A history of criminology as a history of science and practice. The Origins of American Criminology is an invaluable resource. Both separately and together, these essays capture the stories behind the invention of criminology's major theoretical perspectives. They preserve information that otherwise would have been lost. There is urgency to embark on this reflective task given that the generation that defined the field for the past decades is heading into retirement. This fine volume insures that their life experiences will not be forgotten. The volume shows criminology to be a human enterprise. Ideas are not driven primarily-and often not at all-by data. Theories are not invented solely as part of the scientific process; they are not inevitable. American criminology's great theories most often precede the collection of data; they guide and produce empirical inquiry, not vice versa. Theoretical paradigms are shaped by a host of factors-scholars' assumptions about the world drawn from their social constructs, disciplinary content and ideology, cognitive environments found in specific universities and the field's scholarly networks, and, quirks in a person's biography. The volume demonstrates that humanity is what makes theory possible. Diverse experiences-when we were born, where we have lived, the unique trajectories of our personal life courses, the disciplines and academic places we have ended up-allow individual scholars to see the world differently. Part of the "Blue Ribbon Paper Series", this book contains papers that cover theory and research presented at the Couch-Stone Spring Symposium, and the Annual Meetings of the Society for the Study of Symbolic Interaction. It includes theoretical developments in the areas of everyday life, race, Native Americans, politics, and performance. Recent years have witnessed a resurgence of biological research into the causes of crime, but the origins of this kind of research date back to the late nineteenth century. By using examples from the US, UK and Australia, the authors outline key ideas, vocabulary, assumptions and findings of the discipline while opening up a set of critical

underlying issues and problems. From theoretical traditions to historical perspectives; contemporary criminology to reflexive criminology; this all encompassing text covers it all. This is the most valuable introduction to international criminology available for undergraduates and works as a superb refresher for more experienced students. Introduction to Criminology: Why Do They Do It? presents a comprehensive and integrated approach to introductory criminology. Acclaimed authors and professors Pamela J. Schram and Stephen G. Tibbetts skillfully connect criminological theories to real-life cases to help students better understand criminology fundamentals. They thoroughly introduce theoretical perspectives that explain criminal behavior and are most respected by modern criminologists, while illustrating the theories with real-life examples such as street violence and property crimes. This text also includes many contemporary topics that are not well represented in competing texts, such as cybercrime, hate crimes, white-collar crime, homeland security, and identity theft. Criminology Skills covers both criminological study skills and research skills in one volume, giving students the skills they need to succeed in the study of criminology. A three-part structure covers finding source materials, academic skills, study skills, and research methodology, guiding students through a range of skills and methods which they will need to practise and demonstrate in their degree. Topics covered include finding and evaluating criminological resources, referencing and avoiding plagiarism, preparing for exams, planning a research project, data analysis and much more. Criminology Skills first helps students to establish a strong and comprehensive skills foundation before building to a more advanced level, increasing their competence and confidence with which to approach projects. Online resources The text is accompanied by the following online resources: -Practical exercises -Animated walk-throughs showing how to use online databases - Activities to help students test their understanding of ethical considerations and of the differences between quantitative and qualitative research methods The perfect companion to the popular Level 3 Criminology Student Book from Illuminate, this Study and Revision Guide summarises key information in a manageable and highly-visual way. // Written by experienced teachers and examiners it includes a wealth of practice exam questions and model answers to help students refine their exam technique. // Offers invaluable guidance to ensure students are well prepared for the controlled assessments with a summary covering key points for the Assessment Criteria. // Criminological theories are broken down and advice is provided to help students apply and evaluate these theories. // Engaging activities and other stimulating features such as 'Take it further', 'Test Yourself' and 'Explore Online' consolidate learning and encourage students to put their knowledge into action. This is a complete guidebook for the preparation of the NET exam, Criminology Paper-II. The authors have made a significant attempt to cover the syllabus of the exam. National eligibility test is conducted twice in a year to determine eligibility for lectureship and for awarding JRF Scholarship. The NET exam is very crucial in determining to ensure minimum standards in the teaching profession (Indian university, colleges and Institutions) and in research work. This book promises last ten year MCQ (NET) on the subject of CRIMINOLOGY with a detailed explanation. This book introduces the inter-disciplinary study of childhood and youth and the multi-agency practice of professionals who serve the needs of children, young people and their families. Exploring key theories and central ideas, research methodology, policy and practice, it takes a holistic, contextual approach that values difference and diversity. It examines concepts such as identity, representation, creativity and discourse and issues such as ethnicity, gender and the 'childhood in crisis' thesis. Furthermore, it challenges opinion by exploring complex and controversial modern-day issues, and by engaging with a range of perspectives to highlight debates within the field. This collection is the product of a collaborative venture between criminologists and archaeologists concerned with the international

market in illicit antiquities. It examines the state of regulation in the antiquities market, with a particular focus on the UK's position, but also with reference to the international context. Looting happens routinely and many countries have rich deposits of cultural material. Antiquities are highly collectable, and there are several prominent international centres for trade. As well as the legitimate face of the antiquities trade there therefore exists an international illicit market in which cultural objects are trafficked for profit in breach of national laws and international conventions. It is within such a complex international and local regulatory context that the essays presented here emerge, focusing upon three areas in particular: the demand for looted antiquities; the supply of cultural artefacts which originate in source countries; and regulation of the international market in antiquities. Criminology has long been interested in transnational crime and its regulation. Archaeologists' concerns lie in the destructive consequences of antiquities looting, which erases our knowledge of the past. In the papers presented here both disciplines present new data and analysis to forge a more coherent understanding of the nature and failings of the regulatory framework currently in place to combat the criminal market in antiquities. Travis Hirschi is one of the most cited criminologists of the twentieth century. His work has provoked controversy and heated debates about the causes of crime, proper research methods, and the most effective policies to prevent and control crime. Known as a spokesperson for social control theory, Hirschi always ties his ideas to the mode of investigation and the mode of investigation to substantive concerns. Theoretical contributions and research methodology have been twin driving forces throughout his career. This book contains representative selections of Hirschi's work over many years. It is remarkable how little is known about Hirschi's life and career. John H. Laub's introduction combines a discerning account of Hirschi's life and work, accompanied by an interview with the author. Laub's volume covers various topics: methodological issues; principles of casual analysis; criteria of causality; longitudinal research on crime; rules and the study of deviant behavior; correlations between crime and delinquency; control theory of delinquency; intelligence, causes, and prevention of delinquency; family structure and crime; theory of crime; crime and criminality; deviance; white collar crime; and juvenile justice systems. Now available in paperback, this is an invaluable text for courses in criminology, as well as a valuable addition to professional libraries. A considered balance of depth, detail, context, and critique, Directions books offer the most student-friendly guide to the subject; they empower students to evaluate the law, understand its practical application, and approach assessments with confidence. This is the first book to cover comprehensively and accessibly the area of applied criminology. It draws together leading experts with experience of teaching, research and practice. Each chapter engages with the application of criminology in a particular area of the community and criminal justice system. The focus here is on the production of high quality written work and the essential skills for good writing: understanding assignments, planning essays and clear thinking, grammar and punctuation, appreciation of written style, tackling exam questions. This and the first volume (on orienting oneself as a student; verbal communication; and listening, reading, and note-taking) offer practical help for adults returning to school. Explores the role of stories in criminal culture and justice systems around the world Stories are much more than a means of communication—stories help us shape our identities, make sense of the world, and mobilize others to action. In Narrative Criminology, prominent scholars from across the academy and around the world examine stories that animate offending. From an examination of how criminals understand certain types of crime to be less moral than others, to how violent offenders and drug users each come to understand or resist their identity as ‘criminals’, to how cultural narratives motivate genocidal action, the case studies in this book cover a wide array of crimes and justice systems throughout the world. The contributors uncover the narratives at the center of their essays through qualitative interviews, ethnographic fieldwork, and written archives, and they scrutinize narrative structure and meaning by analyzing genres, plots, metaphors, and other components of storytelling. In doing so, they reveal the cognitive, ideological, and institutional mechanisms by which narratives promote harmful action. Finally, they consider how offenders’ narratives are linked to and emerge from those of conventional society or specific subcultures. Each chapter reveals important insights and elements for the development of a framework of narrative criminology as an important approach for understanding crime and criminal justice. An unprecedented and landmark collection, Narrative Criminology opens the door for an exciting new field of study on the role of stories in motivating and legitimizing harm. "While education might be the door to success, exam is the key to that door." The Exam Passport is perhaps one of the most important books written in the twenty-first century in academic history. Globally, the Exam Passport is a study guide written like never before. Beginning with a revelation of what exam is and its impact, the Exam Passport cleverly sets out the significant importance of exam taking in our current educational system around the world. The Exam

Passport is a study guide that is laid out in a way that makes study and revision more urgent, more entertaining, more easy to follow, more thoroughly engaging, and a little more philosophical and novel-like. It is embedded with a real-life scenario and outlines common errors during an exam that all students can associate with. For example, it reveals scenarios that underpin an explainable cause of bad grades and proposes better study techniques that are detailed and concise to overcome bad grades. Among other things, it also explains the relevance of gathering only relevant information for revision, taking effective note. It touches on the role of our memory before and during the exam day. It also reveals that despite being intelligent, motivated, and hardworking, most students still struggle to remember much after hours of studying for an exam. One plausible answer is, the information we might want to retain has not made it into the long-term memory bank. It also consists of topics such as the following: —Accountability —Learning style —Memory —Significance of forgetting —Preparation and planning —Achieving top grade —And many other topics This study guide will help each student handle difficult exam situations and prevent academic failure. The first textbook available that is specifically designed to support WJEC GCSE Child Development, and is endorsed by WJEC. It covers course content in just the right detail in a clear, colourful and highly accessible way. It makes explicit connections between what students learn and how they apply this to the Child Study and the Child Focused Task. The book advises your students on how to structure and shape their coursework. It provides thorough exam preparation and practice with dedicated exam practice sections with lots of opportunities for practice and reinforcement. // "What will I learn?" Tells students exactly what they need to know in each topic in an accessible and readable style. // Key terms are clearly highlighted and defined on each spread . // Child Study activity helps students apply their knowledge from each topic and use it in their ongoing Child Study. // Child Study and Child Focused Task sections help your students produce their coursework, provide ideas on building the evidence portfolio and writing up the final presentation. // Stretch and challenge activities help stretch the brightest students. // Exam tips help refine exam technique, make improvements and avoid common mistakes. // Check your understanding questions help students check they have understood the key ideas on a topic.
