically increasing in frequency. There are some 3500 deaths on the road each year, with 35,000 serious injuries. Modern motor vehicles are becoming safer for occupants, due to advancement in technology, so

persons are more likely to survive high impact speeds, but are also more likely to become entrapped. The Fire and Rescue Service, as the primary rescue service, requires national guidance to ensure a similar standard of response anywhere in the UK. This manual is designed to highlight current best practice with regard to vehicle rescue techniques and first responder trauma care. Each chapter forms an independent reference source, but the publication as a whole forms a complete guide. Chapters cover: vehicle design and construction; dealing with incidents; safety procedures; operational procedures; extrication equipment; medical considerations and trauma care; Integrated Personal Development System (I.P.D.S.). Appendices cover: Highways Agency/Fire and Rescue Service memorandum of understanding; training and general information; and emergency services personnel (ESP) aide m moire. The CD-ROM, "Vehicle extrication techniques", is a multi media guide to rescue tool handling and extrication techniques. Incident command systems are vital for managing risk within fire brigades. This new and updated edition of 'Incident Command: Fire and Rescue Service Manual - Volume 2: Fire Service Operations' develops the subject, particularly in the area of dynamic risk assessment and command competence. This guide details the doctrine of the Fire and Rescue Service (FRS) in the context of operational incident management, leadership, and the functional command and control processes that flow from it. This new edition of the manual also reflects the need for Fire and Rescue Services to be able to work effectively within a broader multi-agency incident management framework. Further to recent legislation this publication offers guidance in respect to the increasingly broad role of Fire and Rescue Services in incidents other than fire. This role is then considered in relation to the capacities, objectives, and constraints of other responding agencies. Essential reading for Fire Brigade Service

managers and those involved in incident response across all of the emergency services.
