Richardson's Classic Series provides the  
student with an account of the fundamentals of

chemical engineering and constitutes the definitive work on the subject for academics and practitioners. Each book provides clear explanations of theory and thorough coverage of practical applications, supported by numerous worked examples and problems. Thus, the text is designed for students as well as being comprehensive in coverage.

Solution to Mass Unemployment in Nigeria Jan 24 2023 Solution to Mass Unemployment is the first in the book series, Achieving Rapid Industrialisation and Democratisation in Nigeria. The book and series are products of research aimed at understanding the present global distribution of wealth and power and the human development process. This book has eleven main parts: Introduction; Why there is mass unemployment in Nigeria; Basis for

*industrialisation; The Wealth creating cycle; Fruits of industrialisation; Theory of learning, employment, automation, productivity and inflation; The nature of the skill acquisition process; Linking education and production; Mobilizing resources for industrialization; Lessons of history; and Concerted efforts needed.*

*An Approximate Solution of Additive-drag Coefficient and Mass-flow Ratio for Inlets Utilizing Right Circular Cones at Zero Angle of Attack Nov 22 2022 Incompressible approximation solution of additive drag coefficient and mass flow ratio for inlets with right circular cones.*

*Journal of Solution Chemistry Feb 01 2021*

*Basic Engineering Thermodynamics Apr 03 2021 Engineering thermodynamics is the study of and practical application of the successful conversion of heat energy into work energy, a transformation fundamental to the existence of our modern industrial society. The thermodynamic conversion process lies behind the operation of the internal combustion engine and the generation of power. Transport systems - such as the motor cars, aircraft and railway trains - can only function because of this process; it also makes possible the*

generation of the electricity, supplying energy for heating, lighting and computing, and many other processes essential to the modern world. *Basic Engineering Thermodynamics*, first published in 1960, provides a comprehensive introduction to the principles and application of the subject. The fifth edition has been extensively revised and updated with a new chapter on basic psychrometry and additional material and re-drawn illustration throughout. This is a core text for BTEC HNC/D and degree courses in mechanical engineering.

Chemistry May 16 2022 Emphasises on contemporary applications and an intuitive problem-solving approach that helps students discover the exciting potential of chemical science. This book incorporates fresh applications from the three major areas of modern research: materials, environmental chemistry, and biological science.

Previews of Heat and Mass Transfer Nov 29 2020

*Properties of Solutions - Quick Review Chemistry Notes and Outline* Dec 19 2019  
*Properties of Solutions - Quick Review Outline and Handout* Learn and review on the go! Use *Quick Review Chemistry Notes* to help you learn or brush up on the subject quickly. You can use the review notes as a reference, to

understand the subject better and improve your grades. Easy to remember facts to help you perform better. Perfect study notes for all high school and college students. 9 Pages

Horizons May 24 2020 In this revised and updated Sixth Edition, Mike Seeds has two goals. First, he wants to show students their place in the universe-not just their location, but their role as planet dwellers in an evolving universe. His second goal is to show them how science works. Essentially, HORIZONS can be understood by a principle, organizing theme: the interplay of evidence and hypothesis. Through a discussion of this interplay, Seeds provides not just a series of facts, but a conceptual framework for understanding the logic of astronomical knowledge. A good example of this is how a survey of the solar system in Chapter 16 leads to theories that explain the origin of the solar system, which is followed by further evidence in Chapters 17 through 20 that helps students test and generalize theories. Students reading HORIZONS will not only learn about the vast reaches of the universe, they will gain new insight into the human quest to understand it. To enhance students' learning experience, each new copy of the book includes two CD-ROMs: THE SKY(tm) STUDENT EDITION CD-ROM and VOYAGE THROUGH THE SOLAR SYSTEM CD-

ROM, creating the most complete media package available for an astronomy text.

Carlos Is Not Crazy!: The Perfect Solution to Preventing the Mass Shootings in our Schools!

Dec 23 2022 The mass shooting in Texas on Tuesday, May 24, 2022, that killed 19 children galvanized me into writing this children's book. It is my solution to the killing-children-in-their-schools problem. I am convinced it is the only solution that will work! It is written for and to the Children who were not killed in these egregious mass shootings who will live to adulthood so they can do what their parents and grandparents would not or could not do, which is to get the guns and stop the killing. Since the mass shooting in Texas involved 4th graders, I used a 4th grader named Carlos to get my message across, and since children are our future and will lead the way to solving this unfortunate problem of ours by changing America when they grow up, I used the children's book as the medium for my message. There will come a Tipping Point when the majority of Americans will want to get the guns and it will arrive when the friends of the children being killed today become Voters and Congressmen and Supreme Court Judges and President!

Solution of the Laminar Boundary-layer Equations with Mass Transfer by the Gkd Multimoment Method Jan 20 2020 The Galerkin-Kantorovich-Dorodnitsyn multimoment method is applied to the solution of the steady, two dimensional and axially symmetric laminar boundary-layer equations for the limited class of compressible flows which admit transformation to a corresponding incompressible flow. The convergence and exactness properties of the approximate solutions are presented. The solutions converge toward the exact, usually in a uniform manner. The third and higher orders of approximation are in general less than one percent in error. The fourth order of approximation is suggested as the best compromise between the requirements of

accuracy and computational feasibility. The method is applied to several trial calculations which span the spectrum of flows with mass transfer. The results for these flows are in substantial agreement with numerical solutions. The least accurate approximate results are found in the vicinity of blow off on a flat plate. (Author).

*Pretext for Mass Murder Aug 27 2020* In the early morning hours of October 1, 1965, a group calling itself the September 30th Movement kidnapped and executed six generals of the Indonesian army, including its highest commander. The group claimed that it was attempting to preempt a coup, but it was quickly defeated as the senior surviving general, Haji Mohammad Suharto, drove the movement's partisans out of Jakarta. Riding the crest of mass violence, Suharto blamed the Communist Party of Indonesia for masterminding the movement and used the emergency as a pretext for gradually eroding President Sukarno's powers and installing himself as a ruler. Imprisoning and killing hundreds of thousands of alleged communists over the next year, Suharto remade the events of October 1, 1965 into the central event of modern Indonesian history and the cornerstone of his thirty-two-year dictatorship. Despite its

importance as a trigger for one of the twentieth century's worst cases of mass violence, the September 30th Movement has remained shrouded in uncertainty. Who actually masterminded it? What did they hope to achieve? Why did they fail so miserably? And what was the movement's connection to international Cold War politics? In *Pretext for Mass Murder*, John Roosa draws on a wealth of new primary source material to suggest a solution to the mystery behind the movement and the enabling myth of Suharto's repressive regime. His book is a remarkable feat of historical investigation. Finalist, Social Sciences Book Award, the International Convention of Asian Scholars

*The Customer Loyalty Solution* Feb 19 2020 To be successful, database marketers have to think like customers. They have to dream up strategies they think will work, test them, come up more new ideas, and test them again. Arthur Hughes, a leading expert in database marketing, shows readers how to accomplish those goals. He shows them how to get out of the vicious circle of building new loyalty programs, instead showing them how to build enduring loyalty programs using incrementalism. In this guide, readers will learn: Why giving customers a choice in a direct offer always reduces response Why you

shouldn't market to Gold customers What you can do to increase retention rates This in-depth guide, loaded with case studies from leading companies including UPS, ebay, American Airlines, and Land's End, shows managers and executives how to deal with the new issues that typify the Internet era.

Acid Rain Jun 05 2021

Vision for the World Feb 25 2023 The problem of mass blindness today stems largely from cataract which accounts for a total of 40 million cataract victims in the world – and it will worsen with the ageing population. Fortunately, this problem can be resolved with cost effective extracapsular cataract extraction (ECCE) and posterior chamber implantation (PCI). This book highlights how the use of ECCE and PCI can restore normal vision to cataract victims around the world. A successful approach is to establish training centres. The success of the International Intraocular Implant Training Centre (IIITC) in the Peoples' Republic of China is cited to show that implant surgery for cataracts can be successfully performed in communities in developing nations in Asia with appropriate training and supervision. The centre has since yielded excellent results with cost effective ECCE and PCI. The book challenges eye surgeons around the world to unite to address a global

need to contain world cataract blindness.  
Contents: Introduction Impact of Technology on

First Book of Qualitative Chemistry for  
Studies of Water Solution and Mass Action  
(Classic Reprint) Aug 07 2021 Excerpt from

First Book of Qualitative Chemistry for  
Studies of Water Solution and Mass Action In  
this edition, as in the One first issued, the  
Object is not so much analysis as it is  
chemistry; not detective method for its own  
sake so much as it is a personal acquaintance

with the character of the chemical elements and with the nature of chemical change. A suitable course in qualitative chemistry is found to be a favorable avenue by which to approach the vantage grounds of the science. An outline of the Periodic System, or of some part of it, is kept in view of the student while he is led to trace the gradation in the reactions of the several elements, and thereby to define the different analytical groups. Some care has been bestowed, in this edition, as in that of 1879, upon statements of the composition of articles in use in daily life under current popular names. This is done in connection with analytical work bearing directly upon the articles so designated, and providing for their analysis. The qualitative student is proverbially curious as to the composition of materials in common use and this interest is available in laboratory teaching. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the

original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Oswaal CBSE Question Bank Class 9 English, Math, Science & Social Science (Set of 4 Books) (For 2023-24 Exam) Sep 20 2022

Description of the product: • 100% Updated with Latest Syllabus & Fully Solved Board Paper • Crisp Revision with Topic wise Revision Notes, Mind Maps & Mnemonics • Extensive Practice with 2000+ Questions & 2 Practice Papers • Concept Clarity with 1000+concepts, Smart Mind Maps & Mnemonics • Final Boost with 50+ concept videos • 100% Exam Readiness with Competency Based Questions  
Foundations of Astronomy Jun 17 2022

Fascinating, engaging, and extremely visual, Foundations of Astronomy Twelfth Edition emphasizes the scientific method throughout as it guides students to answer two fundamental questions: What are we? And how do we know? Updated with the newest developments and latest discoveries in the exciting study of astronomy, authors Michael Seeds and Dana Backman discuss the interplay between evidence and hypothesis, while providing not only fact but also a conceptual framework for

understanding the logic of science. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Fundamentals of Chemistry Jan 12 2022

Fateful Months Jun 24 2020 An important concern in understanding the "machinery" of the Holocaust is the timing of the decision to put into effect the Final Solution, the systematic murder of the European Jews. This book explores the crucial first steps in implementing the mass murder, including Hitler's role in the decision-making process. The participation of middle and lower middle echelon Germans, and the development of the technology of destruction, in particular, the gas van for use in the death camps. Looking at events from summer 1941 to Spring 1942, Christopher Browning sheds important new light on the historians' debate about how the policy of systematic mass murder emerged.
