Winner of the EDRA book prize for 2012. In cities around the world, individuals and groups are reclaiming and creating urban sites, temporary spaces and informal gathering places. These 'insurgent public spaces' challenge conventional views of how urban areas are defined and used, and how they can transform the city environment. No longer confined to traditional public areas like neighbourhood parks and public plazas, these guerrilla spaces express the alternative social and spatial relationships

in our changing cities. With nearly twenty illustrated case studies, this volume shows how instances of insurgent public space occur across the world. Examples range from community gardening in Seattle and Los Angeles, street dancing in Beijing, to the transformation of parking spaces into temporary parks in San Francisco. Drawing on the experiences and knowledge of individuals extensively engaged in the actual implementation of these spaces, *Insurgent Public Space* is a unique cross-disciplinary approach to the study of public space use, and how it is utilized in the contemporary, urban world. Appealing to professionals and

students in both urban studies and more social courses, Hou has brought together valuable commentaries on an area of urbanism which has, up until now, been largely ignored. *The World We Have Won* is a major study of transformations in erotic and intimate life since 1945. We are living in a world of transition, in the midst of a long, unfinished but profound revolution that has transformed the possibilities of living out our sexual diversities. This book provides a balance sheet of the changes that have transformed our ways of being, from welfarism to the pill, women's and gay liberation, from globalization, consumerism and

individualization to new forms of intimacy, from friends as family to same sex marriage. Some respond to these challenges with a deep cultural pessimism or moral conservatism. It rejects such views and argues that this is a world we are increasingly making for ourselves, part of the long process of democratization of everyday life. Unless we grasp this we cannot understand, not only the problems and anxieties, but the opportunities and hopes in this world we have won. Czechoslovak domestic politics, including the long-standing policy dilemmas stemming from the so-called Slovak question, are usually

approached from a historical standpoint. Here Carol Leff views the subject from a fresh analytic perspective. The Slovaks' dissatisfaction with their status in the constitutional order has dogged Czechoslovakia from the country's inception after World War I, and the substantial Slovak minority (now about one-third of the population) has recurrently complicated the state's struggle for self-definition, stability, and even survival. Professor Leff establishes a systematic analytic framework for the discussion of the Czech-Slovak relationship and how it has affected and been affected by state power and the political

system. Czechoslovakia's history is virtually a museum for the major European political alternatives of the twentieth century, and this book is an experiment in applying the comparative methodology of political science not to cross-national studies but to the analysis of a single country over time. The author organizes consideration of policy making on the Slovak national question around three component elements and their impact on effective problem solving: the institutional structure of the pre-Munich republic and the postwar socialist state, leadership values and premises relevant to the disposition of the national

question, and patterns of Czech and Slovak leadership interaction. Originally published in 1988. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its

founding in 1905. Study conducted in Rajasthan, India. Reveals the ways in which disco permanently transformed popular music and influenced rap, techno and trance music, in a book that also examines the complex relationship between disco and the era's major movements, including gay liberation, feminism and African American rights. By the author of Scars of Sweet Paradise. "Billionaire Wilderness offers an unprecedented look inside the world of the ultra-wealthy and their relationship to the natural world, showing how the ultra-rich use nature to resolve key predicaments in their lives. Justin Farrell immerses himself

in Teton County, Wyoming--both the richest county in the United States and the county with the nation's highest level of income inequality--to investigate interconnected questions about money, nature, and community in the twenty-first century. Farrell draws on three years of in-depth interviews with "ordinary" millionaires and the world's wealthiest billionaires, four years of in-person observation in the community, and original quantitative data to provide comprehensive and unique analytical insight on the ultra-wealthy. He also interviewed low-income workers who could speak to their experiences as employees for and members of

the community with these wealthy people. He finds that the wealthy leverage nature to climb even higher on the socioeconomic ladder, and they use their engagement with nature and rural people as a way of creating more virtuous and deserving versions of themselves. Billionaire Wilderness demonstrates that our contemporary understanding of the relationship between the ultra-wealthy and the environment is empirically shallow, and our reliance on reports of national economic trends distances us from the real experiences of these people and their local communities"-- In the face of life-threatening news, how does

our view of life change—and what do we do it transform it? Remaking a Life uses the HIV/AIDS epidemic as a lens to understand how women generate radical improvements in their social well being in the face of social stigma and economic disadvantage. Drawing on interviews with nationally recognized AIDS activists as well as over one hundred Chicago-based women living with HIV/AIDS, Celeste Watkins-Hayes takes readers on an uplifting journey through women's transformative projects, a multidimensional process in which women shift their approach to their physical, social, economic, and political survival, thereby

changing their viewpoint of "dying from" AIDS to "living with" it. With an eye towards improving the lives of women, Remaking a Life provides techniques to encourage private, nonprofit, and government agencies to successfully collaborate, and shares policy ideas with the hope of alleviating the injuries of inequality faced by those living with HIV/AIDS everyday. 'THE POLITICAL BOOK OF THE YEAR' Tim Shipman A blistering narrative exposé of infighting, skulduggery and chaos in Corbyn's Labour party, now revised and updated. * A Times, Guardian, Daily Telegraph, Sunday Times and i Newspaper Book of the

Year * Left Out tells, for the first time, the astonishing full story of Labour's recent transformation and historic defeat. Drawing on unrivalled access, this blistering exposé moves from the peak of Jeremy Corbyn's popularity and the shock hung parliament of 2017 to Labour's humbling in 2019 and the election of Keir Starmer. It reveals a party at war with itself, and puts the reader in the room as tensions boil over, sworn enemies forge unlikely alliances and lifelong friendships are tested to breaking point. This is the ultimate account of the greatest experiment seen in British politics for a generation. 'Gripping... Every

bit as good as people say' Guardian 'Reads like a thriller...told with panache and pace' Financial Times 'The definitive post-mortem of the Corbyn project' Sunday Times We are living in a modern world where falsehood regularly seems to overwhelm truth. The ability of billions of people to publish has created a vast amount of unreliable and false news which now competes with and sometimes drowns more established forms of journalism. So where can we look for reliable, verifiable sources of news and information? What does all this mean for democracy? And what will the future hold? Reflecting on his twenty years as editor of

the Guardian at a time of unprecedented digital disruption; and his experience of breaking some of the most significant news stories of our time, Alan Rusbridger answers these questions and offers a stirring defence of why quality journalism matters now more than ever. Mike Savage and Andrew Miles provide a comprehensive introduction to the working class in Britain in the years after 1840. This textbook: * Includes a provocative, timely and clear defence of class analysis * Breaks new ground in showing how social mobility and urban change affected working class formation * Demonstrates how the history of the working class

is politically reconstructed * Shows how class and gender interact in mediating social and political change FinTech and the Remaking of Financial Institutions explores the transformative potential of new entrants and innovations on business models. In its survey and analysis of FinTech, the book addresses current and future states of money and banking. It provides broad contexts for understanding financial services, products, technology, regulations and social considerations. The book shows how FinTech has evolved and will drive the future of financial services, while other FinTech books concentrate on particular

solutions and adopt perspectives of individual users, companies and investors. It sheds new light on disruption, innovation and opportunity by placing the financial technology revolution in larger contexts. Presents case studies that depict the problems, solutions and opportunities associated with FinTech Provides global coverage of FinTech ventures and regulatory guidelines Analyzes FinTech's social aspects and its potential for spreading to new areas in banking Sheds new light on disruption, innovation and opportunity by placing the financial technology revolution in larger contexts "In the

Shadow of Justice tells the story of how liberal political philosophy was transformed in the second half of the twentieth century under the influence of John Rawls. In this first-ever history of contemporary liberal theory, Katrina Forrester shows how liberal egalitarianism--a set of ideas about justice, equality, obligation, and the state--became dominant, and traces its emergence from the political and ideological context of the postwar United States and Britain. In the aftermath of the civil rights movement and the Vietnam War, Rawls's A Theory of Justice made a particular kind of liberalism essential to political

philosophy. Using archival sources, Forrester explores the ascent and legacy of this form of liberalism by examining its origins in midcentury debates among American antistatists and British egalitarians. She traces the roots of contemporary theories of justice and inequality, civil disobedience, just war, global and intergenerational justice, and population ethics in the 1960s and '70s and beyond. In these years, political philosophers extended, developed, and reshaped this liberalism as they responded to challenges and alternatives on the left and right--from the New International Economic Order to the rise of the New

Right. These thinkers remade political philosophy in ways that influenced not only their own trajectory but also that of their critics. Recasting the history of late twentieth-century political thought and providing novel interpretations and fresh perspectives on major political philosophers, *In the Shadow of Justice* offers a rigorous look at liberalism's ambitions and limits."-- An eye-opening and essential tour of the vanishing world What if Atlantis wasn't a myth, but an early precursor to a new age of great flooding? Across the globe, scientists and civilians alike are noticing rapidly rising sea levels, and higher and higher tides pushing more

water directly into the places we live, from our most vibrant, historic cities to our last remaining traditional coastal villages. With each crack in the great ice sheets of the Arctic and Antarctica, and each tick upwards of Earth's thermometer, we are moving closer to the brink of broad disaster. By century's end, hundreds of millions of people will be retreating from the world's shores as our coasts become inundated and our landscapes transformed. From island nations to the world's major cities, coastal regions will disappear. Engineering projects to hold back the water are bold and may buy some time. Yet despite international

efforts and tireless research, there is no permanent solution – no barriers to erect or walls to build – that will protect us in the end from the drowning of the world as we know it. The *Water Will Come* is the definitive account of the coming water, why and how this will happen, and what it will all mean. As he travels across twelve countries and reports from the front lines, acclaimed journalist Jeff Goodell employs fact, science, and first-person, on-the-ground journalism to show vivid scenes from what already is becoming a water world. ‘This harrowing, compulsively readable, and carefully researched book lays out in clear-eyed detail what

Earth’s changing climate means for us today, and what it will mean for future generations ... It’s a thriller in which the hero in peril is us.’ —John Green, bestselling author of *The Fault in Our Stars* ‘Jeff Goodell grabs you on the first page and doesn't hold up until this essential story is told. He presents a vivid warning and a call to arms to the generation that gets to decide how fast, and how high, the water will come.’ —Scott Ludlam, former Australian Greens Senator ‘A well-rounded, persuasive survey.... A frightening, scientifically grounded, and starkly relevant look at how climate change will affect coastal cities.’ —Kirkus,

Starred Review ‘In this engaging book, environmental writer Goodell points out that while sea levels have always risen and fallen, the current rise is driven primarily by the dramatically accelerating melting of the arctic ice caps, and with so many cities on seashores, this will be devastating.’ —Booklist, Starred Review *Antidepressant drugs and Depression, low self esteem, violence. Exposing the inadequacies of old conceptions of static cultures and detached observers, the book argues instead for social science to acknowledge and celebrate diversity, narrative, emotion, and subjectivity. From the Trade Paperback edition. Why*

have countries increasingly restricted immigration even when they have opened their markets to foreign competition through trade or allowed their firms to move jobs overseas? In *Trading Barriers*, Margaret Peters argues that the increased ability of firms to produce anywhere in the world combined with growing international competition due to lowered trade barriers has led to greater limits on immigration. Peters explains that businesses relying on low-skill labor have been the major proponents of greater openness to immigrants. Immigration helps lower costs, making these businesses more competitive at home and abroad. However,

increased international competition, due to lower trade barriers and greater economic development in the developing world, has led many businesses in wealthy countries to close or move overseas. Productivity increases have allowed those firms that have chosen to remain behind to do more with fewer workers. Together, these changes in the international economy have sapped the crucial business support necessary for more open immigration policies at home, empowered anti-immigrant groups, and spurred greater controls on migration. Debunking the commonly held belief that domestic social concerns are the deciding

factor in determining immigration policy, *Trading Barriers* demonstrates the important and influential role played by international trade and capital movements. For better or worse, E.P. Thompson's monumental book *The Making of the English Working Class* has played an essential role in shaping the intellectual lives of generations of readers since its original publication in 1963. This collected volume explores the complex impact of Thompson's book, both as an intellectual project and material object, relating it to the social and cultural history of the book form itself—an enduring artifact of English history.

While the creation of Dolly the sheep, the world's most famous clone, triggered an enormous amount of discussion about human cloning, in *Dolly Mixtures* the anthropologist Sarah Franklin looks beyond that much-rehearsed controversy to some of the other reasons why the iconic animal's birth and death were significant. Building on the work of historians and anthropologists, Franklin reveals Dolly as the embodiment of agricultural, scientific, social, and commercial histories which are, in turn, bound up with national and imperial aspirations. Dolly was the offspring of a long tradition of

animal domestication, as well as the more recent histories of capital accumulation through selective breeding, and enhanced national competitiveness through the control of biocapital. Franklin traces Dolly's connections to Britain's centuries-old sheep and wool markets (which were vital to the nation's industrial revolution) and to Britain's export of animals to its colonies—particularly Australia—to expand markets and produce wealth. Moving forward in time, she explains the celebrity sheep's links to the embryonic cell lines and global bioscientific innovation of the late twentieth century and early twenty-first. Franklin

combines wide-ranging sources—from historical accounts of sheep-breeding, to scientific representations of cloning by nuclear transfer, to popular media reports of Dolly's creation and birth—as she draws on gender and kinship theory as well as postcolonial and science studies. She argues that there is an urgent need for more nuanced responses to the complex intersections between the social and the biological, intersections which are literally reshaping reproduction and genealogy. In *Dolly Mixtures*, Franklin uses the renowned sheep as an opportunity to begin developing a critical language to identify and

evaluate the reproductive possibilities that post-Dolly biology now faces, and to look back at some of the important historical formations that enabled and prefigured Dolly's creation. The author of *The Footnote* reflects on scribes, scholars, and the work of publishing during the golden age of the book. From Francis Bacon to Barack Obama, thinkers and political leaders have denounced humanists as obsessively bookish and allergic to labor. In this celebration of bookmaking in all its messy and intricate detail, renowned historian Anthony Grafton invites us to see the scholars of early modern Europe as diligent

workers. Meticulously illuminating the physical and mental labors that fostered the golden age of the book—the compiling of notebooks, copying and correction of texts and proofs, preparation of copy—he shows us how the exertions of scholars shaped influential books, treatises, and forgeries. *Inky Fingers* ranges widely, tracing the transformation of humanistic approaches to texts in the seventeenth and eighteenth centuries and examining the simultaneously sustaining and constraining effects of theological polemics on sixteenth-century scholars. Grafton draws new connections between humanistic traditions

and intellectual innovations, textual learning and craft knowledge, manuscript and print. Above all, Grafton makes clear that the nitty-gritty of bookmaking has had a profound impact on the history of ideas—that the life of the mind depends on the work of the hands. Last month, Alex Barrow's whole life imploded—partner, home, job, all gone in forty-eight hours. But sometimes when everything falls apart, better things appear almost like magic. Now, he's back in his Michigan hometown, finally opening the bakery he's always dreamed of. But the pleasure of opening day is nothing compared to the lonely and beautiful man who

bewitches Alex before he even orders. Corbin Wale is a weirdo. At least, that's what he's heard his whole life. He knows he's often in a fantasy world, but the things he feels are very real. And so is the reason why he can never, ever be with Alex Barrow. Even if Alex is everything he's always fantasized about. Even if maybe, just maybe, Corbin is Alex's fantasy too. When Corbin begins working at the bakery, he and Alex can't deny their connection any longer. As the holiday season works its magic, Alex yearns for the man who seems out of reach. But to be with Alex, Corbin will have to challenge every truth he's ever known. If his holiday risk pays

off, two men from different worlds will get the love they've always longed for. * * * Ten percent of all proceeds from this title will be donated to the Russian LGBT Network. 'A dense narrative and a wealth of examples' Literary Review 'Reid-Henry narrates this story with elegance and gusto' Washington Post '[Reid-Henry] conveys an important message: Individual political action must become accountable to society's interests' Kirkus 'Reid-Henry's scholarship is impressive, gathering a wide range of historical anecdotes and referencing a diverse set of thinkers' Publishers Weekly The first panoramic history of the Western world from the

1970s to the present day: Empire of Democracy is the story for those asking how we got to where we are. In this epic narrative of the events that have shaped our own times, Simon Reid-Henry shows how liberal democracy, and Western history with it, was profoundly re-imagined when the postwar Golden Age ended. As the institutions of liberal rule were reinvented, a new generation of politicians emerged: Thatcher, Reagan, Mitterrand, Kohl. The late twentieth-century heyday they oversaw carried the Western democracies triumphantly to victory in the Cold War and into the economic boom of the 1990s. But equally it led them

into the fiasco of Iraq, to the high drama of the financial crisis in 2007/8, and ultimately to the anti-liberal surge of our own times. The present crisis of liberalism enjoins us to revisit these as yet unscripted decades. The era we have all been living through is closing out, democracy is turning on its axis once again. As this panoramic history poignantly reminds us, the choices we make going forward require us first to come to terms with where we have been. An ethnography of a housing project in Cairo, which demonstrates how the modernizing efforts of the Egyptian government runs headlong into the traditional

customs of the area's low-income residents. Brings new meaning to the phrase "global and local." Symbolizing both commerce and culture, London has always been a magnet for the ambitions of the middle classes. However, the past three decades have witnessed a dramatic fragmentation in inner-city Londons social map. New and highly distinctive middle-class neighbourhoods have sprung up where embattled workers seek to combat the deleterious effects of long working hours, travel, and stress on traditional family values. This book is the first to explore the powerful impact of globalization on Londons economy and those who are

caught up in it. More and more people are responding to the negative effects of working life as well as the lack of structure in their lives and particularly those of their children. The gentrification of certain areas and the differences among them directly reflects this desire to impose cultural values and structure on urban surroundings. How do these areas reflect middle-class values, ideologies, lifestyles, social backgrounds and occupational choices, and how have old neighbourhoods been refashioned and made amenable to middle-class life? In what ways has family life been affected by this new emphasis on values, structure

and security, and what does the future hold? This fascinating book provides the first sustained analysis of the profound effects of globalization on city dwellers. Its original account of the relationship between urban space and cultural reproduction will inspire new research for years to come. Economics is changing radically. This paradigm shift, the biggest in the field for over a century, will have profound implications for business, government and society for decades to come. In this book, the author surveys the cutting-edge ideas of the leading economists, physicists, biologists and cognitive

scientists who are fundamentally reshaping economics, and brings their work alive for a broad audience. These researchers argue that the economy is a 'complex adaptive system', more akin to the brain, the internet or an ecosystem than to the static picture of economic systems portrayed by traditional theory. They claim it is the evolutionary process of differentiation, selection and amplification, acting on designs for technologies, social institutions and businesses that drives growth in the economy over time. If Adam Smith provided the inspiration for economics in the twentieth century, it is Charles Darwin

who is providing it in the twenty-first. If we can understand how evolution creates wealth, then we can better answer the question 'How can we create more wealth for the benefit of individuals, businesses and society?' The author shows how 'Complexity Economics' turns conventional wisdom on its head in areas such as business strategy, the design of organisations, the workings of stock markets and public policy. As sweeping in scope as its title, "The Origin of Wealth" is a landmark book that shatters orthodox economic theory, and will rewire our thinking about how we came to be here - and where we are

going. A bold new interpretation of the First World War and the birth of the American Century In the depths of the Great War, with millions dead and no end to the conflict in sight, societies around the world began to buckle. The strain of total war ravaged all economic and political assumptions, shattering old empires and redrawing maps across Europe and the Middle East. A century after the outbreak of fighting, Yale historian Adam Tooze takes an entirely new perspective on "the war to end all wars," focusing on the closing years of the conflict and its aftermath up to the Great Depression. This tumultuous

period saw hopes for lasting peace and liberal internationalism collide with violent upheavals and the ultimate rise of totalitarian regimes. And it saw the emergence of a new global order in which all the major powers—the war's winners and losers alike—saw their fates bound up with those of the United States, now the world's dominant economic force. All-embracing, powerfully argued, and deeply instructive, *The Deluge* is essential reading for anyone who wants to understand the roots of America's fraught relationship with the world. Winner of the Los Angeles Times Book Prize in History and one of the New

York Times's 100 Notable Books of the Year. The assassination of Israeli Prime Minister Yitzhak Rabin remains the single most consequential event in Israel's recent history, and one that fundamentally altered the trajectory for both Israel and the Palestinians. In *Killing a King*, Dan Ephron relates the parallel stories of Rabin and his stalker, Yigal Amir, over the two years leading up to the assassination, as one of them planned political deals he hoped would lead to peace, and the other plotted murder. "Carefully reported, clearly presented, concise and gripping," It stands as "a reminder that what happened on a Tel Aviv

sidewalk 20 years ago is as important to understanding Israel as any of its wars" (Matti Friedman, The Washington Post). This revised edition features a new afterword, updated through the 2016 election. On February 19, 2009, CNBC commentator Rick Santelli delivered a dramatic rant against Obama administration programs to shore up the plunging housing market. Invoking the Founding Fathers and ridiculing "losers" who could not pay their mortgages, Santelli called for "Tea Party" protests. Over the next two years, conservative activists took to the streets and airways, built hundreds of local Tea Party groups, and weighed

in with votes and money to help right-wing Republicans win electoral victories in 2010. In this penetrating new study, Harvard University's Theda Skocpol and Vanessa Williamson go beyond images of protesters in Colonial costumes to provide a nuanced portrait of the Tea Party. What they find is sometimes surprising. Drawing on grassroots interviews and visits to local meetings in several regions, they find that older, middle-class Tea Partiers mostly approve of Social Security, Medicare, and generous benefits for military veterans. Their opposition to "big government" entails reluctance to pay taxes to help

people viewed as undeserving "freeloaders" - including immigrants, lower income earners, and the young. At the national level, Tea Party elites and funders leverage grassroots energy to further longstanding goals such as tax cuts for the wealthy, deregulation of business, and privatization of the very same Social Security and Medicare programs on which many grassroots Tea Partiers depend. Elites and grassroots are nevertheless united in hatred of Barack Obama and determination to push the Republican Party sharply to the right. The Tea Party and the Remaking of Republican Conservatism combines fine-

grained portraits of local Tea Party members and chapters with an overarching analysis of the movement's rise, impact, and likely fate. A powerful personal narrative of recovery and an illuminating philosophical exploration of trauma On July 4, 1990, while on a morning walk in southern France, Susan Brison was attacked from behind, severely beaten, sexually assaulted, strangled to unconsciousness, and left for dead. She survived, but her world was destroyed. Her training as a philosopher could not help her make sense of things, and many of her fundamental assumptions about the nature of the self and the world it inhabits were

shattered. At once a personal narrative of recovery and a philosophical exploration of trauma, this bravely and beautifully written book examines the undoing and remaking of a self in the aftermath of violence. It explores, from an interdisciplinary perspective, memory and truth, identity and self, autonomy and community. It offers imaginative access to the experience of a rape survivor as well as a reflective critique of a society in which women routinely fear and suffer sexual violence. As Brison observes, trauma disrupts memory, severs past from present, and incapacitates the ability to envision a future.

Yet the act of bearing witness, she argues, facilitates recovery by integrating the experience into the survivor's life's story. She also argues for the importance, as well as the hazards, of using first-person narratives in understanding not only trauma, but also larger philosophical questions about what we can know and how we should live. Connolly argues that Americans, immigrants, and even indigenous people, between the 1890s and the 1960s, made tremendous investments in racial apartheid, largely in an effort to govern growing cities and to unleash the value of land as real estate. Through a focus on South Florida, the book illustrates

how entrepreneurs used land and debates over property rights to negotiate the workings of Jim Crow segregation. One of New York Magazine's best books on Silicon Valley! The true, behind-the-scenes history of the people who built Silicon Valley and shaped Big Tech in America Long before Margaret O'Mara became one of our most consequential historians of the American-led digital revolution, she worked in the White House of Bill Clinton and Al Gore in the earliest days of the commercial Internet. There she saw firsthand how deeply intertwined Silicon Valley was with the federal government--and always had been--and how

shallow the common understanding of the secrets of the Valley's success actually was. Now, after almost five years of pioneering research, O'Mara has produced the definitive history of Silicon Valley for our time, the story of mavericks and visionaries, but also of powerful institutions creating the framework for innovation, from the Pentagon to Stanford University. It is also a story of a community that started off remarkably homogeneous and tight-knit and stayed that way, and whose belief in its own mythology has deepened into a collective hubris that has led to astonishing triumphs as well as devastating second-order

effects. Deploying a wonderfully rich and diverse cast of protagonists, from the justly famous to the unjustly obscure, across four generations of explosive growth in the Valley, from the forties to the present, O'Mara has wrestled one of the most fateful developments in modern American history into magnificent narrative form. She is on the ground with all of the key tech companies, chronicling the evolution in their offerings through each successive era, and she has a profound fingertip feel for the politics of the sector and its relation to the larger cultural narrative about tech as it has evolved over the years. Perhaps

most impressive, O'Mara has penetrated the inner kingdom of tech venture capital firms, the insular and still remarkably old-boy world that became the cockpit of American capitalism and the crucible for bringing technological innovation to market, or not. The transformation of big tech into the engine room of the American economy and the nexus of so many of our hopes and dreams--and, increasingly, our nightmares--can be understood, in Margaret O'Mara's masterful hands, as the story of one California valley. As her majestic history makes clear, its fate is the fate of us all. The classic study of post-Cold War international

relations, more relevant than ever in the post-9/11 world, with a new foreword by Zbigniew Brzezinski. Since its initial publication, *The Clash of Civilizations and the Remaking of World Order* has become a classic work of international relations and one of the most influential books ever written about foreign affairs. An insightful and powerful analysis of the forces driving global politics, it is as indispensable to our understanding of American foreign policy today as the day it was published. As former National Security Adviser Zbigniew Brzezinski says in his new foreword to the book, it "has earned a place on the shelf of only about a dozen or

so truly enduring works that provide the quintessential insights necessary for a broad understanding of world affairs in our time." Samuel Huntington explains how clashes between civilizations are the greatest threat to world peace but also how an international order based on civilizations is the best safeguard against war. Events since the publication of the book have proved the wisdom of that analysis. The 9/11 attacks and wars in Iraq and Afghanistan have demonstrated the threat of civilizations but have also shown how vital international cross-civilization cooperation is to restoring peace. As ideological

distinctions among nations have been replaced by cultural differences, world politics has been reconfigured. Across the globe, new conflicts—and new cooperation—have replaced the old order of the Cold War era. The Clash of Civilizations and the Remaking of World Order explains how the population explosion in Muslim countries and the economic rise of East Asia are changing global politics. These developments challenge Western dominance, promote opposition to supposedly “universal” Western ideals, and intensify intercivilization conflict over such issues as nuclear proliferation, immigration, human rights, and democracy.

The Muslim population surge has led to many small wars throughout Eurasia, and the rise of China could lead to a global war of civilizations. Huntington offers a strategy for the West to preserve its unique culture and emphasizes the need for people everywhere to learn to coexist in a complex, multipolar, multicivilizational world. This book gathers an expert group of social scientists to showcase emerging forms of analysis and evaluation for public policy analysis. Each chapter highlights a different method or approach, putting it in context and highlighting its key features before illustrating its application and potential value to policy makers. Aimed

at upper-level undergraduates in public policy and social work, it also has much to offer policy makers and practitioners themselves. The first comprehensive study of fantasy's uses of myth, this book offers insights into the genre's popularity and cultural importance. Combining history, folklore, and narrative theory, Attebery's study explores familiar and forgotten fantasies and shows how the genre is also an arena for negotiating new relationships with traditional tales. A collection of essays from a Professor of Irish Politics at Queens University Belfast, discusses the many crises which have paralyzed the power-sharing institutions

in Northern Ireland since 2002.

International Bestseller The
Prize, revealing the on-going
quest to meet the world's
energy needs - and the power
and riches that come with it. A
master story teller as well as
our most expert analyst, Yergin
proves that energy is truly the
engine of global political and
economic change. From the
jammed streets of Beijing, the
shores of the Caspian Sea, and
the conflicts in the Middle East,
to Capitol Hill and Silicon
Valley, Yergin tells the inside

stories of the oil market, the rise of the 'petrostate', the race to control the resources of the former Soviet empire, and the massive corporate mergers that have transformed the oil landscape. He shows how the drama of oil - the struggle for access to it, the battle for control, the insecurity of supply, its impact on the global economy, and the geopolitics that dominate it - will continue to shape our world. And he takes on the toughest questions: will we run out; are China and the United States destined for conflict; what of climate change? Yergin also reveals the surprising and turbulent histories of nuclear, coal, and natural gas, and

investigates the 'rebirth of renewables' - biofuels, wind, and solar energy - showing how understanding this greening landscape and its future role are crucial to the needs of a growing world economy. The Quest presents an extraordinary range of characters and dramatic stories to illustrate the principles that will shape our energy security system for the decades to come. It is essential reading. In these divided and divisive times, what is the future course for our politics? In this groundbreaking book, Nick Timothy, one of Britain's leading conservative thinkers and commentators, explores the powerful forces driving great

changes in our economy, society and democracy. Drawing on his experience at the top of government, Timothy traces the crisis of Western democracy back to both the mistaken assumptions of philosophical liberalism and the rise of ideological ultra-liberalism on left, right and centre. Sparing no sacred cows, he proposes a new kind of conservatism that respects personal freedom but also demands solidarity. He argues that only by rediscovering a unifying sense of the common good and restoring a mutual web of responsibilities between all citizens and institutions can we reject the extremes of economic and cultural

liberalism, overcome our divisions, and remake one nation. He goes on to outline an ambitious practical plan for change, covering issues ranging from immigration to the regulation of Big Tech. Nick Timothy's original, forensic and thought-provoking analysis is a must-read for anybody tired by the old dogmas of the liberal left, right and centre. It is a major contribution to the debate on the future of conservatism as it grapples with geopolitical shifts, cultural change, and economic uncertainty.
