**Correspondence and miscellaneous papers relating to the American revolution. June, 1775, to July, 1776 (v.3); July, 1776, to July, 1777 (v.4); July, 1777, to July, 1778 (v.5); July, 1778, to March, 1780 (v.6); March, 1780, to April, 1781 (v.7); April, 1781, to December, 1783 (v.8)** Sep 28 2020

This volumed compilation of the writings of George Washington brings together important speeches, letters, and other official correspondence from the professional life of the Commander-in-Chief. Special

attention is paid to documents relating to his military business and political career, but also with personal correspondence to add a more holistic examination into Washington. The editor provides his own summary of Washington's life in the first volume, before the autobiographical documents begin.

**Mathematics: Preparing for University** Feb 02 2021

This book is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper).

STEP is an examination used by Cambridge colleges as the basis for conditional offers.

They are also used by Warwick University, and many other mathematics departments

recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics is recommended as preparation for any undergraduate mathematics course, even for students who do not plan to take the Sixth Term Examination Paper. The questions analysed in this book are all based on recent STEP questions selected to address the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. Each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anybody interested in advanced mathematics.
